Definitions and Terminology

Definitions and Terminology

Except where the context otherwise requires or, where otherwise indicated, all references to "Ardagh", "Ardagh Group", "Group", "AGSA," the "Company", "we", "us" and "our" refer to Ardagh Group S.A. and its consolidated subsidiaries, except where the context otherwise requires. Ardagh's operations have the following divisions: "Ardagh Metal Packaging" and "Ardagh Glass Packaging".

References to legislation are, except where otherwise stated, references to the legislation of the United States of America.

In addition, unless indicated otherwise, or the context otherwise requires, references in this annual report to:

- "2017 IPO" are to the Company's initial public offering, which closed on March 20, 2017;
- "AMP" are to Ardagh Metal Packaging S.A. and its consolidated subsidiaries, except where the context requires otherwise;
- "AMP Business" are to the business of developing, manufacturing, marketing and selling metal beverage cans and ends and related technical and customer services as engaged by AMP and its subsidiaries;
- "AMP Transfer" are to a series of transactions pursuant to the Transfer Agreement in connection with the Business Combination effected by AGSA on April 1, 2021 that resulted in (a) the equity interests of Ardagh Packaging Holdings Limited, an Irish subsidiary of AGSA, and certain other subsidiaries of AGSA engaged in the metal beverage can business being directly or indirectly owned by AMP (all such entities collectively, the "AMP Entities") and (b) any assets and liabilities relating to the business of AGSA (other than the AMP Business) that are held by the AMP Entities being transferred to subsidiaries of AGSA that are not AMP Entities, and assets and liabilities relating to the AMP Business that are held by subsidiaries of AGSA (other than the AMP Entities) being transferred to the AMP Entities;
- "Articles" are to the Company's articles of association;
- "Business Combination" are to the transactions contemplated by the Business Combination Agreement;
- "Business Combination Agreement" are to the business combination agreement dated as of February 22, 2021, as amended from time to time, by and among GHV, AMP, Ardagh Group and MergeCo;
- "Consol" are to Consol Holdings Proprietary Limited acquired on April 29, 2022;
- "ESG" are to Environmental, Social and Governance;
- "GHV" are to Gores Holdings V, Inc., a Delaware corporation which, following the Merger, was renamed to "Ardagh MP USA Inc";
- "GHV Sponsor" are to Gores Sponsor V LLC, a Delaware limited liability company;
- "MergeCo" are to Ardagh MP MergeCo Inc;
- "Merger" are to the merger of MergeCo with and into GHV, with GHV surviving the Merger as a wholly owned subsidiary of AMP, which occurred on August 4, 2021;
- "NYSE" are to the New York Stock Exchange;
- "Parent Company" are to ARD Holdings S.A. and/or, where relevant, one or more of its subsidiaries;
- "REACH" are to the European Union's regulations concerning the Registration, Evaluation, Authorization and Restriction of Chemicals;

- “Science-Based Sustainability Targets” are to the targets that are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement of 2015 (limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C);
- “Science-Based Targets initiative” are to the initiative to drive climate action in the private sector by enabling companies to set science-based emissions reduction targets;
- “Scope 1 Emissions” are to those GHG emissions that an organization makes directly from activities;
- “Scope 2 Emissions” are to those GHG emissions that an organization makes indirectly;
- “Scope 3 Emissions” are to all indirect GHG emissions that occur in the value chain of the reporting company, including both upstream and downstream emissions;
- “Shareholder Agreement” are to the shareholder agreement dated March 20, 2017, entered into between AGSA and the Parent Company;
- “Toggle Notes” are to the Parent Company’s Dollar Toggle Notes and Euro Toggle Notes as referred to in *Major Shareholders and Related Party Transactions*;
- “Transfer Agreement” are to the transfer agreement, dated as of February 22, 2021, by and between AGSA and AMP;
- “Trivium” are to Trivium Packaging B.V. and/or, where relevant, its consolidated subsidiaries; and
- “VNA” are to the Group's U.S. glass packaging business, formerly Verallia North America.

General Information

General Information

Ardagh Group S.A. was incorporated under the laws of Luxembourg on May 6, 2011 and is a subsidiary of ARD Holdings S.A.. The Company's registered office is 56, rue Charles Martel, L-2134 Luxembourg, Luxembourg. The Company is registered with the Luxembourg Register of Commerce and Companies (*Registre de Commerce et des Sociétés de Luxembourg)* under number B 160804.

The Company has direct and indirect ownership of 100% of the issued share capital of a holding company which hold all of the finance and operating subsidiaries of Ardagh Glass Packaging. Ardagh indirectly holds 76.04% of the ordinary shares and 100% of the preferred shares of Ardagh Metal Packaging S.A. through a wholly-owned subsidiary, which holds all the finance and operating subsidiaries of Ardagh Metal Packaging as a result of the Company's entry into the Business Combination Agreement dated as of February 22, 2021, as referred to in Note 1 - General Information of the audited consolidated financial statements. Ardagh holds approximately 42% of the ordinary shares of Trivium Packaging B.V., a leading supplier of metal packaging in the form of cans and aerosol containers, serving a broad range of end-use categories, principally including food, seafood, pet food and nutrition, as well as beauty and personal care.

We are a leading supplier of sustainable, innovative, value added rigid packaging solutions. Our products include metal beverage cans and glass containers primarily for beverage and food markets, which are characterized by stable, consumer driven demand. Our end use categories include beer, food, hard seltzers, wine, spirits, carbonated soft drinks, energy drinks, juices and sparkling waters. Our customers include a wide variety of leading consumer product companies which value our packaging products for their features, convenience and quality, as well as the end user appeal they offer through design, innovation, functionality, premium association and brand promotion. With our significant invested capital base, supported by consistent levels of re-investment, our extensive technological capabilities and manufacturing know how, we believe we are well positioned to continue to meet the dynamic needs of our customers. We have mainly built our Company through strategic acquisitions and other corporate transactions and have established leadership positions in large, attractive markets in beverage cans and glass containers.

We serve over 1,500 customers across approximately 100 countries, comprised of multi-national companies, large national and regional companies and numerous local businesses. In our target regions of Europe, Africa, North America and Brazil, our customers include a wide variety of consumer packaged goods companies, which own some of the best known brands in the world. We have a stable customer base with long-standing relationships and approximately three quarters of our sales are generated under multi year contracts, with the remainder largely subject to annual arrangements. A significant portion of our sales volumes are supplied under contracts which include input cost pass through provisions, which help us deliver generally consistent absolute margins.

We operate 65 production facilities in 16 countries and employ approximately 21,000 personnel. Our production network includes 24 metal packaging production facilities and 41 glass packaging production facilities. Our production facilities are generally located to serve our customers' filling locations. Certain facilities may also be dedicated to specific end use categories, enhancing product specific expertise and generating benefits of scale and production efficiency. Significant capital has been invested in our extensive network of long lived production facilities, which, together with our skilled workforce and related manufacturing process know how, supports our competitive positions.

We are committed to market leading innovation and product development and maintain dedicated innovation, development and engineering centers in the United States and Europe to support these efforts. These facilities focus on three main areas: (i) innovations that provide enhanced product design, differentiation and user experience for our customers and end use consumers; (ii) innovations that reduce input costs to generate cost savings for both our customers and us (lightweighting); and (iii) developments to meet evolving product safety standards and regulations.

Group Consolidated Financial Statements – Basis of Preparation

The consolidated financial statements of the Group have been prepared in accordance with, and are in compliance with IFRS and related interpretations, as adopted by the IASB. IFRS is comprised of standards and interpretations approved by the IASB and IFRS and interpretations approved by the predecessor International Accounting Standards Committee that have been subsequently approved by the IASB and remain in effect. References to IFRS hereafter should be construed as references to IFRS as adopted by the IASB.

The consolidated financial statements, are presented in U.S. dollar, rounded to the nearest million and have been prepared under the historical cost convention, except for the following:

- Private and public warrants are stated at fair value (see Note 21 – Provisions and other liabilities);
- derivative financial instruments are stated at fair value; and
- employee benefit obligations are measured at the present value of the future estimated cash flows related to benefits earned and pension assets valued at fair value.

The preparation of consolidated financial information in conformity with IFRS requires the use of critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and income and expenses. It also requires management to exercise judgment in the process of applying Group accounting policies. These estimates, assumptions and judgments are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances and are subject to continual re-evaluation. However, actual outcomes may differ from these estimates. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are discussed in the critical accounting estimates, assumptions and judgments.

The consolidated financial statements for the Group were authorized for issue by the board of directors of Ardagh Group S.A. (the "Board") on February 22, 2023.

Forward-Looking Statements

Forward-looking statements are not historical facts and are inherently subject to known and unknown risks and uncertainties, many of which may be beyond our control. Forward-looking statements are not a guarantee of future performance and actual results or developments may differ materially from expectations. The words "believe," "expect," "anticipate," "will," "could," "would," "should," "may," "plan," "estimate," "intend," "predict," "potential," "continue," and the negatives of these words and other similar expressions generally identify forward-looking statements. Any forward-looking statements in this annual report are based on certain assumptions and analyses made by us in light of our experience and perception of historical trends, current conditions, expected future developments, and other factors we believe are appropriate in the circumstances.

It is possible actual events could differ materially from those made in or suggested by the forward-looking statements in this annual report from our current expectations and projections about future events at the time due to a variety of factors including, but not limited to, the following:

- changes in the political, credit, financial and/or economic environment in which we operate, which could have a material adverse effect on our business, such as reducing demand for our products;
- competition from other metal packaging and glass packaging producers and alternative forms of packaging;
- increases in metal beverage cans and/or glass container manufacturing capacity without corresponding increases in demand;
- concentration of our customers and further consolidation of our existing customer base;
- changes in our customers' strategic choices, such as whether to prioritize price or volume requirements;
- varied seasonal demands for our products and unseasonable weather conditions;
- availability and any increase in the costs of raw materials, including as a result of changes in tariffs and duties and our inability to fully pass-through input costs;
- stability of energy supply and increase in energy prices, including in Europe as a result of the ongoing Russia-Ukraine war (as defined below);
- currency, interest rate and commodity price fluctuations;
- interruption in the operations of our production facilities;
- high levels of maintenance capital expenditure;
- reliance on our suppliers and their ability to make timely deliveries due to factors such as supply chain disruption;

- future acquisitions, including with respect to successful integration;
- difficulty in making period-to-period comparisons of our results of operations;
- a significant write down of goodwill;
- carrying value of Trivium equity accounted joint venture;
- indemnification obligations relating to our divestments;
- data protection, data breaches, cyber attacks on our information technology ("IT") systems and network disruptions, including the costs and reputational harm associated with such events;
- impact of climate change, both physical and transitional as well as those associated with the failure to meet our sustainability targets;
- environmental, health and safety concerns, as well as legal, regulatory or other measures to address such concerns and associated costs to us;
- legislation and regulation, including costs of compliance and changes to laws and regulations governing our business;
- operations in emerging and other less developed markets;
- workplace injury and illness claims at our production facilities;
- litigation, arbitration and other proceedings;
- changes in consumer lifestyle, nutritional preferences, health-related concerns and consumer taxation;
- costs and future funding obligations associated with post-retirement benefits provided to our employees;
- organized strikes or work stoppages by our unionized employees;
- failure of our control measures and systems that result in faulty or contaminated products;
- non-existent, insufficient or prohibitively expensive insurance coverage;
- dependence on our executive and senior management, and personnel; and
- other risks and uncertainties described herein, including those under "*Risk Factors*."

In addition, new risk factors and uncertainties emerge from time to time, and it is not possible for us to predict all risk factors and uncertainties, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual events to differ materially from those contained in any forward-looking statements. Therefore, you are cautioned not to place undue reliance on these forward-looking statements. While we continually review trends and uncertainties affecting our results of operations and financial condition, we do not assume any obligation to update or supplement any particular forward-looking statements contained in this annual report.

Selected Financial Information

SELECTED FINANCIAL INFORMATION

The financial data of Ardagh Group S.A. as of and for the years ended December 31, 2022 and 2021 is derived from the audited consolidated financial statements included in this annual report.

The summary historical financial data set forth below should be read in conjunction with, and is qualified in its entirety by, reference to the audited consolidated financial statements included in this annual report and the related notes thereto. The following financial data should also be read in conjunction with the "Operating and Financial Review" also included in this annual report.

Some of the measures used in this report are not measurements of financial performance under IFRS and should not be considered an alternative to cash flow from operating activities as a measure of liquidity or an alternative to operating profit/(loss) or profit/(loss) for the year as indicators of our operating performance or any other measures of performance derived in accordance with IFRS.

The following table sets forth summary consolidated financial information for the Group.

	Year ended December 31,	
	2022	**2021**
Income Statement Data	**(in $ millions except percentages)**	
Revenue	9,030	7,577
Adjusted EBITDA [(1)]	**1,264**	**1,245**
Depreciation and amortization	(809)	(746)
Exceptional items [(3)]	(378)	(851)
Net finance expense [(4)]	(328)	(377)
Share of post-tax profit/(loss) in equity accounted joint venture [(5)]	7	(55)
Loss before tax	**(244)**	**(784)**
Income tax (charge)/credit	(46)	18
Loss for the year	**(290)**	**(766)**
Other Data		
Adjusted EBITDA margin [(1)]	14.0%	16.4%
Interest expense [(6)]	426	376
Maintenance capital expenditure [(7)]	495	371
Growth investment capital expenditure [(7)]	611	695

Balance Sheet Data	**As at December 31,**	
	2022	**2021**
	(in $ millions except ratios)	
Cash and cash equivalents and restricted cash [(8)]	1,131	2,909
Working capital [(9)]	673	263
Total assets	11,821	11,914

Operating and Financial Review

Operating and Financial Review

Business Drivers

The main factors affecting our results of operations for Ardagh Metal Packaging and Ardagh Glass Packaging are: (i) global economic trends, end-consumer demand for our products and production capacity of our manufacturing facilities; (ii) prices of energy and raw materials used in our business, primarily aluminum, steel, cullet, sand, soda ash and coatings, and our ability to pass through these and other cost increases to our customers, through contractual pass through mechanisms under multi-year contracts, or through renegotiation in the case of short-term contracts or through levying surcharges in respect of shorter-term cost increases; (iii) investment in operating cost reductions; (iv) acquisitions; and (v) foreign exchange rate fluctuations and currency translation risks arising from various currency exposures, primarily with respect to the euro, U.S. dollar, British pound, Swedish krona, Polish zloty, Danish krone, South African rand and Brazilian real.

Ardagh Metal Packaging

Ardagh Metal Packaging generates its revenue from supplying metal can packaging to the beverage end use category. Revenue is primarily dependent on sales volumes and sales prices.

Sales volumes are influenced by a number of factors, including factors driving customer demand, seasonality and the capacity of our, and of our competitors, metal packaging plants. Demand for our metal beverage cans may be influenced by trends in the consumption of beverages, industry trends in packaging, including marketing decisions, and the impact of environmental regulations and shifts in consumer sentiment towards a greater awareness of sustainability. The demand for beverage products is strongest during spells of warm weather and therefore demand typically, based on historical trends, peaks during the summer months, as well as in the period leading up to holidays in December. Accordingly, we generally build inventories in the first and fourth quarters, in anticipation of the seasonal demands in our metal packaging business.

AMP's Adjusted EBITDA is based on revenue derived from selling our metal beverage cans and ends and is affected by a number of factors, primarily cost of sales. The elements of AMP's cost of sales include (i) variable costs, such as raw materials (including the cost of aluminum), energy, packaging materials, decoration and freight and other distribution costs, and (ii) fixed costs, such as labor and other plant-related costs including depreciation and maintenance. In addition, sales, marketing and administrative costs also impact Adjusted EBITDA. AMP's variable costs have typically constituted approximately 75% and fixed costs approximately 25% of the total cost of sales for its business.

Ardagh Glass Packaging

Ardagh Glass Packaging generates its revenue principally from selling glass containers. Ardagh Glass Packaging revenue is primarily dependent on sales volumes and sales prices. Ardagh Glass Packaging includes our glass engineering business, Heye International.

Sales volumes are affected by a number of factors, including factors impacting customer demand, seasonality and the capacity of Ardagh Glass Packaging's plants. Demand for glass containers may be influenced by trends in the consumption of beverages, fruit and vegetable harvests, industry trends in packaging, including marketing decisions, and the impact of environmental regulations, as well as changes in consumer sentiment including a greater awareness of sustainability issues.

Beverage and food end market sales within our glass packaging business are seasonal in nature, with strongest demand for beverage market sales during the summer and during periods of warm weather, as well as the period leading up to holidays in December. Accordingly, Ardagh Glass Packaging's shipment volumes of glass containers is typically lower in the first quarter. Ardagh Glass Packaging builds inventory in the first quarter in anticipation of these seasonal demands. In addition, Ardagh Glass Packaging generally schedules shutdowns of its plants for furnace rebuilding and repairs of machinery in the first quarter. These strategic shutdowns and seasonal sales patterns adversely affect profitability in Ardagh Glass Packaging's glass manufacturing operations during the first quarter of the year. The timing and extent of plant shutdowns may also affect the comparability of results from period to period. Ardagh Glass Packaging's working capital requirements are typically greatest at the end of the first quarter of the year.

Ardagh Glass Packaging's Adjusted EBITDA is based on revenue derived from selling glass containers and glass engineering products and services and is affected by a number of factors, primarily cost of sales. The elements of Ardagh

Glass Packaging's cost of sales for its glass container manufacturing business include (i) variable costs, such as natural gas and electricity, raw materials (including the cost of cullet), packaging materials, decoration and freight and other distribution costs, and (ii) fixed costs, such as labor and other plant-related costs including depreciation and maintenance. In addition, sales, marketing and administrative costs also impact Adjusted EBITDA. Ardagh Glass Packaging's variable costs have typically constituted approximately 40% and fixed costs approximately 60% of the total cost of sales for our glass container manufacturing business.

On April 29, 2022, the Group acquired Consol, the leading producer of glass packaging on the African continent, for an equity value of ZAR10.1 billion ($663 million).

Supplemental Management's Discussion and Analysis

Key operating measures

Adjusted EBITDA consists of profit/(loss) for the year before income tax charge/(credit), net finance expense, depreciation and amortization, exceptional operating items and share of profit or loss in equity accounted joint venture. We use Adjusted EBITDA to evaluate and assess our segment performance. Adjusted EBITDA is presented because we believe that it is frequently used by securities analysts, investors and other interested parties in evaluating companies in the packaging industry. However, other companies may calculate Adjusted EBITDA in a manner different from ours. Adjusted EBITDA is not a measure of financial performance under IFRS and should not be considered an alternative to profit/(loss) as indicators of operating performance or any other measures of performance derived in accordance with IFRS.

For a reconciliation of the profit/(loss) for the year to Adjusted EBITDA see Note 3 – Segment analysis within the audited consolidated financial statements.

Financial Performance Review

The consolidated results for the three months ended December 31, 2022 are presented on an as reported basis for Ardagh Glass Packaging Europe & Africa, and the consolidated results for the year ended December 31, 2022 and for the three and twelve months ended December 31, 2021 are presented below on a pro-forma basis as if the acquisition of Consol was completed on January 1, 2021 respectively.

Group Adjusted EBITDA in the three months ended December 31, 2022 decreased by $4 million, or 1%, to $323 million, compared with $327 million in the three months ended December 31, 2021. Excluding foreign currency translation effects of $24 million, Adjusted EBITDA in the three months ended December 31, 2022 increased by 6% or $20 million compared with pro-forma Adjusted EBITDA for the same period last year.

Group pro-forma Adjusted EBITDA in the year ended December 31, 2022 decreased by $96 million, or 7%, to $1,314 million, compared with $1,410 million in the year ended December 31, 2021. Excluding foreign currency translation effects of $91 million, pro-forma Adjusted EBITDA in the year ended December 31, 2022 decreased by $5 million, or less than 1%, compared with the same period last year.

* AMP indemnification represents costs, borne by the Company pursuant to a letter of agreement between the Company and Ardagh Metal Packaging, whereby the Company agreed to indemnify, defend and hold harmless Ardagh Metal Packaging and its subsidiaries and their respective successors from and against any and all losses incurred prior to December 31, 2021, resulting from the cyber security incident in 2021. In the full year 2021 the impact of this incident on Adjusted EBITDA, after insurance recoveries, was $nil.

Revenue

Ardagh Metal Packaging Europe. Revenue of $438 million decreased by 4% in the three months ended December 31, 2022, compared with $455 million in the same period last year. On a constant currency basis, revenue increased by 12%, principally due to the pass through of higher input costs and favorable volume/mix effects.

Ardagh Metal Packaging Americas. Revenue increased by 1% to $638 million in the three months ended December 31, 2022, compared with $632 million in the same period last year, principally reflecting the pass through of higher input costs, partly offset by unfavorable volume/mix effects.

Ardagh Glass Packaging Europe & Africa. Revenue increased by $60 million, or 9%, to $709 million in the quarter ended December 31, 2022, compared with a pro-forma $649 million in the quarter ended December 31, 2021. Excluding unfavorable foreign currency translation effects of $89 million, revenue increased by $149 million, or 23%, mainly driven by the pass through of higher input costs and favorable volume/mix effects during the quarter.

Ardagh Glass Packaging North America. Revenue decreased by $6 million, or 1%, to $418 million in the quarter ended December 31, 2022, compared with $424 million in the quarter ended December 31, 2021. The decrease in revenue reflected unfavorable volume/mix effects, partly offset by the pass through of higher input costs.

Adjusted EBITDA

Ardagh Metal Packaging Europe. Adjusted EBITDA for the quarter of $45 million decreased by $9 million, or 17%, at actual exchange rates, and by 2% at constant currency, compared with $54 million in the same period last year. The decrease in Adjusted EBITDA was principally due to input cost headwinds and increased operating costs, which were partly offset by favorable volume/mix effects, which includes an impact of the Group's growth investment program.

Ardagh Metal Packaging Americas. Adjusted EBITDA for the quarter of $114 million increased by 3%, compared with $111 million in the same period last year, primarily driven by favorable volume/mix effects, which includes an impact of the Group's growth investment program, partly offset by input cost headwinds and higher operating costs.

Ardagh Glass Packaging Europe & Africa. Adjusted EBITDA increased by $21 million, or 17%, to $142 million in the quarter ended December 31, 2022, compared with a pro-forma $121 million in the quarter ended December 31, 2021. Excluding unfavourable foreign currency translation effects of $16 million, Adjusted EBITDA increased by $37 million, or 31%, primarily due to favorable volume/mix effects, the recovery of higher costs in increased selling prices and operating and other cost savings.

Ardagh Glass Packaging North America. Adjusted EBITDA decreased by $2 million to $22 million in the quarter ended December 31, 2022, compared with $24 million in the quarter ended December 31, 2021. The decrease in Adjusted EBITDA was driven by unfavorable volume/mix effects, resulting in increased plant downtime, partly offset by higher selling prices to recover increased input costs.

Year ended December 31, 2022

Revenue

Ardagh Metal Packaging Europe. Revenue increased by $125 million, or 7%, to $1,963 million in the year ended December 31, 2022, compared with $1,838 million in the year ended December 31, 2021. The increase in revenue principally reflects the pass through of higher input costs and favorable volume/mix effects of 6%, which includes an impact of the Group's growth investment program, partly offset by unfavorable foreign currency translation effects of $210 million.

Ardagh Metal Packaging Americas. Revenue increased by $509 million, or 23%, to $2,726 million in the year ended December 31, 2022, compared with $2,217 million in the year ended December 31, 2021. Revenue growth reflected the pass through of higher input costs and favorable volume/mix effects of 7%.

Ardagh Glass Packaging Europe & Africa. Pro-forma revenue increased by $321 million, or 13%, to $2,733 million in the year ended December 31, 2022, compared with a pro-forma $2,412 million in the year ended December 31, 2021. Excluding unfavorable foreign currency translation effects of $265 million, revenue increased by $586 million, or 24%, principally driven by selling price increases to pass through higher input costs, and favorable volume/mix effects.

Ardagh Glass Packaging North America. Revenue increased by $69 million, or 4%, to $1,807 million in the year ended December 31, 2022, compared with $1,738 million in the year ended December 31, 2021. The increase in revenue reflected the pass through of higher input costs, partly offset by unfavorable volume/mix effects.

Adjusted EBITDA

Ardagh Metal Packaging Europe. Adjusted EBITDA decreased by $81 million, or 29%, to $200 million in the year ended December 31, 2022, compared with $281 million in the year ended December 31, 2021. Excluding unfavorable foreign currency translation effects of $32 million, the decrease in Adjusted EBITDA principally reflected input cost headwinds and increased operating costs, which were partly offset by favorable volume/mix effects, which includes an impact of the Group's growth investment program and favorable non-recurring SG&A and other gains.

Ardagh Metal Packaging Americas. Adjusted EBITDA increased by $44 million, or 12%, to $425 million in the year ended December 31, 2022, compared with $381 million in the year ended December 31, 2021. Adjusted EBITDA growth was mainly driven by favorable volume/mix effects, which includes an impact of the Group's growth investment program, partly offset by increased operating costs.

Ardagh Glass Packaging Europe & Africa. Adjusted EBITDA decreased by $32 million, or 6%, to a pro-forma $526 million in the year ended December 31, 2022, compared with a pro-forma $558 million in the year ended December 31, 2021. Excluding unfavorable foreign currency translation effects of $59 million, pro-forma Adjusted EBITDA increased by $27 million, or 5%, primarily due to favorable volume/mix effects, operating and other cost savings, including insurance recoveries on covid-related losses, partly offset by increased input costs, in particular energy and logistics.

Ardagh Glass Packaging North America. Adjusted EBITDA decreased by $27 million, or 14%, to $163 million in the year ended December 31, 2022, compared with $190 million in the year ended December 31, 2021. The decrease in Adjusted EBITDA was mainly driven by unfavorable volume/mix effects, including related increased freight and other operating costs, partly offset by increased selling prices.

Liquidity and Capital Resources

Cash Requirements Related to Operations

Our principal sources of cash are cash generated from operations and external financings, including borrowings and other credit facilities. Our principal funding arrangements include borrowings available under the Group's Global Asset Based Loan Facility.

The following table outlines our principal financing arrangements as of December 31, 2022.

Facility	Currency	Maximum amount drawable	Final maturity date	Facility type	Amount drawn			Undrawn amount
		Local currency m			Restricted Group $'m	Unrestricted Group * $'m	Total Group $'m	$'m
5.250% Senior Secured Notes	USD	700	30-Apr-25	Bullet	700	–	700	–

*Unrestricted Group refers to Ardagh Metal Packaging S.A. and its subsidiaries as referred to in Note 1 - General information.

On June 8, 2022, AMP issued $600 million 6.000% Senior Secured Green Notes due 2027. Net proceeds from the issuance of the notes will be used for general corporate purposes.

Lease obligations at December 31, 2022 of $681 million (December 31, 2021: $440 million) reflects $332 million of new lease liabilities and foreign currency movements and $43 million of lease liabilities acquired as part of the acquisition of Consol (see Note 25 - Business Combinations), partly offset by $134 million of principal repayments, in the year ended December 31, 2022.

At December 31, 2022 the Group had $848 million available under the Global Asset Based Loan Facilities (2021: $792 million).

The following table outlines the minimum repayments the Group is obliged to make in the twelve months ending December 31, 2022, assuming that the other credit lines will be renewed or replaced with similar facilities as they mature.

Facility	Currency	Local Currency	Final Maturity Date	Facility Type	Minimum net repayment for the Twelve months ending December 31, 2023
		(in millions)			(in $ millions)

Lease obligations	Various	—		Amortizing	124
Other borrowings/credit lines	Various	—	Rolling	Amortizing	25
					149

The Group generates substantial cash flow from its operations and had $1,131 million in cash, cash equivalents and restricted cash as of December 31, 2022, as well as available but undrawn liquidity of $930 million under its credit facilities.

We believe that our cash balances and future cash flow from operating activities, as well as our credit facilities, will provide sufficient liquidity to fund our purchases of property, plant and equipment, interest payments on our notes and other credit facilities, and dividend payments for at least the next twelve months. In addition, we believe that we will be able to fund certain additional investments, which we may choose to pursue, from our current cash balances, credit facilities, cash flow from operating activities, and where necessary, incremental debt.

The Group's long-term liquidity needs primarily relate to the service of our debt obligations. We expect to satisfy our future long-term liquidity needs through a combination of cash flow generated from operations and, where appropriate, to refinance our debt obligations in advance of their respective maturity dates, as we have successfully done in the past.

The Group believes it has adequate liquidity to satisfy its cash needs for at least the next 12 months. In the year ended December 31, 2022, the Group reported operating profit of $455 million, cash generated from operations of $840 million and generated Adjusted EBITDA of $1,264 million.

Receivables Factoring and Related Programs

We participate in several uncommitted accounts receivable factoring and related programs with various financial institutions for certain receivables. Such programs are accounted for as true sales of receivables, as they are either without recourse to us or transfer substantially all the risk and rewards to the financial institutions. Receivables of $661 million were sold under these programs at December 31, 2022 (December 31, 2021: $554 million).

Trade Payables Processing

Our suppliers have access to independent third party payable processors. The processors allow suppliers, if they choose, to sell their receivables to financial institutions at the sole discretion of both the supplier and the financial institution. We have no involvement in the sale of these receivables and the suppliers are at liberty to use these arrangements if they wish to receive early payment. As the original liability to our suppliers, including amounts due and scheduled payment dates, remains as agreed in our supply agreements and is neither legally extinguished nor substantially modified, the Group continues to present such obligations within trade payables.

Footnotes to the Selected Financial Information

(1) Adjusted EBITDA consists of profit/(loss) for the year before income tax expense/(credit), net finance expense, depreciation and amortization, exceptional operating items and share of profit or loss in equity accounted joint venture. Adjusted EBITDA margin is calculated as Adjusted EBITDA divided by revenue. Adjusted EBITDA and Adjusted EBITDA margin are presented because we believe that they are frequently used by securities analysts, investors and other interested parties in evaluating companies in the packaging industry. However, other companies may calculate Adjusted EBITDA and Adjusted EBITDA margin in a manner different from ours. Adjusted EBITDA and Adjusted EBITDA margin are not measurements of financial performance under IFRS and should not be considered an alternative to profit/(loss) as indicators of operating performance or any other measures of performance derived in accordance with IFRS.

(2) ARGID Restricted Group pro-forma leverage ratio has been presented as supplemental pro-forma information to reflect the annualized impact of the cash dividends declared by AMP due to be received by the ARGID Restricted Group[13]. ARGID Restricted Group refers to bonds issued by the dual issuers, Ardagh Packaging Finance plc and Ardagh Holdings USA Inc, and to the restricted subsidiaries of the parent guarantor Ardagh Group SA.

(3) Exceptional items are shown on a number of different lines in the Consolidated Income Statement as referred to in Note 4 - Exceptional items of the audited consolidated financial statements.

(4) Includes exceptional finance income and expense.

(5) Includes exceptional share of post-tax profit/(loss) in equity accounted joint venture.

(6) Net interest expense is as set out in Note 5 - Net finance expense to the audited consolidated financial statements.

(7) Capital expenditure is the sum of purchase of property, plant and equipment and software and other intangibles, net of proceeds from disposal of property, plant and equipment, as per the Consolidated Statement of Cash Flows.

(8) Cash and cash equivalents and restricted cash include short term bank deposits and restricted cash as per the note disclosures to the consolidated financial statements included in this annual report.

(9) Working capital is comprised of inventories, trade and other receivables, related party receivables, contract assets, trade and other payables and current provisions. Other companies may calculate working capital in a manner different to ours.

(10) Net borrowings comprise non-current and current borrowings net of deferred debt issue costs.

(11) Net debt is comprised of net borrowings and derivative financial instruments used to hedge foreign currency and interest rate risk, net of cash and cash equivalents and restricted cash.

(12) Net debt to pro-forma Adjusted LTM EBITDA ratio at December 31, 2022 of 6.6x, is based on net debt at December 31, 2022 of $8,612 million and pro-forma Adjusted EBITDA for the last twelve months to December 31, 2022 of $1,314 million. Net debt to Adjusted LTM EBITDA ratio at December 31, 2022 of 6.8x, is based on net debt at December 31, 2022 of $8,612 million and reported Adjusted EBITDA for the last twelve months to December, 2022 of $1,264 million. Net debt to Adjusted LTM EBITDA ratio at December 31, 2021 of 4.7x, is based on net debt at December 31, 2021 of $5,798 million and Adjusted EBITDA for the year ended December 31, 2021 of $1,245 million.

(13) Restricted Group pro-forma leverage ratio at December 31, 2022 of 6.2x, is based on net debt at December, 2022 of $5,575 million divided by the total of AGSA pro-forma LTM Adjusted EBITDA of $1,314 million (See Note 12 above) less the impact of the LTM Adjusted EBITDA for the Ardagh Metal Packaging reportable segments of $625 million and including the pro-forma annualized AMP dividend attributable to AGSA for the twelve months ended December 31, 2022, of $182 million* and including the pro-forma annualized AMP 9% Preferred Shares dividend to AGSA for the twelve months ended December 31, 2022, of $22 million**.

*Calculated on a pro-forma basis for a full year impact based on total cash dividends declared on ordinary shares of $240 million which have been approved by the board of directors AMP for the year ended December 31 2022, of which approximately 76.04% is attributed to AGSA ($182 million). See Note 26 - Dividends of the audited consolidated statements for further detail.

** Calculated on a pro-forma basis for a full year impact based on the AMP approved quarterly interim cash dividend declared of 9% on the preferred shares of €12 million (approximately $11 million) for the six months period ended December 31, 2022.

See Notes 3, 19, and 24 of the audited consolidated statements for information regarding the Ardagh Metal Packaging reportable segments, the Restricted Group net debt, and dividends declared and paid by AMP respectively.

Risk Factors

Risk Factors

Our business is subject to a number of risks and uncertainties that may adversely affect our business, financial condition and results of operations and are described below. In addition, you should consider the interrelationship and compounding effects of two or more risks occurring simultaneously.

Risks Relating to Our Business

Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products.

Demand for our packaging depends on demand for the products that use our packaging, which is primarily consumer driven and dependent on general economic conditions. Deteriorating general economic conditions may adversely impact consumer confidence resulting in reduced spending on our customers' products and, thereby, reduced or postponed demand for our products.

Any adverse economic or political conditions may also lead to a limited availability of credit, which could have an adverse effect on the financial condition, particularly on the purchasing ability of some of our customers and distributors. This may result in requests for extended payment terms, credit losses, insolvencies and diminished available sales channels. Deteriorating general economic conditions could also have an adverse impact on our suppliers, causing them to experience financial distress or insolvency, and jeopardizing their ability to provide timely deliveries of raw materials and other essentials to us, which could in turn have material adverse effects on our business, financial condition and results of operations. Furthermore such changes in general economic conditions as described above, among others, may reduce our ability to forecast developments in our industry and plan our operations and costs accordingly, resulting in operational inefficiencies.

Recent events that have had a significant impact on macroeconomic conditions around the world include the COVID-19 pandemic and the outbreak of war in Ukraine (the "Russia-Ukraine war"). Government measures to contain the COVID-19 pandemic resulted in significant decline in business activity around the world. See also "*—Pandemics or disease outbreaks, such as the COVID-19 pandemic, as well as governmental mandates and restrictions attributable thereto, have had, and may continue to have an adverse impact on worldwide economic activity and our business*." The Russia-Ukraine war and the sanctions and export-control measures instituted by the United States, the European Union, and the United Kingdom, among others, against Russian and Belarussian persons and entities in response have contributed and will likely continue to contribute to heightened inflationary pressures (including increased prices for oil and natural gas), natural gas supply shortages, supply chain disruptions, market volatility and economic uncertainty, particularly in Europe. See also "*—Our profitability could be adversely affected by the availability and increase in the costs of raw materials, including as a result of changes in tariffs and duties*."

In June 2022, the World Bank warned that the Russia-Ukraine war had magnified the slowdown in the global economy triggered by the COVID-19 pandemic and predicted that the global economy was entering what could become a protracted period of low growth and elevated inflation in which, for many countries, economic recession will likely be difficult to avoid. Meanwhile, inflation rates have recently increased significantly in the European Union, the United States, the United Kingdom and Brazil. Further increases in inflation rates and actions taken by central banks and other state actors to combat rising inflation rates, such as recent increases in base interest rates by the United States Federal Reserve, the European Central Bank, the Bank of England and the Banco Central do Brasil, could further undermine economic growth, contribute to regional or global economic recessions, cause declines in consumer spending and confidence and increase borrowing costs, among other effects, each of which could materially adversely impact our business, financial condition and results of operations. See *"—Risks Relating to Our Capital Structure—Our substantial debt could adversely affect our financial health and our ability to effectively manage and grow our busin*ess" for a detailed discussion on the impact of changes in global economic conditions on our ability to raise new financing or refinance our existing borrowings. The slowdown of the global economy could lead to volatility in exchange rates that could increase the costs of our products. See "*—Currency, interest rate and commodity price fluctuations may have a material impact on our business*" for a further discussion on how this volatility could have a material adverse effect on our business.

Any economic downturn or recession, lower than expected growth, rising inflation or an otherwise uncertain economic outlook either globally or in the markets in which we operate could have a material adverse effect on our business, financial condition and results of operations.

We face competition from other metal and glass packaging producers, as well as from manufacturers of alternative forms of packaging.

Ardagh Metal Packaging

The sectors in which Ardagh Metal Packaging operates are relatively mature and competitive. Prices for the products manufactured by our metal packaging business are primarily driven by raw material costs. Competition in the market is based on price, as well as on innovation, sustainability, design, quality and service. Increases in productivity, combined with potential surplus capacity from recent or planned new investment in the industry, could result in pricing pressures in the future. Our principal competitors include Ball Corporation, Crown Holdings and CANPACK and some of our competitors may have greater financial, technical or marketing resources, or may have excess capacity. To the extent that any one or more of our competitors become more successful with respect to any key competitive factor, our ability to attract and retain customers could be materially and adversely affected. Moreover, changes in the global economic environment could result in reductions in demand for our products in certain instances, which could increase competitive pressures. The occurrence of any of the aforementioned events, among others, could have a material adverse effect on our business, financial condition and results of operation. See "*—Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*" for a further discussion on the impact of the global economic environment on our business.

In addition, Ardagh Metal Packaging is subject to substantial competition from producers of packaging made from plastic, glass, carton and composites, for example, PET bottles for carbonated soft drinks. Changes in consumer preferences in terms of packaging materials, style and product presentation can significantly influence sales, and there can be no assurance that our products will successfully compete against alternative products. An increase in consumer demand for alternative packaging could have a material adverse effect on our business, financial condition and results of operations.

Ardagh Glass Packaging

Ardagh Glass Packaging is subject to intense competition from other glass packaging producers, as well as from producers of other forms of rigid and non-rigid packaging, against whom we compete on the basis of price, product characteristics, quality, customer service, reliability of delivery and the overall attractiveness of our offering. Advantages or disadvantages in any of these competitive factors may be sufficient to cause customers to consider changing suppliers or to use an alternative form of packaging. In some instances, we also face the threat of vertical integration by our customers into the manufacture of their own packaging materials.

Our principal competitors in glass packaging include Anchor Glass and O-I Glass in North America, O-I Glass, Verallia and Vidrala in Europe, and iSanti Glass in South Africa. Additionally, we face competition from firms that carry out specific export operations at low prices when their domestic markets are at overcapacity, or when foreign exchange rates or economic conditions (particularly transport costs) allow this, such as has been seen with the importation of glass containers into the United States from lower cost countries. Despite the generally regional nature of glass packaging markets, these export operations could have a material negative impact on our business, financial condition and results of operations.

In addition to competing with other large, well-established manufacturers in the glass packaging industry, we also compete with manufacturers of other forms of rigid packaging, principally plastic packaging and aluminum cans, on the basis of quality, price, service and consumer preference. We also compete with manufacturers of non-rigid packaging alternatives, including flexible pouches and aseptic cartons, particularly in serving the packaging needs of non-alcoholic beverage customers, including juice customers and food customers. We believe that the use of glass packaging for alcoholic and non-alcoholic beverages is subject to consumer taste. In addition, the association of glass packaging with premium items in certain product categories exposes glass packaging to economic variations. Therefore, if economic conditions are poor, we believe that consumers may be less likely to prefer glass packaging over other forms of packaging. We cannot ensure that our products will continue to be preferred by end consumers and that consumer preference will not

shift from glass packaging to alternative packaging. A material shift in consumer preference away from glass packaging, or competitive pressures from our various competitors, could result in a decline in sales volume, or pricing pressure, that would have a material adverse effect on our business, financial condition and results of operations. Furthermore, new threats from container and production innovations in all forms of packaging could disadvantage our existing business. If we are unable to respond to competitive technological advances, our future performance could be materially adversely affected.

Certain of our customers meet some of their metal packaging and glass packaging requirements through self-manufacturing, which reduces their external purchases of packaging. For example, AB InBev manufactures metal packaging through its associate, Metal Container Corporation in North America, as well as directly in Brazil. In glass packaging, companies which satisfy some of their requirements through self-manufacture include AB InBev and Gallo, which manufacture glass packaging in the United States, and AB InBev and Constellation Brands, which produce glass packaging in Mexico. The potential of further vertical integration of our customers could introduce new production capacity in the market, which may create an imbalance between metal packaging and glass packaging supply and demand and could have a material adverse effect on our future performance.

An increase in metal beverage can or glass container manufacturing capacity, including that of our competitors, without a corresponding increase in demand for metal beverage can packaging or glass packaging could cause prices to decline or result in the curtailment or closure of our operations, which could have a material adverse effect on our business.

The profitability of metal packaging or glass packaging companies is heavily influenced by the supply of, and demand for, metal or glass packaging. We and all our major competitors, have recently undertaken or are currently undertaking significant metal beverage can capacity expansions in the United States, Europe and Brazil. Such expansions are long-term in nature and may produce excess supply conditions in the market upon completion. If metal beverage can or glass container manufacturing capacity continues to increase and there is no corresponding increase in demand, the prices we receive for our products could decline or result in the curtailment or closure of certain of our operations, which could have a material adverse effect on our business, financial condition and results of operations.

We cannot assure you that metal beverage can or glass container manufacturing capacity in any of our markets, including the capacity of our competitors, will not increase further in the future, nor can we assure you that demand for metal beverage packaging or glass packaging will continue to meet or exceed supply. For example, energy shortages and elevated energy prices, particularly in Europe due to the Russia-Ukraine war, could cause our customers to suffer from production stoppages, which could reduce the demand for metal beverage cans or glass containers.

As our customers are concentrated, our business could be materially adversely affected if we were unable to maintain relationships with our largest customers.

For the year ended December 31, 2022, Ardagh Metal Packaging's and Ardagh Glass Packaging's ten largest customers accounted for approximately 57% and 42% of its revenues, respectively. Our ten largest customers accounted for approximately 34% of our revenues for the year ended December 31, 2022. While we believe that we have good relationships with these customers, there can be no assurance that we will be able to maintain these relationships. Over 80% of our revenue for the year ended December 31, 2022 was backed by multi-year supply agreements, ranging from two to seven years in duration. Although these arrangements have provided, and we expect they will continue to provide, the basis for long-term partnerships with our customers, there can be no assurance that our customers will not cease to purchase our products. These arrangements, unless they are renewed, expire in accordance with their respective terms and may be terminated under certain circumstances, such as our failure to meet quality, volume or other contractual commitments. In addition, if our customers unexpectedly reduce the amount of glass packaging and/or metal packaging they purchase from us, cease purchasing our glass packaging and/or metal packaging altogether, or if there are any changes in their strategic choices, such as whether to prioritize price or volume requirements, our revenues could decrease and our inventory levels could increase, both of which could have a material adverse effect on our business, financial condition and results of operations.

In addition, there can be no assurance that such arrangements will be renewed upon their expiration or that the terms of any renewal will be as favorable to us as the terms of the current arrangements, and there is also the risk that our customers may shift their filling operations to locations in which we do not operate. The loss of one or more of these

customers, a significant reduction in sales to these customers, or a significant change in the commercial terms of our relationships with these customers could have a material adverse effect on our business.

Further consolidation of our customer base may intensify pricing pressures or result in the loss of customers, either of which could have a material adverse effect on our business, financial condition and results of operations.

Some of our largest customers have previously acquired companies with similar or complementary product lines, for example, in 2015 Kraft Foods Group merged with H.J. Heinz Holding Corporation, in 2016 AB InBev acquired SABMiller, and in 2017 Heineken acquired Brasil Kirin. Such consolidation resulted in an increase in the concentration of our sales with our largest customers and if similar consolidations should occur in the future, it could potentially be accompanied by pressure for lower prices. Increased pricing pressures from these customers may have a material adverse effect on our business, financial condition and results of operations. In addition, any consolidation of our customers may lead to their reliance on a reduced number of suppliers. If, following the combination of one of our customers with another company, a competitor was to be the main supplier to the newly consolidated company, this could have a material adverse effect on our business, financial condition or results of operations.

Demand for our products is seasonable. Unseasonable weather conditions, including as a result of climate change, could lead to unpredictability of demand and materially adversely affect our business.

Demand for Ardagh Metal Packaging's and Ardagh Glass Packaging's products is seasonal. Demand for our metal packaging products is strongest during spring and summer, which means that Ardagh Metal Packaging's sales in North America and Europe are, typically, based on historical trends, greater in the second and third quarters of the year and generally lower sales in the first and fourth quarters. In Brazil and South Africa, sales are typically strongest in the first and fourth quarters and generally lower in the second and third quarters. However demand for our products during the quarters with historically greater sales could be reduced if there is unseasonably cool weather in any of these regions.

Demand for our glass packaging products is typically, based on historical trends, strongest during the summer months and in the period prior to the holidays in December because of the seasonal nature of the consumption of beer and other beverages. Unseasonably cool weather during the summer months can reduce demand for certain beverages packaged in our glass packaging. Similarly, weather conditions can reduce crop yields and adversely affect customer demand for glass packaging for fruit and vegetable end-use categories, which could have a material adverse effect on our business, financial condition and results of operations.

We generally schedule shutdowns of our furnaces for rebuilding and repairs of machinery in the first quarter in Europe, around year-end and the first quarter in North America, and around the end of the second quarter and beginning of the third quarter in Africa. If demand for glass packaging should unexpectedly rise during such a shutdown, we would not have the ability to fulfill such demand and may lose potential revenues. These shutdowns and seasonal sales patterns could have a material adverse effect on profitability during the first quarter.

Unseasonal weather could become a more frequent occurrence as a result of climate change, which could have an adverse effect on demand for our products. Conversely, climate change and the increasing frequency of extreme weather events could also increase demand for our products, such as during a prolonged heat wave in the spring or summer months or an unseasonably hot period during the fall or winter months. The occurrence of any such events leading to unpredictability of demand could have a material adverse effect on our business, financial condition or results of operations. See "—*Climate change may adversely affect our ability to conduct our business, including the availability and cost of resources required for our production processes*" for a more detailed discussion of the ability of extreme weather events to adversely impact our business.

Our profitability could be adversely affected by the availability and increase in the costs of raw and other input materials, including as a result of changes in tariffs and duties.

The raw materials that we use have historically been available in adequate quantities from multiple sources of supply. For certain raw materials, however, there may be temporary shortages due to transportation, production delays impacting supplier plant output, pandemic outbreaks, including COVID-19, or other factors. In such an event, no assurance can be given that we would be able to secure our raw materials from sources other than our current suppliers on terms as favorable as our current terms, or at all. Any such shortages, as well as significant increases in the cost of any of the principal raw materials that we use, including such shortages or material increases resulting from the introduction of tariffs,

such as the introduction of tariffs of 10% on aluminum imports into the United States in 2018, which remain in effect, could have a material adverse effect on our business, financial condition and results of operations. Further tariffs, sanctions, duties, other trade actions or increases in our transportation costs, could have a material adverse effect on our business, financial condition and results of operations. Furthermore, the relative price of oil and its by-products may impact our business, by affecting transport, coatings, lacquer and ink costs. Additionally, certain energy sources are vital to our operations, and future increases in energy costs could result in a significant increase in our operating costs, which could, if we are not able to recover these costs, have a material adverse effect on our business, financial condition and results of operations.

Ardagh Metal Packaging

We use various raw and other input materials, such as aluminum, as well as materials derived from oil for Ardagh Metal Packaging's production. The availability of various raw and other input materials and their prices depend on global and local supply and demand forces, governmental regulations, level of production, resource availability, transportation and other factors, which could result in temporary shortages due to transportation disruptions, production delays impacting supplier production facility output, pandemic outbreaks, including the COVID-19 pandemic, or other factors. See "—*Pandemics or disease outbreaks, such as the COVID-19 pandemic, as well as governmental mandates and restrictions attributable thereto, have had, and may continue to have an adverse impact on worldwide economic activity and our business*" for more detail on the impact COVID-19 has had on our raw material supply chain. No assurance can be given that we would be able to secure our raw and other input materials from sources other than our current suppliers on terms as favorable as our current terms, or at all. The cost of any of the principal raw or input materials that we use may also significantly increase as a result of the introduction of tariffs of 10% on aluminum imports into the United States since 2018, which remain in effect, any other tariff increases, sanctions, duties, other trade actions or increases in our transportation costs. Any such shortage or increase in cost could have a material adverse effect on our business, financial condition and results of operations.

The primary raw material that Ardagh Metal Packaging uses is aluminum ingot, which is in turn rolled into can body and can end stock by our suppliers for use in our production process. Our business is exposed to both the availability of aluminum and the volatility of aluminum prices, including associated premia. Aluminum ingot is traded daily as a commodity on the London Metal Exchange, which has historically been subject to significant price volatility. Because aluminum is priced in U.S. dollars, fluctuations in the U.S. dollar/euro rate also affect the euro cost of aluminum ingot. See "—*Currency, interest rate and commodity price fluctuations may have a material impact on our business*" for a detailed description on the currency risks associated with the price volatility of aluminum. While in the past sufficient quantities of aluminum have been generally available for purchase, these quantities may not be available in the future, and, even if available, we may not be able to continue to purchase them at current prices. In addition, any increase in the level of investment in metal beverage can capacity expansion by us and our competitors will require a significant increase in can sheet production by the aluminum suppliers, which will in turn require them to make significant investment and capital expenditures. Failure by the suppliers to increase capacity could cause supply shortages and significant increases in the cost of aluminum.

While raw materials are generally available from a range of suppliers, they are subject to fluctuations in price and availability based on a number of factors, including general economic conditions, commodity price fluctuations (such as with respect to aluminum on the London Metal Exchange), the demand by other industries, such as automotive, aerospace and construction, for the same raw materials and the availability of complementary and substitute materials. Furthermore, adverse economic or financial changes, industrial disputes, pandemic-related or energy-related supply disruptions could impact our suppliers, thereby causing supply shortages or increasing costs for our business. Our raw materials suppliers also operate in relatively concentrated industries, and this concentration can impact raw material costs. Over the last ten years, the number of major aluminum and steel suppliers has decreased and there is a possibility of further consolidation. Further consolidation could hinder our ability to obtain adequate supplies of these raw materials and could lead to higher prices for aluminum and steel. In addition, the relative price of oil and its by-products could also impact our business, by affecting other input materials costs, such as coatings, lacquer and ink. Accordingly, the ongoing Russia-Ukraine war and the related economic sanctions could have a material adverse effect on our operating costs, and in turn, our business, financial condition and results of operations. See "—*Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*" for more details.

Ardagh Glass Packaging

Ardagh Glass Packaging consumes significant amounts of raw materials in the manufacturing process, in particular, silica sand, limestone and soda ash (natural or synthetic). Cullet is also a key raw material that is used in varying percentages, depending on the type of glass manufactured and the availability of cullet in a particular market. The combination of higher energy prices and a tight supply market has resulted in a historic increase in price for soda ash. Further increases in demand without a corresponding increase in supply may put pressure not only on soda ash, but also on some other raw materials. The price, quality and availability of cullet varies widely from one region to another and is dependent on a number of factors, including glass collection and its effectiveness and the distance of our production sites to population centers where the waste glass is collected and processed. The demand for secondary materials in general is increasing due to more and more ambitious CO_2 legislation and customers, consumers and legislators seeking higher levels of recycled content to meet consumer aspirations and therefore cullet is becoming more scarce. Any significant increase in the price of the raw materials we use to manufacture glass could have a material negative impact on our business, financial condition and results of operations.

Although a significant number of our sales contracts with customers include provisions enabling us to pass-through increases and reductions in certain input costs, such as aluminum and coatings, we may not be able to pass on all or substantially all raw material and other input price increases or increase our prices to offset increases in raw and other input material costs without suffering reductions in unit volume, revenue and operating income. The perceived certainty of supply at our competitors may also put us at a competitive disadvantage regarding pricing and product volumes. In addition, we may not be able to hedge successfully against raw material cost increases. See "—*Currency, interest rate and commodity price fluctuations may have a material impact on our business*" for a more detailed description on hedging risks associated with commodity prices. Any of the above factors could have a material adverse effect on our business, financial condition and results of operations.

We are dependent on a reliable and affordable supply of energy, and any shortage of energy supplies to our production facilities or increased energy prices could have a material adverse effect on our business.

We require access to reliable sources of affordable energy as certain energy sources are vital to our operations, such as natural gas, electrical power, oil, oxygen and in limited circumstances, liquified petroleum gas. Energy sources are vital to our operations and we rely on a continuous power supply to effectively conduct our business. The Russia-Ukraine war and the related sanctions have led to a significant increase in our energy and other input costs, as well as limited availability of energy and there may be further adverse impacts on energy supplies and prices, particularly in Europe, as a result of uncertainty with regard to Russia's production and export of oil and gas.

See "—*Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*" for more details.

In the event of energy shortages or government measures rationing energy supplies to our industry in Europe or Africa, it is possible that we will be unable to meet our energy needs. See "—*We have operations in emerging and other less developed markets, which are subject to greater risks than developed markets and could adversely affect our business*" for a discussion of the energy market in South Africa. This could lead to production stoppages, shutdowns, a decline in output, and decreased sales. In the event of a prolonged shortfall of adequate energy supplies, we could experience financial distress. In addition, any future increases or fluctuations in energy costs could result in a significant increase in our operating costs, and if we are not able to recover these costs from our customers, or through fixed-price procurement contracts, index tracking procurement contracts and hedging there could be a material adverse effect on our business, financial condition and results of operations.

Currency, interest rate and commodity price fluctuations may have a material impact on our business.

Our functional currency is the euro and we present our financial information in U.S. dollars. Insofar as possible, we actively manage currency exposures through the deployment of assets and liabilities throughout the Group and, when necessary and economically justified, enter into currency hedging arrangements to manage our exposure to currency fluctuations by hedging against rate changes with respect to the euro. However, we may not be successful in limiting such

exposure, which could materially adversely affect our business, financial condition and results of operations. In addition, our presented results may be impacted because of fluctuations in the U.S. dollar exchange rate versus the euro.

We have production facilities in 16 different countries worldwide and sell products to, and obtain raw materials from, entities located in these and different regions and countries globally. As a result, a significant portion of our consolidated revenue, costs, assets and liabilities are denominated in currencies other than the euro, in particular the U.S. dollar, the British pound, the Brazilian real, Swedish krona, Danish krone, Polish zloty and South African rand. For the year ended December 31, 2022, 75% of our revenues were from countries with currencies other than the euro. The exchange rates between the currencies which we are exposed to, such as the euro, the U.S. dollar and the British pound, have fluctuated significantly in the past and may continue to do so in the future, which could have a material adverse effect on our results of operations. Volatility in exchange rates could increase the costs of our products that we may not be able to pass on to our customers, impair the purchasing power of our customers in different markets, result in significant competitive benefit to certain of our competitors that incur a material part of their costs in different currencies than we do, hamper our pricing, increase our hedging costs and limit our ability to hedge our exchange rate exposure. Furthermore, we are exposed to currency transaction risks, where changes in exchange rates affect our ability to purchase equipment and raw materials and sell products at profitable prices, reduce the value of our assets and revenues, and increase liabilities and costs.

We are also subject to commodity price risk, mainly as a result of fluctuations in the price and availability of raw materials and energy, such as aluminum, natural gas and electricity. Aluminum has historically been subject to significant price volatility and, as aluminum is priced in U.S. dollars, fluctuations in the U.S. dollar/euro rate also affect the euro cost of aluminum. Where we are unable to pass-through increases in certain input costs to our customers, we operate hedging programs to manage the price and foreign currency risk on our aluminum purchases, but increased prices for aluminum could affect customer demand. See "*—Our profitability could be adversely affected by the availability and increase in the cost of raw materials, including as a result of changes in tariffs and duties*" for more information on the availability and cost of aluminum. We are also exposed to interest rate risk, where fluctuations in interest rates may affect our interest expense on existing debt and the cost of new financing. While we occasionally use cross currency interest rate swaps to manage this type of risk, sustained increases in interest rates could nevertheless materially adversely affect our business, financial condition and results of operations. See "*—Risks Relating to Our capital structure—Our substantial debt could adversely affect our financial health and our ability to effectively manage and grow our business*" for a further discussion on how increases in interest rates could affect our ability to service our indebtedness.

To counteract the effects of the aforementioned risks, we engage in certain hedging strategies. Our policy is, where practical, to match net investments in foreign currencies with borrowings and swaps in the same currency. We use derivative agreements to manage some of the material commodity cost risk. For example, as a result of the volatility of natural gas and electricity prices, we have developed an active hedging strategy to fix a significant proportion of our energy costs through contractual arrangements directly with our suppliers. Our policy is to purchase natural gas and electricity by entering into forward price-fixing arrangements with suppliers for the majority of our anticipated requirements for the year ahead. Such contracts are used exclusively to obtain delivery of our anticipated energy supplies. We do not net settle, nor do we sell within a short period of time after taking delivery. We avail ourselves of the own use exemption and, therefore, these contracts are treated as executory contracts. We typically build up these contractual positions in tranches of approximately 10% of the anticipated volumes, and also hedge portions of our gas, electricity and diesel price risk by entering into derivatives with banks where it is deemed favorable to hedging with suppliers. Any gas, electricity and diesel that is not purchased under forward fixed price arrangements or hedged with banks is purchased under index tracking contracts or at spot prices.

However, there can be no assurance that our strategies will prove effective, given that there are certain circumstances that are beyond our control, such as for example increased market volatility as a result of the ongoing Russia-Ukraine war. See "*—Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*" for further details. Our costs could be adversely impacted to the extent we are unable to manage the effects of the aforementioned risks effectively. For a further discussion of these matters and the measures we have taken to seek to protect our business against these risks, see "*Operating and Financial Review*."

Any interruption in the operations of our production facilities may adversely affect our business.

All of our manufacturing activities take place at production facilities that we own or lease under long-term leases. Our manufacturing processes include cutting, coating and shaping metal into containers, as well as heating raw materials to extremely high temperatures to make glass, which we then form into glass containers. These processes, which are conducted at high speeds and involve operating heavy machinery and equipment, entail risks and hazards, including industrial accidents, leaks and ruptures, explosions, fires, mechanical failures and environmental hazards, such as spills, storage tank leaks, discharges or releases of hot glass or toxic or hazardous substances and gases. Furthermore, certain of our production facilities are located in geographically vulnerable areas, including in some parts of the United States, and the risk of the occurrence of these hazards are exacerbated by the increasing frequency of extreme weather and natural disasters, such as earthquakes, hurricanes, floods and wildfires. These hazards may cause unplanned business interruptions, unscheduled downtime, transportation interruptions, personal injury and loss of life, severe damage to or the destruction of property and equipment, environmental contamination and other environmental damage, civil, criminal and administrative sanctions and liabilities, and third-party claims, which may have a material adverse effect on our business, financial condition and results of operations.

In addition, it may be increasingly difficult to obtain, renew or maintain permits and authorizations issued by governmental authorities necessary to operate our production facilities, due to the increasing urbanization of the sites where some of them are located. Urbanization could lead to more stringent operating conditions for obtaining or renewing the necessary authorizations, the refusal to grant or renew these authorizations, or expropriations of these sites for urban planning projects, any of which could result in the incurrence of significant costs, with no assurance of partial or full compensation from the governmental authorities.

Even though we conduct regular maintenance on our operating equipment, due to the extreme operating conditions inherent in some of our manufacturing processes, we cannot assure you that we will not incur unplanned business interruptions due to furnace or other equipment breakdowns, or similar manufacturing problems. We could also experience disruption to our IT systems and other automated manufacturing processes, including through cyber security attacks, which could halt or severely reduce production. See *"—Our heavy reliance on technology and automated systems to operate our business could mean that any significant failure or disruption of these systems, including as a result of cyber security attacks, could have a material adverse effect on our business and reputation*" for a further discussion on the impact of a cyber security attack on our business. There can be no assurance that alternative production capacity would be readily available in the event of an interruption.

If any of the aforementioned failures or disruptions affect any of our major operating lines or facilities, it may result in a disruption of our ability to supply customers and a consequent loss of revenues. The potential impact of any disruption would depend on the nature and extent of the damage caused to such facility. For example, the metal packaging industry's business model typically involves a metal beverage can-ends production facility supplying multiple metal beverage can production facilities. A failure or disruption in an ends production facility could therefore impact our ability to supply multiple customers with ends and any inability to source ends from another location could result in a material loss of sales.

To the extent that we experience production disruptions as a result of any aforementioned factors, we may also be required to make unplanned capital expenditures even though we may not have available resources at such time, which would result in significant costs and expenses. As a result, our liquidity may be adversely affected, which could have a material adverse effect on our business, financial condition and results of operations.

Our glass packaging business requires relatively high levels of maintenance capital expenditures, which we may be unable to fund.

Our glass packaging business requires relatively high levels of maintenance capital expenditures. We may not be able to make such capital expenditures if we do not generate sufficient cash flow from operations, or if we do not have funds available for borrowing under our existing credit facilities to cover these capital expenditure requirements or if we were restricted from incurring additional debt to cover such expenditures or as a result of a combination of these factors. See "*—Risks Relating to Our Capital Structure— We may not be able to raise additional capital or only be able to raise additional capital at significantly increased costs*" for more detail. If we are unable to meet our capital expenditure plans, we may not be able to maintain our manufacturing capacity, which may negatively impact our competitive position and

ultimately, our revenues and profitability. If we are unable to meet our maintenance capital expenditures, our manufacturing capacity may decrease, which may have a material adverse effect on our business, financial condition and results of operations.

We are reliant on the performance of our suppliers, who may not be able to meet our demands due to supply chain disruption.

We are reliant on our suppliers for the timely delivery of raw materials, such as aluminum for the production of our metal beverage cans and cullet and soda ash for the production of our glass containers. We also engage third parties for the supply of various services, including, among others, logistics services for the transport of our metal beverage cans and glass containers, and IT services. If one or more of our suppliers is unable or unwilling to fulfil delivery obligations, for example due to shortages of necessary raw materials, elevated energy prices or energy shortages, external conflicts, labor shortages or strikes, capacity allocation to other customers, financial distress, insolvency, government regulations, currency rate fluctuations, natural disasters and adverse weather conditions that are exacerbated by climate change, or other unforeseen circumstances, we could be at risk of production downtime, inventory backlogs and delays in deliveries to customers. The risk of financial distress for our suppliers could become more acute if energy prices continue to increase or remain elevated, or if energy supplies are threatened. As a result, we may need to bear increased costs for such services or to find alternative providers, which may not be available on comparable terms, or at all. In addition, such suppliers could provide services that do not meet our requirements or fail to provide services in a timely manner, which could cause us to experience disruptions, delays, or product quality issues. If any of the foregoing risks were to materialize, it could have a material adverse effect on our business, financial condition and results of operations.

We may not be able to integrate any future acquisitions effectively.

We aim, over the longer term, to continue expanding our packaging activities. This strategy may in the future require us to capitalize on strategic opportunities including the acquisition of existing businesses. If we were to acquire any existing businesses, there is no certainty that any acquired business will be effectively integrated. If we cannot successfully integrate acquired businesses within a reasonable time frame, we may not be able to realize the cost savings, synergies and revenue enhancements that we anticipate either in the anticipated amount or time frame, and the costs of achieving these benefits may be higher than, and the timing may differ from, what we expected. Our ability to realize anticipated cost savings and synergies may be affected by a number of factors, including the use of more cash or other financial resources on integration and implementation activities than we expect, such as restructuring and other exit costs, unanticipated conditions imposed in connection with obtaining required regulatory approvals, and increases in expected acquisition costs and expenses, which may offset the cost savings and other synergies realized from such acquisitions. To the extent we pursue an acquisition that causes us to incur unexpected costs or that fails to generate expected returns, or fail to successfully integrate such businesses, the diversion of management attention and other resources from our existing operations could have a material adverse effect on our business, financial condition and results of operations.

A significant write down of goodwill could have a material adverse effect on our financial condition and results of operations.

Our goodwill as of December 31, 2022 was $1.4 billion. We evaluate goodwill annually following approval of our annual budget or whenever indicators suggest that impairment may have occurred. The determination of the recoverable amounts of goodwill requires the use of estimates and assumptions which are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The resulting accounting estimates will, by definition, seldom equal the related actual results.

As described further in Note 8 of the audited consolidated financial statements included in this annual report, we recognized an impairment charge of $244 million (before the impact of deferred tax) on goodwill allocated to Ardagh Glass Packaging North America in the year ended December 31, 2022. If a significant future write down is required, the charge could have a material adverse effect on our financial condition and results of operations.

Our investment in Trivium is accounted for as a joint venture using the equity method, which may result in a reduction in the accounting carrying value of the Group's investment should Trivium incur post-tax losses.

We hold approximately 42% of the ordinary shares of Trivium. As we jointly control both the financial and operating policy decisions of Trivium, this investment is accounted for as a joint venture under the equity method. The carrying amount of our interest under the equity method, which at December 31, 2022 totaled $0.3 billion, will change as a result of the requirements of the equity method. The equity method results in us accounting for our share of the post-tax profit or loss and share of the other comprehensive income of Trivium. As Trivium has a substantial amount of debt and significant debt service obligations, and may incur post tax and other comprehensive losses, the accounting carrying value of our interest may reduce as a result of the application of equity accounting.

We have potential indemnification obligations relating to divestments.

We have previously divested a number of businesses, including, in 2019, the divestment of our Food & Specialty metal packaging business. Pursuant to these agreements, we may be required to provide indemnification to the acquirers for damages resulting from a breach of any representation, warranty or covenants contained therein. To the extent that we are required to make any significant payments under these indemnification provisions, these payments could adversely impact our business, financial condition and results of operations.

Our heavy reliance on technology and automated systems to operate our business could mean that any significant failure or disruption of these systems, including as a result of cyber security attacks, could have a material adverse effect on our business and reputation.

We depend on automated systems and technology to operate our business, including manufacturing, accounting, telecommunication and information technology systems. There can be no assurance that these systems will not fail or suffer from substantial or repeated disruptions due to various events, some of which are beyond our control, such as natural disasters, power failures, terrorist attacks, equipment or software failures, user errors or computer viruses. Any such disruptions could severely interrupt the operation of our production facilities for an extended period of time, which could have an adverse effect on the supply of our products and result in a material adverse effect on our business, financial condition and results of operations.

Increased global cyber security threats and more sophisticated and targeted computer crime also pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data, as well as those of our business partners. As the cyber-threat landscape evolves, these attacks are growing in frequency, sophistication and intensity, and due to the nature of some of these attacks, there is also a risk that they may remain undetected for a period of time. We have previously been the target of cyber-attacks and expect such attempts to continue. In 2021 we experienced a cyber security incident, the response to which included temporarily shutting down certain IT systems and applications. While we have since established a cyber transformation program, there can be no assurance that it will protect us from such threats and prevent disruptions or breaches to our or our third-party providers' databases or systems that could materially adversely affect our business.

Substantial or repeated systems failures or disruptions, including as a result of not effectively remediating system failures, cyber security incidents and other disruptions could result in the unauthorized release of confidential or otherwise protected information, improper use of our systems and networks, defective products, harm to individuals or property, contractual or regulatory actions and fines, penalties and potential liabilities, production downtime and operational disruptions and loss or compromise of important or sensitive data. For example, the loss, disclosure, misappropriation of or access to our employees' or business partners' information or our failure to meet increasing data privacy and security obligations could result in lost revenue, increased costs, legal claims or proceedings, liability or regulatory penalties, including, for instance, under the EU General Data Protection Regulation or the California Consumer Privacy Act. Any of the aforementioned risks could result in increased costs, lost revenue, reputational harm and decreased competitiveness, which could materially adversely affect our business, financial condition and results of operations, and increased global cyber security threats and more sophisticated and targeted computer crime may further increase this risk.

Climate change may adversely affect our ability to conduct our business, including the availability and cost of resources required for our production processes.

There continues to be a growing concern that carbon dioxide and other greenhouse gases ("GHG") in the atmosphere may have an adverse impact on global temperatures, weather and precipitation patterns and the frequency and severity of extreme weather conditions and natural disasters. The impact of climate change presents immediate and long-term risks of loss arising from climate change, to us and the markets in which we operate, which are expected to increase over time. Climate risks consist of physical risks and transition risks, either of which may materially adversely affect our ability to conduct our business. Our operations could be exposed to physical risks resulting from chronic and acute climate change and extreme weather-related events, such as increased storms, drought, fires, hurricanes, tornadoes or floods, which may directly damage our physical assets (such as facilities and materials) or otherwise impact their value or productivity, cause raw material shortages (including energy supply) and supply chain disruptions (including delivery) and increase production cost and health and safety risks, among other risks. See "*—Any interruption in the operations of our production facilities may adversely affect our business*" for a further discussion on the impact such damage to our physical assets could have on our business. In addition, unseasonal extreme weather can reduce demand for certain beverages, or can adversely impact fruit and vegetable crop harvests and, as a result, our products. See "*—Demand for our products is seasonal. Unseasonable weather conditions, including as a result of climate change, could lead to unpredictability of demand and adversely affect our business*" for a more detailed discussion on the impact of unseasonable weather on demand for our products. We are not able to accurately predict the materiality of any potential losses or costs associated with the effects of climate change, and the impact of climate change may also vary by geographic location and other circumstances, including weather patterns.

We could also be exposed to transition risks resulting from changes in policy, technology and market preference to address climate change, such as carbon pricing policies, including increased prices for certain fuels, including natural gas and the introduction of a carbon tax, and power generation shifts from fossil fuels to renewable energy, which may lead to changes in the value of assets. In addition, measures to address climate change through laws and regulations, for example by requiring reductions in emissions of GHGs or introducing compliance schemes, could create economic risks and uncertainties for our businesses, by increasing GHG-related costs, such as the cost of abatement equipment to reduce emissions to comply with legal requirements on GHG emissions or required technological standards, or reducing demand for our products, any of which could have a material adverse effect on our business, financial condition and results of operations. See "*—We are subject to various environmental and other legal requirements and may be subject to additional requirements that could impose substantial costs upon us*" for a more detailed discussion on the risks to our business associated with the introduction of new laws and regulations by governments to combat climate change. In 2022, we received approval from the Science Based Targets initiative ("SBTi") for our GHG emission reduction targets to reduce scope 1 and 2 GHG emissions by 42% and to reduce absolute scope 3 GHG emissions by 12.3% by 2030. Our glass production process generates significant CO_2 emissions, while the vast majority of our scope 3 GHG emissions arise in the various stages of the manufacturing of the aluminum and steel coils that we purchase to produce our products, which depend on various factors that are difficult to predict and outside our control. Our ability to meet our sustainability targets also depends on market or competitive conditions that are outside our control, as well as expectations and assumptions that are necessarily uncertain. Failure to meet our SBTi targets and reduce our emissions, or failure to meet any of our other sustainability targets, could result in increased costs for us in the form of carbon taxes, and could have a material adverse effect our reputation, customer and investor relationships, or ability to access capital on favorable terms, particularly given investors' increasing focus on ESG matters.

We are subject to various environmental and other legal requirements and may be subject to additional requirements that could impose substantial costs on us.

Our operations and properties are subject to extensive laws, ordinances, regulations and other legal requirements relating to the protection of people and the environment. The laws and regulations which may affect our operations include requirements regarding remediation of contaminated soil, groundwater and buildings, water supply and use, natural resources, water discharges, air emissions, waste management, noise pollution, asbestos and other deleterious materials, the generation, storage, handling, transportation and disposal of regulated materials, product safety, food safety, workplace health and safety and diversity and inclusion. See "*—We are subject to an extensive, complex and evolving legal and regulatory framework and changes in laws and government regulations and their enforcement may have a material impact on our operations*" for a discussion of the product and food safety regulations that are applicable to us and "*—Any interruption in the operations of our production facilities may adversely affect our business*" for a discussion of the risks

related to workplace health and safety. These laws and regulations are also subject to constant review by lawmakers and regulators which may result in further, including more stringent, environmental or health and safety legal requirements.

We have incurred, and expect to continue to incur, costs to comply with such legal requirements, and these costs may increase in the future. Demands for more stringent pollution control devices could also result in the need for further capital upgrades to our furnaces and production facilities. For example, under the EU Industrial Emissions Directive (Directive 2010/75/EU) ("EU IED"), permitted pollutant emissions levels from our production facilities are substantially reduced on a periodic basis. EU member states may continue to introduce lower permitted pollutant emissions levels into national legislation and impose stricter limits in the future. California has implemented a similar program, which results in the need for us to incur potentially significant compliance costs, including for the purchase of offsets against our GHG emissions. There are also some municipalities exploring further regulation to reduce or in some cases eliminate natural gas usage. Additional pollutant or GHG emissions control schemes may be introduced in any jurisdiction on a national and/or local level, which may require additional measures. Further, in order to comply with air emission restrictions, significant capital investments may be necessary at some sites.

We also require a variety of permits to conduct our operations, including operating permits such as those required under various U.S. laws, including the federal Clean Air Act, and the EU IED water and trade effluent discharge permits, water abstraction permits and waste permits. We are in the process of applying for, or renewing, permits at a number of our sites. Failure to obtain and maintain the relevant permits, as well as non-compliance with such permits, could result in criminal, civil and administrative sanctions and liabilities, including substantial fines and orders, or a partial or total shutdown of our operations, as well as litigation, any of which could have a material adverse effect on our business, financial condition and results of operations. For example, in 2017 we settled alleged violations of hazardous waste regulations governing the reuse of electrostatic precipitator dust at our Madera plant in the United States, which occurred in the period prior to the acquisition in 2014 of Verallia North America ("VNA"). We cannot assure you that our reuse of electrostatic precipitator dust at our other glass production facilities will not result in regulatory inquiries or enforcement relating to compliance with hazardous waste regulations. We have also, in the past, received notices of violation from the U.S. Environmental Protection Agency (the "EPA") for alleged violations under the Clean Air Act's Prevention of Significant Deterioration, New Source Performance Standards and Title V provisions stemming from past furnace-related projects at other glass production facilities unrelated to our acquisition of VNA, including furnace-related projects conducted by third parties who owned the production facilities before us. The EPA has sent information requests to a number of our glass manufacturing facilities concerning furnace-related projects, as well as our air pollutant emissions more generally, which could culminate in notices of violation or other enforcement

In order to comply with air emission restrictions, significant capital investments may be necessary at some sites. For example, in 2010, prior to our acquisition of VNA, VNA and the EPA signed a global consent decree pursuant to which VNA has made investments to replace or install new electrostatic precipitators estimated at up to an aggregate of $112 million over a ten-year period, excluding operating costs of the systems installed.

Furthermore, changes to the laws and regulations governing the materials that are used in our production facilities may impact the price of such materials or result in such materials no longer being available. For example, the European Union Registration, Evaluation, Authorization and Restriction of Chemicals ("REACH") regulations impose stringent obligations on the manufacturers, importers and users of chemical substances. Certain substances that we use in our manufacturing process may be required to be removed from the market under REACH's authorization and restriction provisions or substituted for alternative substances. Any of the foregoing could adversely impact our operations and result in a material adverse effect on our business, financial condition and results of operations.

In addition, our sites often have a long history of industrial activities and may be, or have been in the past, engaged in activities involving the use of materials and processes that could give rise to contamination and result in potential liability to investigate or remediate, as well as claims for alleged damage to persons, property or natural resources. These legal requirements may apply to contamination at sites that we currently or formerly owned, occupied or operated, or that were formerly, owned, occupied or operated by companies we acquired or at sites where we have sent waste to third-party sites for treatment or disposal. There can be no assurance that our due diligence investigations identified or accurately quantified all material environmental matters related to the facilities that we acquired and liability for remediation of any third-party sites may be established without regard to whether the party disposing of the waste was at fault or the disposal activity was legal at the time it was conducted. If we are designated as a potentially responsible party for the clean-up and remediation of any sites, including any "Superfund" sites in the United States, this could impose significant costs on us

and result in reputational damage, which could have a material adverse effect on our business, financial condition and results of operations.

We are subject to extensive, complex and evolving legal and regulatory frameworks and changes in laws and government regulations and their enforcement may have a material impact on our operations.

Our business operates in multiple jurisdictions and is subject to complex legal and regulatory frameworks, including in relation to product requirement, environmental, anti-trust, economic sanctions, anti-corruption and anti-money laundering matters. For a detailed discussion on the various environmental requirements that we are subject to, please see "*—We are subject to various environmental and other legal requirements and may be subject to additional requirements that could impose substantial costs on us*." Laws and regulations in these areas are complex and constantly evolving, and enforcement continues to increase. As a result, we may become subject to increasing limitations on our business activities and risks of fines or other sanctions for non-compliance. Additionally, we may become subject to governmental investigations and lawsuits by private parties. Compliance costs associated with current and proposed laws and potential regulations could be substantial, and any failure or alleged failure to comply with these laws or regulations could lead to litigation or government action, all of which could materially adversely affect our business, financial condition and results of operations.

For example, changes in laws and regulations relating to deposits on, and any limits or restrictions to the recycling of, glass or metal packaging could adversely affect our business if implemented on a large scale in the major markets in which we operate. Additionally, the effectiveness of new standards such as the ones related to recycling or deposits on different packaging materials, could result in excess costs or logistical constraints for some of our customers, who could choose to reduce their consumption and limit the use of glass or metal packaging for their products. We could thus be forced to reduce, suspend or even stop the production of certain types of products. These regulatory changes could also affect our prices, margins, investments and activities, particularly if these changes resulted in significant or structural changes in the market for food packaging that might affect the market shares for glass, the volumes produced or production costs. For example, in the United States, some state regulations set the concentration of certain heavy metals in glass packaging at 100 parts per million ("ppm") and provide for an exception to this rule in the event of additions of recycled packaging. However, this exemption has expired in certain states, and as a result, bottles manufactured from recycled glass that have a heavy metals concentration higher than 100 ppm could be considered non-compliant, which could have an adverse effect on our reputation, business, financial condition and results of operations. We have had regulatory inquiries about our compliance with this regulation, and may face additional inquiries or enforcement in the future.

Changes in laws and regulations imposing restrictions on, and conditions for use of, food and beverage contact materials or on the use of materials and agents in the production of our products could likewise adversely affect our business, such as epoxy-based coatings. Changes in regulatory agency statements, adverse information concerning bisphenol A or rulings made in certain jurisdictions may result in restrictions, for example, on bisphenol A in epoxy-based internal liners for some of our products. Such restrictions have required us, together with our respective suppliers and customers, to develop substitutes for relevant products to meet legal and customer requirements. In addition, changes to health and food safety regulations could increase costs and may also have a material adverse effect on revenues if the public attitude toward end-products, for which we provide packaging, were substantially affected as a result.

Environmental sustainability, food and beverage health and safety, political and ethical concerns could lead government authorities to implement and strictly enforce other regulations that are likely to impose restrictions on us and could have a material adverse effect on our business, financial condition and results of operations. For example, enhanced legal requirements on the reporting, due diligence and restricted use of "conflict minerals" originating from mines in the Democratic Republic of the Congo and adjoining countries as well as heightened regulatory requirements on the bauxite or cassiterite value chain increases reputational and compliance risks along the supply chain and could affect the sourcing, availability and economics of minerals used in the manufacture of metal beverage cans. For example, there may only be a limited pool of suppliers who provide conflict-free materials, and we cannot provide assurance that we will be able to obtain such products in sufficient quantities or at competitive prices. In addition, given the complexity of our supply chains, we may face reputational challenges with our customers if we are unable to sufficiently verify the origins of all materials used in the products that we sell. Furthermore, there is significant variation, among countries where we sell our products, in the limitation on certain constituents in packaging, which can have the effect of restricting the types of raw materials or amount of recycled glass we use. In turn, these restrictions can increase our operating costs by requiring increased energy consumption or greater environmental controls.

We have operations in emerging and other less developed markets, which are subject to greater risks than developed markets and could adversely affect our business.

In April 2022, we completed our acquisition of Consol, which added production facilities located in South Africa, Nigeria, Kenya and Ethiopia to our operations. These markets are located in emerging markets and tend to have less developed economies and infrastructure compared to developed markets. As a result, they are often more vulnerable to economic and geopolitical challenges and may experience significant fluctuations in gross domestic product, interest rates and currency exchange rates, as well as civil conflicts or disturbances, government instability, nationalization and expropriation of private assets and the imposition of taxes or other charges by government authorities. For example, in November 2021, we temporarily shut down our production facility in Ethiopia for three months due to safety and supply chain concerns as a result of the armed conflict between the Ethiopian government and the Tigray People's Liberation Front. In addition, local currencies may be unstable, be subject to significant depreciation, not be freely convertible or be subject to the imposition of other monetary or fiscal controls and restrictions. The occurrence of any of the above factors could have a material adverse effect on our business, financial condition and results of operations.

Successfully managing our operations in Africa is dependent on operational competency in energy management, and the unreliability of grid power and the supply of liquid fuels presents significant challenges to managing our production facilities. The energy sectors of emerging and less developed markets may suffer from numerous problems, such as limited access to infrastructure, low connection rates, inadequate power generation capacity, lack of capital for investment, insufficient transmission and distribution facilities, high technical losses and vandalism. We have had to rely on alternative electricity, liquid fuel and water supplies, and have installed our own back-up systems to ensure a continuous supply of energy to our production facilities, which has added to overall business costs and in certain cases reduced output. In South Africa, the national electricity grid has been under significant pressure over the last decade to meet growing demand given insufficient generation capacity. This has resulted in periodic periods of load shedding, where planned supply interruptions take place and are rotated across South Africa to reduce pressure on the electricity grid. New initiatives have been implemented by the government in a bid to address the nation's failing electricity supply, but despite these initiatives and ongoing investment from the government into power generation and transmission, load shedding may continue to occur in the future, which in turn, may have a material adverse effect on our business, financial condition and results of operations. Furthermore, emerging and less developed markets may also suffer from deteriorating road networks, congested ports and obsolete rail infrastructure, thereby increasing the time it takes to deliver goods, supplies or equipment, which could have a material adverse effect on our business, financial condition and results of operations.

We could incur significant costs in relation to workplace injury and illness claims at our production facilities arising out of our manufacturing processes.

We may face liability claims arising out of our manufacturing processes, including alleged personal injury due to workplace injuries and illness at our production facilities. The type of activities performed by our employees during the manufacturing process carries an increased risk of accidents. There can be no assurance that the health and safety measures and programs we have implemented will prevent accidents occurring or employees contracting illnesses due to prolonged exposure to workplace hazards, such as hazardous substances, noise, vibrations and stress at our production facilities.

As is the case in a number of other industrial processes that deal with high temperatures, asbestos was once present in the glass-making industry, primarily in safety equipment, until measures were taken to substitute this material for other materials made possible through technological advances. Since the 1990s, items made of asbestos have gradually been removed at our sites in Western Europe and the United States. Because of the age of some of our sites, however, asbestos-cement may have been used in construction and may still be present at these sites. When these buildings are modernized or repaired, the cost of upgrades is higher because of the restrictions associated with removing asbestos-containing materials. We are exposed to claims alleging injury or illness associated with asbestos and related compensation over and above the support that may be offered through various existing social security systems in countries where we operate.

Claims associated with our glass manufacturing operations exist and may arise for reasons associated with the work environment unrelated to the presence of asbestos. For example, claims have arisen associated with the acoustic environment generated by forming machines, the use of glass sand in making glass and products likely to contain heavy metals or solvents for decoration. We may also face the risk of work-related health claims owing to materials present or used at our production sites such as silicosis, and, under certain conditions, Legionnaires' disease. The U.S. Occupational

Safety and Health Administration has implemented a requirement that reduced by 50% the permissible exposure limit to crystalline silica and requires engineering controls or personal protective equipment to safeguard employees from such exposure. The European Union has also set stricter exposure limit values for respirable crystalline silica in work processes under the Carcinogens and Mutagens Directive. This substance is a common mineral found in sand, which is a significant raw material component for glass manufacturing and is also contained in refractories, or bricks, used in glass manufacturing operations. Our costs to meet these reduced limits could be substantial, particularly if it becomes necessary for us to implement broad engineering controls across many of our glass manufacturing plants. If an individual successfully brings a claim against us, we may not have adequate insurance to cover such claims or may face increased insurance premiums. See "*—Our existing insurance coverage may be insufficient and future coverage may be difficult or expensive to obtain*" for more details on our insurance coverage. Failure to accurately assess potential risks or assure implementation of effective safety measures may result in increases in the relative frequency or severity of workplace injuries at our production facilities, which may result in increased workers' compensation claims expense. If our employees or customers perceive us having a poor safety record, it could materially impact our ability to attract and retain new employees and our reputation could suffer. Any substantial increase in such liability claims and related reputational harm could have a material adverse effect on our business, financial condition and results of operations.

We may be subject to litigation, arbitration and other proceedings that could have an adverse effect on us.

We are currently involved in various litigation matters, and we anticipate that we will be involved in litigation matters from time to time in the future. The risks inherent in our business expose us to litigation, including personal injury, environmental litigation, contractual litigation with customers and suppliers, intellectual property litigation, tax or securities litigation, and product liability lawsuits. We cannot predict with certainty the outcome or effect of any claim, regulatory investigation, or other litigation matter, or a combination of these. Any such litigation, arbitration or other proceedings, current or future, whether with or without merit, could be expensive and time consuming, and could divert the attention of senior management, and any adverse outcome in these or other proceedings, could harm our reputation and have a material adverse effect on our business, financial condition and results of operations.

Changes in consumer lifestyle, nutritional preferences, health-related concerns and consumer taxation could have a material adverse effect on our business.

Changes in consumer preferences and tastes can have an impact on demand for our customers' products, which in turn can lead to reduced demand for our products. In the United States, for example, the growth in consumption of imported beer and in newer beverage categories such as hard seltzers and ready to drink cocktails has seen reduced demand for domestically-produced mass beer brands, resulting in reduced demand for glass packaging for this end-use category. Certain end-products represent a significant proportion of our packaging market, such as beer. Our ability to develop new product offerings for a diverse group of global customers with differing preferences, while maintaining functionality and spurring innovation, is critical to our success. This requires a thorough understanding of our existing and potential customers and end users on a global basis, particularly in potential high developing markets. Failure to adapt and deliver quality products that meet our customers' or end-users' needs, through research and development or licensing of new technology, ahead of our competitors, could have a material adverse effect on our business, financial condition and results of operations.

In addition, public health and government officials have become increasingly concerned about the health consequences associated with over-consumption of certain types of beverages, such as sugar-sweetened and alcoholic beverages, including those produced by certain of our customers. For example, France and the United Kingdom have introduced taxes on drinks with added sugar and artificial sweeteners that companies produce or import. France has also imposed taxes on energy drinks using certain amounts of taurine and caffeine. As a result of such taxes, demand has decreased in these countries, and the imposition of similar health-related taxes in the future on end-products in other countries may lower the demand for certain soft drinks and alcoholic beverages that our customers produce, which may as a result cause our customers to reduce their purchases of our products. Any decline in the popularity of any end-products due to lifestyle, nutrition or health considerations, or our inability to adapt to customer needs, could have a significant impact on our customers and could have a material adverse effect on our business, financial condition and results of operations.

We face costs and future funding obligations associated with post-retirement benefits provided to employees, which could have a material adverse effect on our financial condition.

As of December 31, 2022, our accumulated post-retirement benefit obligation, net of employee benefit assets, was approximately $334 million, covering our employees in multiple jurisdictions. The costs associated with these and other benefits to employees could have a material adverse effect on our business, financial condition and results of operations.

We operate and contribute to pension and other post-retirement benefit schemes (including both single-employer and multiple-employer schemes) funded by a range of assets that include property, derivatives, equities and/or bonds. The value of these assets is heavily dependent on the performance of markets, which are subject to volatility. The liability structure of the obligations to provide such benefits is also subject to market volatility in relation to its accounting valuation and management. Additional significant funding of our pension and other post-retirement benefit obligations may be required if market underperformance is severe. Furthermore, for certain of our pension schemes in the United States, under the United States Employee Retirement Income Security Act of 1974, as amended, the U.S. Pension Benefit Guaranty Corporation ("PBGC") has the authority to terminate pension plans regulated by the PBGC if certain funding requirements are not met; any such termination would further accelerate the cash obligations related to such a pension plan. In addition, we may have to make significant cash payments to some or all of these plans, including under guarantee agreements, in the future to provide additional funding, which would reduce the cash available for our business.

Organized strikes or work stoppages by unionized employees could have a material adverse effect on our business.

Many of our operating companies are party to collective bargaining agreements with trade unions, which cover the majority of our employees. A prolonged work stoppage or strike at any facility with union employees could have a material adverse effect on our business, financial condition and results of operations. In addition, we cannot ensure that, upon the expiration of our existing collective bargaining agreements, new agreements will be reached without union action or that our operating companies will be able to negotiate acceptable new contracts with trade unions, which could result in strikes by the affected employees and increased operating costs as a result of higher wages or benefits paid to unionized employees. If unionized employees at our operating companies or any unionized employees were to engage in a strike or other work stoppage, we could experience a significant disruption of operations, higher ongoing labor costs and reputational harm, which may have a material adverse effect on our business, financial condition and results of operations.

Failure of our control measures and systems that result in faulty or contaminated products could have a material adverse effect on our business.

We have strict control measures and systems in place to ensure that the maximum safety and quality of our products is maintained. The consequences of a product not meeting these rigorous standards, due to, among other things, accidental or malicious raw materials contamination or due to supply chain contamination caused by human error or equipment fault, could be severe. Such consequences might include adverse effects on consumer health and our reputation, an increase in our litigation exposure and financial costs, and loss of market share and revenues.

If our products fail to meet rigorous standards or warranties that we provide in certain contracts in respect of our products and their conformity to the specific use defined by the customer, we may be required to incur substantial costs in taking appropriate corrective action (up to and including recalling products from consumers) and to reimburse customers and/or end-users for losses that they suffer as a result of this failure. Customers and end-users may seek to recover these losses through litigation and, under applicable legal rules, may succeed in any such claim, despite there being no negligence or other fault on our part. In addition, if our packaging fails to preserve the integrity of its contents, it is possible that the manufacturer of the product may allege that our packaging is the cause of the fault or contamination, even if the packaging complies with contractual specifications. This could result in liability to our customers and to third parties for bodily injury or other tangible or intangible damages suffered as a result. If any of these claims are successful, there could be a material adverse effect on our business, financial condition and results of operations.

Furthermore, placing an unsafe product on the market, failing to notify the regulatory authorities of a safety issue, failing to take appropriate corrective action and failing to meet other regulatory requirements relating to product safety could lead to regulatory investigation, enforcement action and/or prosecution. Any product quality or safety issue may also result in adverse publicity, which may damage our reputation. This could in turn have a material adverse effect on our

business, financial condition and results of operations. Although we have not had material claims for damages for defective products in the past, and have not conducted any substantial product recalls or other material corrective action, there can be no assurance that these events will not occur in the future.

Our existing insurance coverage may be insufficient and future coverage may be difficult or prohibitively expensive to obtain.

Our insurance arrangements are subject to the limitations of certain market capacities and the economics of certain types of cover, and may typically exclude certain risks and are subject to certain thresholds and limits. We cannot assure you that the coverage available will be sufficient to protect us from all possible loss or damage resulting from unforeseen events. As a result, our insurance coverage may prove to be inadequate for events that may cause significant disruption to our operations, which may have a material adverse effect on our business, financial condition and results of operations. In addition, we may also suffer indirect losses, such as the disruption of our business or third-party claims of damages, as a result of an insured risk event. While we carry business interruption coverage and general liability coverage, such coverage is subject to certain limitations, thresholds and limits, and may not fully cover all indirect losses.

We renew our insurance arrangements on an annual basis and the cost of coverage may increase to an extent that we may choose to reduce our coverage limits or agree to certain exclusions from our coverage. Among other factors, adverse political developments, limited insurance market capacity, security concerns and natural disasters in any country in which we operate may adversely affect available insurance coverage and result in increased premiums for, and additional exclusions from, available coverage.

We depend on our executive and senior management as well as skilled personnel, and our operations may be disrupted if we are unable to retain or motivate such personnel.

We depend on our experienced executive team, who are identified under "*Directors, Senior Management and Employees*" of this annual report, members of senior management, and other key and skilled personnel. These individuals, possess manufacturing, sales, marketing, technical, financial and other specialized skills that are critical to the operation of our business. The loss of services of one or more of the members of our executive team, members of senior management or other key and skilled personnel or the failure to provide adequate succession plans for such personnel, could adversely affect our operations and competitiveness until a suitable replacement can be found. Moreover, the hiring of qualified individuals in our industry is highly competitive and there may be a limited number of persons with the requisite skills and experience to serve in these positions, for example, where recruiting for replacements with similar expertise in glass container making or can making may not always be possible for our production facility-based roles. Our business may also suffer from various disruptions if we experience high levels of staff turnover across our business, or if our personnel do not adapt effectively to any adjustments or changes that we might make to our operating model. There can be no assurance that we would be able to locate, employ or retain required qualified personnel on terms acceptable to us, or at all, which could have a material adverse effect on our business, financial condition and results of our operations.

Continuing uncertainty regarding the effects of the United Kingdom's withdrawal from the European Union may adversely affect our financial condition and results of operations.

Under the terms of the withdrawal agreement between the United Kingdom and the European Union (the "Withdrawal Agreement"), the United Kingdom formally left the European Union on January 1, 2020, and on January 1, 2021, the United Kingdom left the EU Single Market and Customs Union, as well as all EU policies and international agreements (commonly referred to as "Brexit"). On December 24, 2020, the European Commission reached a trade agreement with the United Kingdom on the terms of its future cooperation with the European Union (the "Trade and Cooperation Agreement" and together with the Withdrawal Agreement, the "Brexit Agreements"), which provided for among other things, a zero tariff, zero quota arrangement on sales of goods between the United Kingdom and the European Union.

Approximately 11% of our revenue for the year ended December 31, 2022 was derived from revenues generated in the United Kingdom and seven of our 65 metal or glass packaging production facilities are located in the United Kingdom, as of December 31, 2022. Customs duties on goods originating outside the United Kingdom, amendment or suspension of zero tariff arrangements under the Brexit Agreements, driver shortages in the trucking industry and supply chain disruptions due to delays at British ports as a result of customs checks might lead to additional costs for and

transportation delays with products and materials shipped from the United Kingdom to Europe or from Europe to the United Kingdom, including aluminum and coatings in our Ardagh Metal Packaging operations and soda ash, molds and machinery in our Ardagh Glass Packaging operations. Furthermore, the required changes to our business systems and processes in order to comply with newly introduced customs procedures have led to additional costs.

The Brexit Agreements also allow for the possibility of future changes in laws and regulations, including changes to import, tax and employment laws and regulations, which could adversely impact our U.K. business, as additional resources and efforts will have to be expended to ensure compliance with any future changes. For example, there is uncertainty surrounding environmental permits and permissions currently governed by the EU IED, and whether more burdensome requirements will be imposed by new U.K. regulations. In addition, some of our customers are based in the United Kingdom and export outside the U.K. market. These customers may experience reduced demand or delays arising from post-Brexit arrangements. Although we seek to export through channels where delays would be minimized, we have nonetheless experienced delays in the transport of certain products, consumables and other materials particularly in relation to shipments from the United Kingdom to the European Union. The impact of these delays, if prolonged, could materially adversely affect our business, financial condition and the results of our operations.

More generally, the uncertainty and unpredictability concerning the impact of Brexit that could result in politically divergent national laws and regulations, on relationships between commercial parties, financial institutions, suppliers and service providers and their respective customers in the United Kingdom and the European Union, and the legal, political and economic relationships between the United Kingdom and the European Union, may result in adverse effects on credit markets and foreign direct investments in Europe and the United Kingdom, and significant currency and interest rate fluctuations. See "*—Currency, interest rate and commodity price fluctuations may have a material impact on our business*" for a further discussion on the effect such fluctuations could have on our business. Any further volatility in political, regulatory, economic or market conditions could adversely affect national and local economies and employment rates, increase consumer and commercial bankruptcy filings, and cause other results that adversely affect household incomes, which would have a material adverse effect on our business, financial condition and results of our operations.

The economic outlook could also be further adversely affected by the risk of other European Union member states leaving the European Union, demand for independence by Scotland, or the risk that the euro as the single currency of all Eurozone member states ceases to exist. These developments, or the perception that any of them could occur, may have a material adverse effect on the stability of global financial markets, and could significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Asset valuations, currency exchange rates and credit ratings may be especially subject to increased market volatility. Any such developments could materially adversely affect our business, financial condition and results of operations. See "*—Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*."

Pandemics or disease outbreaks, such as the COVID-19 pandemic, as well as governmental mandates and restrictions attributable thereto, have had, and may continue to have an adverse impact on worldwide economic activity and our business.

Pandemics or disease outbreaks, such as the COVID-19 pandemic, as well as measures enacted to prevent its spread, including restrictions on travel, imposition of quarantines and prolonged closures of workplaces and other businesses, including hospitality, leisure and entertainment outlets, and the related cancellation of events, have impacted and may continue to impact our business in several ways.

The various governmental lockdown mandates and other restrictive measures in response to the COVID-19 pandemic over the last three years reduced global economic activity, which resulted in lower demand for certain of our customers' products and, therefore, the products we manufacture, although demand for "at-home" consumption increased and therefore demand for many of our customers' products. As a result, the sales of our products proved to be resilient during this phase of the COVID-19 pandemic. However, the COVID-19 pandemic has at times caused, and may again give rise to an adverse effect on our operations, including disruptions to our supply chain and workforce and the incurrence of increased costs. Although our production has not been significantly impacted to date, our production facilities may be required to curtail or cease production in response to the spread of COVID-19 or any future pandemic or disease outbreaks. The impact of any pandemic or disease outbreaks on capital markets could also increase our cost of borrowing. In addition,

our customers, distribution partners, service providers or suppliers may experience financial distress, file for bankruptcy protection, go out of business, or suffer disruptions in their businesses due to the COVID-19 pandemic or any future pandemic or disease outbreaks, which could have a material adverse effect on our business. While COVID-19 vaccines are now widely available and the spread and severity of COVID-19 have been mitigated to some extent, it is not clear whether or how our customers and end-users will modify their behavior in response. In addition, new strains and variants of the COVID-19 virus have and may continue to cause outbreaks and increased reported infection rates, which may impact general economic recovery and contribute to an extended recession or depression. We cannot predict the full extent of the impact and significance of these disruptions. There can be no assurance that the COVID-19 pandemic or any future pandemics or disease outbreaks will not have a material adverse effect on global economic activity and on our business, financial condition and results of operations.

Risks Relating to Our Capital Structure

Our substantial debt could adversely affect our financial health and our ability to effectively manage and grow our business.

We have a substantial amount of debt and significant debt service obligations. As of December 31, 2022, we had total borrowings and net debt of $9.8 billion and $8.6 billion, respectively. Some of the agreements under which we borrow funds contain covenants or provisions that impose certain restrictions on us, such as debt ratios and may prevent us from incurring additional debt. For more information, see the description of our debt facilities and the table outlining our principal financing arrangements in "*Operating and Financial Review*".

Our substantial debt could have adverse consequences for us and for our shareholders. For example, our substantial debt could:

- require us to dedicate a large portion of our cash flow from operations to service debt and fund repayments on our debt, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate purposes;
- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for, or reacting to, changes in our business or industry;
- limit our ability to raise additional debt or equity capital in the future;
- restrict us from making strategic acquisitions or exploiting business opportunities; and
- place us at a competitive disadvantage compared to our competitors that have less debt.

Further, notwithstanding our current indebtedness levels and restrictive covenants, we may still be able to incur substantial additional debt or make certain restricted payments, which could exacerbate the risks described above.

Adverse developments in our business, financial condition and results of operations due to deteriorating global economic conditions, increased interest rates or other factors could cause ratings agencies to lower the credit ratings, or ratings outlook, of our short- and long-term debt and, consequently, impair our ability to raise new financing or refinance our current borrowings and increase our costs of issuing any new debt instruments. See "*—Risks Relating to Our Business—Currency, interest rate and commodity price fluctuations may have a material impact on our business*" for a further discussion on interest rate risk and the potential increase to our cost of borrowing. Additionally, a significant weakening of our financial position or operating results due to changes in global economic conditions or other factors could result in non-compliance with our restrictive covenants in our financing arrangements and reduced cash flow from our operations, which, in turn, could materially adversely affect our business. See "*—Risks Relating to Our Business—Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*" for further details.

We may not be able to raise additional capital or only be able to raise additional capital at significantly increased costs.

We may require additional cash resources due to changed business conditions or other future developments, including any investments or acquisitions we may decide to pursue. If our current resources are insufficient to satisfy our cash requirements, we may seek to sell additional debt securities or incur debt under credit facilities we may put in place. The incurrence of additional indebtedness could increase our vulnerability to adverse economic and industry conditions and limit our ability to pursue our business strategies. See "*—Risks Relating to Our capital structure— Our substantial debt could adversely affect our financial health and our ability to effectively manage and grow our business*" for a further discussion on how the incurrence of indebtedness could reduce the availability of our cash flow, which could materially adversely affect our business.

Furthermore, we cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all. For example, deteriorating economic conditions, such as an increase in interest rates or disruptions in global capital markets, could make it more difficult for us to secure financings. See "*—Risks Relating to Our Business—Changes to the political, credit, financial and/or economic environment in which we operate could have a material adverse effect on our business, such as affecting consumer demand for beverage products, which could impact our customers and as a result, reduce the demand for our products*" for further detail on deteriorating economic conditions. If we are unable to raise additional capital, or if the cost of raising additional capital significantly increases, as is the case when central banks raise benchmark interest rates, we may be unable to make necessary or desired capital expenditures, take advantage of investment opportunities, refinance existing indebtedness or meet unexpected financial requirements. This could cause us to default on our indebtedness, delay or abandon anticipated expenditures and investments, or otherwise limit our operations, all of which could have a material adverse effect on our business, financial condition and results of operations.

Risks Related to Our Class A Common Shares

We voluntarily delisted from the NYSE and are no longer an SEC reporting company, and as such we are no longer required to comply with certain corporate governance and reporting requirements that we were previously held to and that are applicable to listed reporting companies.

As previously announced, on October 6, 2021, the Company filed a Form 25 with the U.S. Securities and Exchange Commission (the "SEC") to voluntarily delist our Class A common shares from the New York Stock Exchange ("NYSE") and our Class A common shares were suspended from trading on the NYSE on October 6, 2021. Following delisting of the Class A common shares, on October 18, 2021, the Company filed a Form 15 with the SEC to terminate the registration of our Class A common shares under Section 12(g) of the Exchange Act, resulting in the automatic suspension of the Company's reporting obligations under Sections 13(a) and 15(d) of the Exchange Act. As a result, we are also no longer required to comply with certain corporate governance requirements of the NYSE and SEC reporting requirements that we were previously held to and that are applicable to listed reporting companies. For example, we are no longer required to file Form 20-Fs or Form 6-Ks and we are not subject to any corporate governance standards of the NYSE. We are also no longer subject to reporting requirements under the Sarbanes-Oxley Act, such as the requirement for the principal executive officer and principal financial officer of a listed company to certify the effectiveness of its disclosure controls and procedures and its internal controls over financial reporting. Accordingly, our shareholders no longer have the same protections afforded to shareholders of listed companies that are subject to these requirements.

The delisting of our Class A common shares from the NYSE limits the ability of shareholders to trade their Class A common shares and subjects the Company to additional trading restrictions.

As a result of the delisting of our Class A common shares from the NYSE, we and our shareholders could face significant material adverse consequences with respect to such shares, including:

- lack of a liquid trading market for our Class A common shares;
- more limited market quotations for our Class A common shares;
- more limited research coverage by stock analysts;
- impact on the Company's reputation;
- more difficult and more expensive equity financings in the future; and
- decreased ability to issue additional securities or obtain additional funding in the future.

The National Securities Markets Improvement Act of 1996, which is a U.S. federal statute, prevents or preempts the states from regulating the sale of certain securities, which are referred to as "covered securities." As a result of our Class A common shares no longer being listed on the NYSE, such shares are no longer "covered securities," as and such, the Company is subject to regulation in each U.S. state in which the Company offers our Class A common shares.

The dual class structure of our common shares has the effect of concentrating voting control with our Parent Company or its shareholders and limiting our other shareholders' ability to influence corporate matters.

Our Class B common shares, with a nominal value of €0.10 each, have 10 votes per share, and our Class A common shares, with a nominal value of €0.01 each, have one vote per share. Our Parent Company owns indirectly all Class B common shares, which represent approximately 99.87% of the total voting power of our issued and outstanding share capital. Our Parent Company has the ability to control the outcome of most matters requiring shareholder approval, including:

- the election of our Board and, through our Board, decision making with respect to our business direction and policies, including the appointment and removal of our officers;
- mergers and demergers;
- changes to our Articles; and
- our capital structure.

This voting control and influence may discourage transactions involving a change of control of the Company, including transactions in which holders of our Class A common shares might otherwise receive a premium for their shares.

In addition, our Parent Company may continue to be able to control the outcome of most matters submitted to our shareholders for approval even if their shareholdings represent less than 50% of all issued shares. Due to the 10 to 1 voting ratio between our Class B and Class A common shares, our Parent Company will continue to control a majority of the combined voting power of our issued and outstanding share capital even when Class B common shares represent substantially less than 50% of all issued and outstanding common shares. This concentrated control will limit the ability of holders of our Class A common shares to influence corporate matters for the foreseeable future, and, as a result, the market price of our Class A common shares could be adversely affected.

The Company has agreed with the Parent Company to take such actions as are necessary to implement a reorganization of the Parent Company so that shareholders of the Parent Company become proportionate direct holders of our common shares, provided that the aggregate number of Class B common shares received by such shareholders in such event shall be substantially the same as, or fewer than (adjusting for fractional shares), the number of the Class B common shares owned by the Parent Company immediately prior to the date of such event. If such a reorganization were to occur, we anticipate that such holders who are Qualified Holders (as defined in our Articles) will be entitled to elect to receive either Class A common shares or Class B common shares in the reorganization and that following the reorganization, holders of Class B common shares may continue to collectively have voting power that would allow them to control the outcome of most matters requiring shareholder approval. The pre IPO shareholders of the Parent Company are also permitted, in our Articles, to transfer Class B common shares among themselves and to certain family members and permitted entities.

In addition, the Toggle Notes issued by the Parent Company are secured by all of our outstanding Class B common shares. Enforcement of the pledges in an event of default under the Toggle Notes could impact corporate control and might trigger change of control provisions under the indentures.

In the future, we may issue options, restricted shares and other forms of share-based compensation, which have the potential to dilute shareholder value and cause the price of our Class A common shares to decline.

We may offer share options, restricted shares and other forms of share-based compensation to our directors, officers and employees in the future. If any options that we issue are exercised, or any restricted shares that we may issue vest, and those shares are sold into the public market, the market price of our Class A common shares may decline. In addition, the availability of Class A common shares for award under any equity incentive plan we may introduce, or the grant of share options, restricted shares or other forms of share-based compensation, may adversely affect the market price of our Class A common shares.

U.S. investors may have difficulty enforcing civil liabilities against us and our directors and officers.

We are organized under the laws of the Grand Duchy of Luxembourg. In addition, a substantial amount of our assets are located outside the United States, and many of our directors and officers reside outside the United States and will continue to reside outside the United States. As a result, investors may not be able to effect service of process within the United States upon us or these persons or enforce judgements obtained against us or these persons in U.S. courts, including judgements in actions predicated upon the civil liability provisions of the U.S. federal securities laws. Likewise, it also may be difficult for an investor to enforce in U.S. courts judgements obtained against us or these persons in courts located in jurisdictions outside the United States, including judgements predicated upon the civil liability provisions of the U.S. federal securities laws. Awards of punitive damages in actions brought in the United States or elsewhere are generally not enforceable in Luxembourg.

Any judgements obtained in any U.S. federal or state court against us may have to be enforced in the courts of Luxembourg or other EU member states. As there is no treaty in force on the reciprocal recognition and enforcement of judgements in civil and commercial matters between the United States and Luxembourg, courts in Luxembourg will not automatically recognize and enforce a final judgement rendered by a U.S. court. A valid judgement obtained from a court of competent jurisdiction in the United States may be entered and enforced through a court of competent jurisdiction in Luxembourg, subject to compliance with the enforcement procedures (*exequatur*). The enforceability in Luxembourg courts of judgements rendered by U.S. courts will be subject, prior to any enforcement in Luxembourg, to the procedure and the conditions set forth in the Luxembourg procedural code, which conditions may include the following (which may change):

- the judgement of the U.S. court is final and enforceable (*exécutoire*) in the United States and has not been enforced in the United States;

- the U.S. court had jurisdiction over the subject matter leading to the judgement (that is, its jurisdiction was in compliance both with Luxembourg private international law and local law rules and with the applicable domestic U.S. federal or state jurisdictional rules);

- the judgement was granted following proceedings where the counterparty had the opportunity to appear, and if it appeared, to present a defense and other conditions for a fair trial have been complied with taking into account all facts and circumstances whether occurring before, during or after trial or issue and delivery of the judgement, and the judgement has not been obtained by reason of fraud;

- the U.S. court applied the substantive laws as designated by the Luxembourg conflict of law rules;

- the U.S. judgement does not contravene international public policy (*ordre public*) or order, both substantive and procedural, as understood under the laws of Luxembourg or has been given in proceedings of a criminal nature; and

- the absence of contradiction between such judgement and an already issued judgement of a Luxembourg court.

In addition, actions brought in a Luxembourg court against us, the members of our Board or our officers to enforce liabilities based on U.S. federal securities laws may be subject to certain restrictions. In particular, Luxembourg courts generally do not award punitive damages. Litigation in Luxembourg also is subject to rules of procedure that differ from the U.S. rules, including, with respect to the taking and admissibility of evidence, the conduct of the proceedings and the allocation of costs. Proceedings in Luxembourg would have to be conducted in the French or German language, and all documents submitted to the court would, in principle, have to be translated into French or German. For these reasons, it may be difficult for a U.S. investor to bring an action in a Luxembourg court predicated upon the civil liability provisions of the U.S. federal securities laws against us, the members of our Board or our officers. In addition, even if a judgment against us, the members of our Board or our officers based on the civil liability provisions of the U.S. federal securities laws is obtained, a U.S. investor may not be able to enforce it in U.S. or Luxembourg courts.

Our directors and officers have entered into indemnification agreements with us as permitted under our Articles. Under such agreements, our directors and officers are entitled to indemnification from us to the fullest extent permitted by Luxemburg law against liability and expenses reasonably incurred or paid by them in connection with claims, actions, suits or proceedings in which they become involved as a party or otherwise by virtue of performing or having performed

as a director or officer, and against amounts paid or incurred by them in the settlement of such claims, actions, suits or proceedings. Luxembourg Law and our Articles permit us to keep directors indemnified against any expenses, judgments, fines and amounts paid in connection with liability of a director towards us or a third party for management errors, i.e., for wrongful acts committed during the execution of the mandate (*mandat*) granted to the director by us, except in connection with criminal offenses, gross negligence, fraud or dishonesty. The rights to and obligations of indemnification among or between us and any of our current or former directors and officers are generally governed by the laws of Luxembourg and subject to the jurisdiction of the Luxembourg courts, unless such rights or obligations do not relate to or arise out of such persons' capacities listed above. Although there is doubt as to whether U.S. courts would enforce this indemnification provision in an action brought in the United States under U.S. federal or state securities laws, this provision could make it more difficult to obtain judgments outside Luxembourg or from non-Luxembourg jurisdictions that would apply Luxembourg Law against our assets in Luxembourg.

We are a holding company and depend on dividends and other distributions from subsidiaries in order to pay cash dividends.

As we are a holding company, our ability to pay cash dividends on our shares may be limited by restrictions on our ability to obtain sufficient funds through dividends from subsidiaries, including restrictions under the terms of the agreements governing the current indebtedness of us and our subsidiaries or future indebtedness that we or our subsidiaries may incur.

Subject to any limitations referred to above, or as prescribed by Luxembourg Law, the declaration of future dividends, if any, will depend upon our future operations and earnings, capital expenditure requirements, general financial conditions, legal and contractual restrictions and other factors. In addition, under the indenture governing the Toggle Notes, the Parent Company is required to cause us to take all actions necessary or appropriate to permit the making of the maximum amount of dividends or other distributions that would be lawfully permitted to be declared and paid in order for it to meet its cash interest payment obligations. In certain circumstances, we may be required to declare a special dividend to holders of our Class A Common shares and to the Parent Company in order to comply with these obligations.

The rights of our shareholders may differ from the rights they would have as shareholders of a U.S. corporation and consequently our shareholders may have more difficulty protecting their interests.

Our corporate affairs are governed by our Articles and Luxembourg Law, including the Luxembourg Law of 10 August 1915, on commercial companies, as amended. The rights of our shareholders and the responsibilities of our directors and officers under Luxembourg Law are different from those applicable to a corporation incorporated in the United States.

In the performance of its duties, our Board is required to act as a collegiate body in the interest of the Company. It is possible that the Company may have interests that are different from interests of the shareholders. If any member of our Board has a direct or indirect financial interest in a matter which has to be considered by the Board that conflicts with the interests of the Company, Luxembourg Law provides that such director will not be entitled to participate in deliberations on and exercise his vote with respect to the approval of such transaction. If the interest of such a member of the Board does not conflict with the interests of the Company, then the applicable director with such interest may participate in deliberations on, and vote on the approval of, that transaction.

Further, under Luxembourg Law, there may be less publicly available information about the Company than is regularly published by or about U.S. domestic issuers. In addition, Luxembourg Law governing the securities of Luxembourg companies may not be as extensive as those in effect in the United States, and Luxembourg Law and regulations in respect of corporate governance matters might not be as protective of minority shareholders as state corporation laws in the United States. Therefore, our shareholders may have more difficulty in protecting their interests in connection with actions taken by its directors and officers or its principal shareholders than they would as shareholders of a corporation incorporated in the United States.

Neither our Articles nor Luxembourg Law provide for appraisal rights for dissenting shareholders in certain extraordinary corporate transactions that may otherwise be available to shareholders under certain U.S. state laws. As a result of these differences, our shareholders may have more difficulty protecting their interests than they would as shareholders of a U.S. domestic issuer.

Our Articles include compulsory share transfer provisions that may not provide our minority shareholders with the same benefits as they would have in a merger of a Delaware corporation.

Our Articles include provisions that give the holder of 75% of the number of our outstanding common shares (which would include the Parent Company for so long as it holds the requisite number of our common shares) the right to acquire our outstanding shares held by all other holders at such time for a purchase price payable in cash that is equal to the fair market value of such shares, as determined by an independent investment banking firm of international reputation in accordance with the procedures contained in our Articles. These procedures include a dispute resolution provision permitting holders of at least 10% of the shares of the Company held by our minority shareholders at that time to dispute the purchase price proposed by the acquiring shareholder. It is uncertain whether our minority shareholders will be able to coordinate with each other in a manner that will enable them to take full advantage of these provisions. There can be no assurance that these provisions would result in a price as favorable to our minority shareholders as they would receive in a transaction subject to Delaware law and appraisal rights.

The super voting rights of our Class B common shares and other anti-takeover provisions in our Articles might discourage or delay attempts to acquire us.

In addition to the super voting rights of our Class B common shares, our Articles contain provisions that may make the acquisition of our Company more difficult, including the following:

- *Control by Class B common shareholders.* Our Articles provide for a dual class share structure, which, for so long as Class B common shares are issued and outstanding, will allow our Parent Company to control the outcome of most matters requiring shareholder approval, even if it owns Class B common shares representing significantly less than a majority of the Company's issued and outstanding common shares. As a result, the holders of our Class B common shares could delay or prevent the approval of a change of control transaction that may otherwise be approved by the holders of the issued and outstanding Class A common shares.

- *Classified Board.* Our Board is classified into three classes of directors that are, as nearly as possible, of equal size. Each class of directors will be elected for a three-year term of office, but the terms are staggered so that the term of only one class of directors expires at each annual general meeting. The existence of a classified board could impede a proxy contest or delay a successful tender offeror from obtaining majority control of the Board, and the prospect of that delay might deter a potential offeror.

- *Notice Requirements for Shareholder Proposals.* Luxembourg Law and our Articles provide that one or more shareholders together holding at least the 10% threshold may request the addition of one or more items to the agenda of any general meeting. The request must be sent to the registered office by registered mail, at least five clear days before the meeting is held. Our Articles also specify certain requirements regarding the form and content of a shareholder's notice. These requirements may make it difficult for our shareholders to bring matters before a general meeting.

- *Special Resolutions.* Our Articles require special resolutions adopted at an extraordinary general meeting for any of the following matters, among other things: (a) an increase or decrease of the authorized or issued capital, (b) an amendment to our Articles and (c) dissolving the Company. Pursuant to our Articles, for any special resolutions to be considered at a general meeting the quorum is at least one-half (1/2) of the share capital in issue present in person or by proxy, taking into account the par value of each Class A common share (€0.01) and the par value of each Class B common share (€0.10) (in effect one-half (1/2) of the voting rights), unless otherwise mandatorily required by Luxembourg Law. Any special resolution may be adopted at a general meeting at which a quorum is present (except as otherwise provided by mandatory law) by the affirmative votes of at least two-thirds (2/3) of the votes validly cast on such resolution by shareholders entitled to vote.

These anti-takeover provisions could discourage, delay or prevent a transaction involving a change in control of our Company, even if such transaction would benefit our shareholders.

Holders generally will be subject to a 15% withholding tax on payment of dividends made on the Class A common shares under current Luxembourg tax law.

Under current Luxembourg tax law, payments of dividends made on the Class A common shares generally are subject to a 15% Luxembourg withholding tax. Certain exemptions or reductions in the withholding tax may apply, but it will be up to the holders to claim any available refunds from the Luxembourg tax authority.

Sustainability

Sustainability

Sustainability is a core pillar of our business, recognizing that long-term economic viability is dependent upon having a sustainable business model. Our sustainability strategy initiates key actions to achieve our objectives through reducing our greenhouse gas emissions and our ecological impact as well as supporting our people and communities. In September 2015, member states of the United Nations developed a plan for the next 15 years to end extreme poverty, fight inequality and injustice, and protect our planet. Underpinning this plan are the 17 Sustainable Development Goals ("SDGs"). As a signatory to United Nations Global Compact, our sustainability strategy is linked to specific SDGs including Affordable and Clean Energy (#7), Responsible Consumption and Production (#12), Climate Action (#13), Partnerships for the Goals (#17), Good Health and Wellbeing (#3), Quality Education (#4) and Gender Equality (#5).

We have continued to expand our governance of climate risk and integrate climate considerations into the priorities of our Board and senior management. We intend to measure, manage and reduce the climate risk on our business in line with Taskforce on Climate-Related Financial Disclosures ("TCFD") guidelines. The TCFD provides a framework to consider and disclose our processes for managing the risks and opportunities associated with climate change. We will continue to consider the recommendations within the framework and enhance our associated opportunities in order to optimize our risk mitigation strategy. We also monitor regulatory developments on climate risk and sustainable finance. These include, but are not limited to, the EU Corporate Sustainability Reporting Directive (CSRD) which will be applicable to us for the year ended December 31, 2025.

Our sustainability focus is centered on minimizing our greenhouse gas emissions and ecological impact, promoting a healthy, safe and inclusive workplace for our employees and contributing positively to the communities in which we operate. We have established the Sustainability Committee (as defined below) to oversee our sustainability initiatives, which is supported by our Group sustainability function.

In pursuance of our environmental objectives, we seek to promote recycling of our products, enhance our product design and target continuous improvement in our processes. Unlike many other packaging substrates, metal and glass are both infinitely recyclable, without any degradation in quality, differentiating them from many other packaging substrates and we expect these attributes to continue to enhance our products' appeal, due to growing consumer awareness of sustainability and the environment.

Recycling rates for aluminum beverage cans are relatively high in the geographies in which we operate, estimated at 60% in the United States, 73% in Europe and 99% in Brazil as of 2020 - 2021. The use of recycled aluminum reduces energy consumption by over 90% compared with the alternative of producing aluminum cans from its virgin source.

In glass packaging, we aim to maximize the use of recycled glass, or cullet, in our production process, thereby reducing energy consumption and emissions. In Europe, the recycling rate for glass packaging is 78%, and we use up to 90% cullet in some glass furnaces. Recycling rates for glass packaging in the United States are significantly lower at 33%. We are committed to working, including with industry associations, to promote recycling rates in the regions in which we operate. FEVE, the European glass federation, has targeted an increase in glass recycling rates in the European Union, to 90% by 2030, through its Close the Glass Loop initiative. In addition, we have investments and partnerships in Europe to enhance our supply of cullet and are seeking to increase supply in the United States.

We continuously aim to reduce the material and resource usage in the manufacture of our products, through lightweighting of our metal beverage cans and glass containers. In addition, we have established specialist groups across our business and promote sharing best practices to drive continuous improvement in our manufacturing processes. In 2022, we joined key aluminum industry leaders to form a partnership in agreeing investments in net zero initiatives this decade to assure the shared global stakeholder objective of net zero emissions by 2050 is achieved. In addition, we were accepted as a member of the Aluminum Stewardship Initiative ("ASI"). The ASI is a multi-stakeholder initiative that promotes measurable and continual improvements in the key environment, social and governance impacts of aluminum production, use and recycling.

In 2022, we received approval for our near term Science-Based Sustainability Targets through the SBTi, whereby we set specific goals to reduce our Scope 1, 2 and 3 greenhouse gas emissions by 2030 in line with the Paris Agreement under which governments mutually pledged to limit the increase in global temperatures to 1.5°C.

We have also established other sustainability targets for reductions in energy consumption, water usage, waste and other metrics. We intend to achieve these targets through a wide range of initiatives, including (i) greater usage of renewable energy, including the installation of solar projects in multiple production facilities (ii) promoting the use of recycled content (iii) pursuing energy-efficiency projects across our plant network (iv) procuring electricity from renewable sources (v) sourcing sustainable inputs from our supplier base and (vi) minimizing volatile organic compounds emissions. The FEVE-sponsored consortium will no longer participate in the Furnace for the Future project, which aimed to build the world's first large-scale hybrid oxy-fuel furnace to run on up to 80% renewable electricity at one of our glass production facilities in Europe. We remain committed to de-carbonizing the glass production process and will continue to pursue other options, including alternative technological initiatives.

In 2022, we were awarded CDP (formally the Carbon Disclosure Project) Management Class ratings of "B" in respect of climate change, and a "B" rating for our water management, and Ardagh Metal Packaging, was awarded a Leadership Class rating of "A-" in respect of water management and a Management Class rating of "B" in respect of climate change.

We aim to ensure a safe and healthy workplace for all of our employees by embedding a culture of safety awareness. Broad principles are supported by detailed policies and procedures to minimize accidents and injuries through continuous training and education. We are committed to promoting diversity and inclusion in the workplace and are establishing diversity and inclusion councils across our business units.

We are a significant local employer and seek to play a positive role in our communities, including promoting educational linkages with the community through internships and apprenticeships. We have mapped out a program which intends to invest approximately $55 million over a multi-year period in our local communities in the United States, Europe and Brazil in science, technology, engineering and mathematics education initiatives for under-privileged children. Each of our production facilities also runs a community involvement program to raise environmental awareness, encourage recycling, and promote and support initiatives to help local charities and good causes.

Directors, Senior Management and Employees

Directors, Senior Management and Employees

Directors and Officers

Set forth below is information concerning our directors and officers as of the date of this annual report including their names, ages, positions, current directorship terms (which expire on the date of the relevant year's annual general meeting of shareholders) and assessment of independence in accordance with the corporate governance standards of the New York Stock Exchange. There are no family relationships among the executive officers or between any executive officer or director. Our executive officers are appointed by the Board to serve in their roles. Each executive officer is appointed for such term as may be prescribed by the Board or until a successor has been chosen and qualified or until such officer's death, resignation or removal. Shaun Murphy resigned from the Board in December 2022. Unless otherwise indicated, the business address of all of our executive officers and directors is 56, rue Charles Martel, L-2134 Luxembourg, Luxembourg.

Name	Age	Position	Expiration of current directorship term	Independent
Paul Coulson	70	Chairman	2023	
John Sheehan	57	Chief Financial Officer and Director	2023	
Michael Dick	54	Chief Executive Officer Ardagh Glass Packaging and Director	2023	
Oliver Graham	54	Chief Executive Officer Ardagh Metal Packaging and Director	2025	
Gerald Moloney	65	Director, Executive Committee	2025	
Brendan Dowling	75	Director	2025	
Houghton Fry	77	Director	2025	
Johan Gorter	63	Non-Executive Director	2024	
Abigail Blunt	61	Non-Executive Director	2023	☒
Yves Elsen	64	Non-Executive Director	2023	☒
The Rt. Hon. the Lord Hammond of Runnymede	67	Non-Executive Director	2024	☒

Hermanus Troskie	52	Non-Executive Director	2024	
Edward White	75	Non-Executive Director	2023	☒

Backgrounds of Our Directors and Officers

Paul Coulson

Paul Coulson graduated from Trinity College Dublin with a business degree in 1973. He spent five years with Price Waterhouse in London and Dublin and qualified as a Chartered Accountant in 1978. He then established his own accounting firm before setting up Yeoman International in 1980 and developing it into a significant leasing and structured finance business. In 1998 he became Chairman of Ardagh and initiated the transformation of Ardagh from a small, single plant operation into a leading global packaging company. Over the last 40 years he has been involved in the creation and development of a number of businesses apart from Yeoman and Ardagh. These include Fanad Fisheries, a leading Irish salmon farming company, and Sterile Technologies. Prior to its sale to Stericycle, Inc. in 2006, Sterile Technologies had been developed into the leading medical waste management company in the United Kingdom and Ireland. Mr. Coulson is a citizen of the Republic of Ireland.

John Sheehan

John Sheehan was appointed Chief Financial Officer and Director of Ardagh Group in 2021, having previously been Director of Corporate Development and Investor Relations. Prior to joining Ardagh in 2012, Mr. Sheehan spent twelve years in the equity capital markets with Investec, RBS and NCB, covering a range of industry sectors, including packaging. Mr. Sheehan qualified as a Chartered Accountant with PriceWaterhouseCoopers and is a citizen of the Republic of Ireland.

Michael Dick

Michael Dick was appointed Chief Executive Officer of Ardagh Glass Packaging in 2022, in addition to his role of Group Chief Commercial Officer. He has previously held the positions of Chief Commercial Officer – Glass Packaging Europe and Business Development Manager – Metal Packaging, within the organization. Prior to joining Ardagh in 2010, Michael held a number of senior management positions in General Electric and US Can. Michael has a BSc (Hons) degree in Applied Polymer Chemistry from Edinburgh Napier University. He is a British citizen.

Oliver Graham

Oliver Graham is CEO of Ardagh Metal Packaging S.A., a position he has held since 2020. Before taking up this role, Mr. Graham was CEO of Metal Packaging Europe with responsibility for Metal Packaging Brazil, as well as being Ardagh Group S.A. Commercial Director. He joined Ardagh in 2016 following the acquisition of the metal beverage packaging business, prior to which he was Group Commercial Director at Rexam PLC. Mr. Graham joined Rexam PLC in 2013 from The Boston Consulting Group, where he was a partner. He is a British citizen.

Gerald Moloney

Gerald Moloney has been a director of the Group since 2016, having served for many years on the boards of Yeoman International Group Limited and Yeoman Capital S.A.. He is an executive with the Group since 2018 and is a member of the Executive Committee. He holds a law degree from University College Cork and qualified as a solicitor in 1981. He worked for a period in European law in Brussels and has many years' experience working in the areas of commercial law and commercial litigation. He is a founding partner of the commercial and litigation law firm, G.J. Moloney, with offices in Dublin and Cork, Ireland. Mr. Moloney is a citizen of the Republic of Ireland.

Brendan Dowling

Brendan Dowling has been a director of the Group since 1998. He holds graduate degrees in economics from University College Dublin and Yale University. He was Economic Advisor to the Minister for Foreign Affairs in Dublin before joining Davy Stockbrokers in 1979 as Chief Economist and later partner. He is a former member of the Committee of the Irish Stock Exchange and the Industrial Development Authority of Ireland. Prior to joining Yeoman International Group in 1995, he was Executive Chairman of Protos Stockbrokers in Helsinki, Finland. Mr. Dowling is a citizen of the Republic of Ireland.

Houghton Fry

Houghton Fry qualified as a solicitor in 1967 with William Fry, Solicitors in Dublin, Ireland having obtained an LLB law degree from Trinity College, Dublin University, Ireland. He became a Partner in the firm in 1970 and, in 1986, Chairman and Senior Partner. He specialized in international corporate and financial law and had extensive transaction experience in many different jurisdictions. He retired from legal practice in 2004 and has been a director of the Group since that time. Mr. Fry is a citizen of the Republic of Ireland.

Johan Gorter

Johan Gorter has been a director of the Group since 2016. Mr. Gorter joined PLM in 1998 as plant director for the Dongen glass plant. He then held several management positions within Rexam PLC before he joined the Group in 2007 as Group Director for Continuous Improvement. He was Chief Executive Officer of Glass Packaging Europe from 2011 to 2019 and Chief Executive Officer of Glass Packaging from 2017 to 2019. Mr. Gorter was Chairman of Glass Packaging

North America from 2020 until his retirement in December 2021. Mr. Gorter holds a Masters in Industrial Engineering from the University of Eindhoven. He is a citizen of the Netherlands.

Abigail Blunt

Abigail Blunt has had a 30-year career as a corporate and government affairs executive with extensive experience in the consumer packaged goods industry. In September 2022 she left the Kraft Heinz Company after 21 years where she had led the Global Government Affairs function, served as an Advisor to the Board, a Kraft Heinz Foundation Board member and an ESG leader. Earlier in her career, Mrs. Blunt earned significant political acumen through her roles in government and government related entities including Finance Director of the National Republican Congressional Committee (NRCC), Deputy Director of the Bush Re-election Committee, US Chamber of Commerce Foundation Director, Government Affairs Director for the Federal Deposit Insurance Corporation (FDIC) and a legislative aide in the US House of Representatives. Mrs. Blunt was named by *Washingtonian Magazine* as one of "Washington's Most Influential People" in 2021. She serves on the Board of Apollo-owned portfolio company, SmartStart, as well as on the Board of VitaKey. She is a member of The Economic Club of Washington and Extraordinary Women on Boards. Mrs. Blunt is an independent director and is a member of the Sustainability Committee. She is a citizen of the United States of America.

Yves Elsen

Yves Elsen is CEO and managing partner of HITEC Luxembourg S.A., a Luxembourg-based industrial and technology company serving contractors in over 20 countries around the world. Prior to this, Mr. Elsen founded and led SATLYNX S.A., following extensive experience with listed satellite operator SES - Société Européenne des Satellites S.A. He was a member of the supervisory board of Villeroy & Boch AG from 2013 to 2019 and its Chairman from 2017 to 2019. Mr. Elsen is Chairman of the board of governors of the University of Luxembourg. He is an independent director and is a member of the Audit Committee. Mr. Elsen is a citizen of the Grand Duchy of Luxembourg.

The Rt. Hon. the Lord Hammond of Runnymede

The Rt Hon. the Lord Hammond of Runnymede has had a distinguished career in British politics. A Member of Parliament of the United Kingdom from 1997 to 2019, he held a range of ministerial offices, most recently serving as Chancellor of the Exchequer from 2016 to 2019. Prior to this, he served as Foreign Secretary from 2014 to 2016, as Defence Secretary from 2011 to 2014 and as Transport Secretary from 2010 to 2011. Lord Philip Hammond is an independent director and is a member of the Audit Committee. He is a British citizen.

Damien O'Brien

Damien O'Brien served as CEO of Egon Zehnder from 2008 to 2014 and as its Chairman from 2010 to 2018. Mr. O'Brien joined Egon Zehnder in 1988 and since then he has been based in Australia, Asia and Europe. He is also a member of the boards of IMD Business School in Lausanne, Switzerland, and St. Vincents Health Australia. Mr. O'Brien is an independent director and is the Chair of the Audit Committee and a member of the Compensation Committee. Mr. O'Brien is a citizen of Australia and the Republic of Ireland.

Hermanus Troskie

Hermanus Troskie is the CEO of Corporate, Legal and Tax Advisory at Stonehage Fleming, an international family office, and has been a director of Ardagh Group since 2009.. He has extensive experience in the areas of international corporate structuring, cross-border financing and capital markets, with a particular interest in integrated structuring for entrepreneurs and their businesses. Mr. Troskie is a director of companies within the Yeoman group of companies, and other private and public companies. He qualified as a South African Attorney in 1997, and as a Solicitor of the Senior Courts of England and Wales in 2001. Mr. Troskie is a member of the Compensation Committee and the Finance Committee. He is based in Luxembourg and is a citizen of the Netherlands.

Edward White

Edward White has been an Executive Professor of Finance in the Mays Business School at Texas A&M University since 2014. He was formerly a Senior Vice President and the Chief Financial Officer of O-I Glass, Inc. ("O-I") for seven years until his retirement in 2012. During his 38-year career with O-I, he worked in a variety of management roles across finance, manufacturing and marketing. His international experiences included senior management positions as an expatriate in Finland, Poland, France and Switzerland. Mr. White holds a M.B.A. from the University of Hawaii and a Bachelor's in Business Administration from Indiana University. He is an independent director and is a member of the Audit Committee. Mr. White is a citizen of the United States of America.

Committees of the Board

Our Board has six standing committees: an audit committee (the "Audit Committee"), a compensation committee (the "Compensation Committee"), a nominating and governance committee (the "Nominating and Governance Committee"), a sustainability committee (the "Sustainability Committee"), a finance committee (the "Finance Committee") and an executive committee (the "Executive Committee"). The members of each committee are appointed by the Board and serve until their successors are elected and qualified, unless they are earlier removed or they resign. Each of the committees report to the Board as it deems appropriate, and as the board may request. The composition, duties and responsibilities of the six standing committees are set forth below. In the future, our Board may establish other committees, as it deems appropriate, to assist it with its responsibilities.

Audit Committee

In 2022, five meetings of the Audit Committee were held, with an attendance rate of 100%. Our Audit Committee currently consists of Damien O'Brien, Yves Elsen, The Rt. Hon. the Lord Hammond of Runnymede and Edward White, with Damien O'Brien serving as the chair of the Audit Committee.

Our Audit Committee, among other matters, oversees (1) our financial reporting, auditing and internal control activities; (2) the integrity and audits of our financial statements; (3) our compliance with legal and regulatory requirements; (4) the qualifications and independence of our independent auditors; (5) the performance of our internal audit function and independent auditors; and (6) our overall risk exposure and management. Duties of the Audit Committee include the following:

- annually review and assess the adequacy of the Audit Committee charter and the performance of the Audit Committee;
- be responsible for recommending the appointment, retention and termination of our independent auditors and determine the compensation of our independent auditors;
- review the plans and results of the audit engagement with the independent auditors;
- evaluate the qualifications, performance and independence of our independent auditors;
- have authority to approve in advance all audit and non-audit services by our independent auditors, the scope and terms thereof and the fees therefor;
- review the adequacy of our internal accounting controls;
- ensure the Company maintains a robust risk management function, including in respect of IT and cyber security risk management; and
- meet at least quarterly with our executive officers, internal audit staff and our independent auditors in separate executive sessions.

The Audit Committee has the power to investigate any matter brought to its attention within the scope of its duties and to retain counsel for this purpose where appropriate. Our Board has adopted a written charter for the Audit Committee, which is available on our corporate website at https://www.ardaghgroup.com/corporate/investors/Corporate Governance. The contents of the website are not incorporated by reference into this annual report.

Compensation Committee

In 2022, five meetings of the Compensation Committee were held, with an attendance rate of 100%. Our compensation committee currently consists of Paul Coulson, Brendan Dowling, Damien O'Brien and Hermanus Troskie, with Paul Coulson serving as the chair of the Compensation Committee.

The Compensation Committee has the sole authority to retain, and terminate, any compensation consultant to assist in the evaluation of employee compensation and to approve the consultant's fees and the other terms and conditions of the consultant's retention. The Compensation Committee, among other matters:

- at the request of our Board, reviews and makes recommendations to our Board relating to management succession planning;

- administers, reviews and makes recommendations to our Board regarding our compensation plans;

- reviews and approves our corporate goals and objectives with respect to compensation for executive officers and, evaluates each executive officer's performance in light of such goals and objectives to set his or her annual compensation, including salary, bonus and equity and non-equity incentive compensation, subject to approval by our Board; and

- provides oversight of management's decisions regarding the performance, evaluation and compensation of other officers.

Our Board has adopted a written charter for the Compensation Committee, which is available on our corporate website at https://www.ardaghgroup.com/corporate/investors/Corporate Governance. The contents of the website are not incorporated by reference into this annual report.

Nominating and Governance Committee

In 2022, four meetings of the Nominating and Governance Committee were held, with an attendance rate of 100%. Our Nominating and Governance Committee currently consists of Paul Coulson, Brendan Dowling and Houghton Fry, with Paul Coulson serving as the chair of the Nominating and Governance Committee. The Nominating and Governance Committee, among other matters:

- selects and recommends to the Board nominees for election by the shareholders or appointment by the Board;

- annually reviews with the Board the composition of the Board with regards to characteristics such as independence, knowledge, skills, experience and diversity of the members of the Board;

- makes recommendations on the frequency and structure of meetings of the Board and to monitor the functioning of the committees of the Board;

- develops and recommends to our Board a set of corporate governance guidelines applicable to us and, periodically reviews such guidelines and recommends changes to our Board for approval as necessary; and

- oversees the annual self-evaluation of our Board.

Our Board has adopted a written charter for the Nominating and Governance Committee, which is available on our corporate website at https://www.ardaghgroup.com/corporate/investors/Corporate Governance. The contents of the website are not incorporated by reference into this annual report.

Sustainability Committee

In 2022, five meetings of the Sustainability Committee were held, with an attendance rate of 100%. The Sustainability Committee currently consists of Michael Dick, Abigail Blunt, Oliver Graham, and John Sheehan, with Michael Dick serving as the chair of the Sustainability Committee. The meetings of the Sustainability Committee are attended by the CEOs of Ardagh Metal Packaging Europe and Americas and Ardagh Glass Packaging Europe and North America and by sustainability, human resources and procurement executives. The Sustainability Committee, among other matters:

- assists the Board in fulfilling its oversight responsibility for the Company's environmental and social sustainability objectives;
- makes recommendations to the Board relating to environmental and social sustainability matters;
- develops and oversees the implementation of a sustainability strategy; and
- advises the Board periodically with regard to current and emerging environmental and social sustainability developments.

Our Board has adopted a written charter for the Sustainability Committee, which is available on our corporate website at https://www.ardaghgroup.com/corporate/investors/Corporate Governance. The contents of the website are not incorporated by reference into this annual report.

Finance Committee

Our Finance Committee currently consists of Paul Coulson, Brendan Dowling, Cormac Maguire, John Sheehan and Hermanus Troskie with Paul Coulson serving as the chair of the Finance Committee. The Finance Committee, among other matters:

- reviews and monitors the capital structure, financial policies and treasury function of the Company and makes recommendations to the Board in relation thereto; and
- reviews and recommends to the Board whether to approve financing agreements or arrangements, including plans to issue, incur, amend, repurchase, redeem or repay, as applicable, indebtedness.

Our Board has adopted a written charter for the Finance Committee, which is available on our corporate website at https://www.ardaghgroup.com/corporate/investors/Corporate Governance. The contents of the website are not incorporated by reference into this annual report.

Executive Committee

The Board has established an Executive Committee that oversees the management of the business and affairs of the Company. Paul Coulson, Michael Dick, Oliver Graham, Gerald Moloney and John Sheehan currently serve on the Executive Committee, with Paul Coulson serving as the chair of the Executive Committee.

Our Board has adopted a written charter for the Executive Committee, which is available on our corporate website at https://www.ardaghgroup.com/corporate/investors/Corporate Governance. The contents of the website are not incorporated by reference into this annual report.

Code of Conduct

Our Board has adopted a code of conduct (the "Code") that establishes the standards of ethical conduct applicable to all of our directors, officers, employees, consultants and contractors. The Code addresses, among other things, competition and fair dealing, conflicts of interest, financial matters and external reporting, compliance with applicable governmental laws, rules and regulations, company funds and assets, confidentiality and the process for reporting violations of the Code, employee misconduct, conflicts of interest or other violations. Any waiver of the Code with respect to any director or executive officer will be promptly disclosed and posted on our website. Amendments to the Code will be promptly disclosed and posted on our website. The code is publicly available on our website at

http://www.ardaghgroup.com/corporate/investors. The contents of the website are not incorporated by reference into this annual report.

Corporate Governance Guidelines

Our Board has adopted corporate governance guidelines that serve as a flexible framework within which our Board and its committees operate. These guidelines cover a number of areas including the size and composition of the Board, Board membership criteria and director qualifications, director responsibilities, board agenda, roles of the chairman of the Board and chief executive officers, meetings of independent directors, Board member access to management and independent advisors, director communications with third parties, director compensation, director orientation and continuing education, evaluation of senior management and management succession planning. Our Nominating and Governance Committee reviews our corporate governance guidelines periodically and, if necessary, recommends changes to our Board.

Major Shareholders and Related Party Transactions

Major Shareholders and Related Party Transactions

Major shareholders

We have two classes of common shares: Class A common shares and Class B common shares. The rights of the holders of our Class A common shares and Class B common shares are identical except for par value, voting and conversion rights. Each Class A common share is entitled to one vote per share. Each Class B common share is entitled to ten votes per share. Each Class B common share is convertible at any time, at the option of the holder, into one Class A common share, and subject to certain exceptions, is converted into one Class A common share upon transfer to a third party.

The following table sets forth information with respect to the beneficial ownership of our outstanding shares as of December 31, 2022:

	Shares Beneficially Owned			
	Class A common shares[(i)]	Class B common shares		
Name of Beneficial Owner	**Shares**	**Shares**	**% of Total Number of Shares**	**% of Total Voting Power**
ARD Finance S.A.[(ii)]	1,092,617	174,745,025	79.7%	80.2%
ARD Group Finance Holdings S.A.[(iii)]	—	42,950,975	19.5%	19.7%
Other	1,824,192	—	0.8%	0.1%

(i) Class A common shares represent 1.3% of the Company's outstanding shares.

(ii) ARD Finance S.A. is a 100% subsidiary of the Parent Company.

(iii) ARD Group Finance Holdings S.A. is a 100% subsidiary of the Parent Company.

The Parent Company may be deemed to be the ultimate beneficial owner of the Class A and Class B common shares held by ARD Finance S.A. and ARD Group Finance Holdings S.A. The Parent Company has approximately 400 record shareholders and a board of directors consisting of eight directors. At the date of this report, Paul Coulson, our Chairman, control the Parent Company as a result of his 18.83% stake in the Parent Company and his 52.42% stake in Yeoman Capital S.A., which in turn owns 33.88% of the equity interests in the Parent Company.

Related Party Information

Relationship with our Parent Company

Our Class A and Class B common shares held by ARD Finance S.A. and ARD Group Finance Holdings S.A. are currently owned indirectly by our Parent Company. Our Parent Company continues to exercise control over the composition of our Board and any other action requiring the approval of our shareholders.

Shareholder Agreement

In connection with our 2017 IPO, we entered into the Shareholder Agreement. The Shareholder Agreement addresses, among other things:

(i) Matters relating to the assumption, indemnification and allocation of benefits and responsibilities and mutual release of liabilities in connection with arrangements and other obligations with respect to our business that were entered into by our Parent Company prior to our 2017 IPO;

(ii) Our obligation to co-operate in providing information to our Parent Company and taking such other actions reasonably requested to facilitate the Parent Company's ability to manage its investment in the Company and comply with governmental or contractual obligations, including reporting obligations under the 6.625%/7.125% Senior Secured Toggle Notes due 2023 (collectively, the "2023 Toggle Notes") or any replacement notes thereof, the defense of litigation, the preparation of tax returns, financial statements or

documents required to be filed with the SEC or any regulatory authority (including any stock exchange), or the management of any tax audits;

(iii) Our acknowledgement that there is anticipated at a future date a Reorganization Event (defined as an event in which the shareholders of the Parent Company and/or its subsidiaries will receive direct ownership in a number of our common shares (in proportion to their respective ownership interest in the Parent Company and/or its subsidiaries), whether by dividend, distribution, exchange offer or other means; provided that the aggregate number of Class B common shares received by such shareholders in such event shall be substantially the same as or fewer than (adjusting for fractional shares) the number of the Class B common shares owned by the Parent Company and/or its subsidiaries immediately prior to the date of such event) and our agreement to take such actions as are necessary to implement the Reorganization Event at our cost;

(iv) Our intention to pay dividends to all shareholders in amounts that will, at a minimum, be sufficient to enable the Parent Company to satisfy the cash interest payment obligations under the 2023 Toggle Notes or any replacement notes thereof in accordance with applicable laws, contractual obligations and our Articles; and

(v) Our agreement, so long as the 2023 Toggle Notes or any replacement notes thereof, are outstanding, not to, and not to permit our subsidiaries to, agree to restrictions on the payment of dividends that are materially more restrictive than the restrictions in place under any contract or agreement existing on the closing date of our 2017 IPO, unless such restriction would not have a material adverse effect on our ability to pay dividends as described in the preceding clause (such determination to be made at the time such restrictions are entered into). The 2023 Toggle Notes were redeemed in November 2019 and replaced with the Toggle Notes (as defined in "—*Toggle Notes*").

Relationship with AMP

We indirectly hold 76.04% of the ordinary shares and 100% of the preferred shares of AMP through our wholly owned subsidiary, Ardagh Investments Holdings Sarl. We continue to exercise control over the composition of the board of directors of AMP and any other action requiring the approval of its shareholders.

Business Combination Agreement

On February 22, 2021, GHV, AMP, AGSA and MergeCo entered into the Business Combination Agreement pursuant to which the Business Combination was consummated and, following the Merger of GHV with and into MergeCo, GHV became a direct wholly owned subsidiary of AMP.

In connection with the consummation of the Business Combination, AGSA (i) retained an approximate 81.85% interest in AMP, (ii) received aggregate cash consideration of $2,315 million, paid upon the consummation of the AMP Transfer in cash and in equivalent U.S. dollars or euros (or a combination thereof) and $997 million, paid in cash at the closing of the Merger, and (c) has the right to receive, during the five-year period commencing 180 days after the closing of the Merger, up to 60,730,000 additional AMP common shares in five equal installments if the price of AMP common shares maintains for a certain period of time a volume weighted average price greater than or equal to $13.00, $15.00, $16.50, $18.00 and $19.50, as applicable.

The Business Combination Agreement contains customary representations and warranties, covenants, closing conditions, termination provisions and other terms relating to the transactions contemplated thereby.

Transfer Agreement

On February 22, 2021, AGSA and AMP entered into a Transfer Agreement, pursuant to which AGSA agreed to effect the AMP Transfer through a series of transactions that resulted in, among other things, AMP owning the AMP Business prior to April 1, 2021. The AMP Transfer was consummated on April 1, 2021.

The Transfer Agreement requires AMP to indemnify AGSA and its affiliates for losses arising from AMP's business (including employee liabilities) and requires AGSA to indemnify AMP for losses arising from the Ardagh

Group's business (including employee liabilities). The Transfer Agreement provides for other transactions, including the settlement of intercompany payables and receivables and the termination or transfer of various obligations and liabilities (including credit and support obligations) of the AMP Entities in favor of the Ardagh Group's business, and of the Ardagh Group in favor of the AMP's business.

In addition, the Transfer Agreement contains non-competition and employee non-solicitation obligations of both AMP and AGSA. For a period commencing at April 1, 2021 and ending on the earlier of (i) April 1, 2026 or (ii) the date on which AGSA no longer is the beneficial owner of more than 50% of the voting stock of AMP, AGSA and its subsidiaries (excluding any AMP Entity) will not engage in AMP's business as conducted on the date of the Transfer Agreement with the exception of services provided under the Services Agreement (as defined below), and AMP and its subsidiaries will not engage in the Ardagh Group's businesses as conducted on the date of the Transfer Agreement with the exception of services provided under the Services Agreement. For a period commencing at April 1, 2021 and ending on the earlier of (i) the second anniversary of the closing of the Merger or (ii) the date on which AGSA no longer is the beneficial owner of more than 50% of the voting stock of AMP, none of AGSA or its subsidiaries (excluding any AMP Entity) will solicit for employment or hire any AMP Employee (as defined in the Transfer Agreement) with an annual base salary or wages greater than €150,000, subject to certain exceptions. Similarly, for the same period, none of AMP or its subsidiaries will solicit for employment or hire any employee of the Ardagh Group with an annual base salary or wages greater than €150,000, subject to certain exceptions.

Services Agreement

In connection with the AMP Transfer, AGSA and AMP entered into a Services Agreement, pursuant to which AGSA, either directly or indirectly through its affiliates, shall provide certain corporate and business-unit services to AMP and its subsidiaries, and AMP, either directly or indirectly through its affiliates, shall provide certain corporate and business-unit services to AGSA and its affiliates (other than the AMP Entities). The services provided pursuant to the Services Agreement include typical corporate functional support areas in order to complement the activities in areas which exist within the AMPSA Group (as defined in the Services Agreement). For each calendar year from 2021 through 2024, as consideration for the corporate services provided by AGSA, AMP has incurred an expense from AGSA of $33 million for the calendar year 2021 (prorated to reflect the timing of the completion of the AMP Transfer), and will incur an expense from AGSA of $38 million for calendar year 2022, $39 million for calendar year 2023 and $39 million for calendar year 2024. The fees for services pursuant to the Services Agreement are subject to adjustment for third party costs and variations for certain volume-based services. As of December 31, 2024, or if earlier, the date upon which AMP or AGSA undergoes a change of control, all corporate services provided pursuant to the Services Agreement will be provided at a price equal to the fully allocated cost of such services, or such other price to be negotiated in good faith by the parties, taking into consideration various factors, including the cost of providing such corporate services and the level of services expected to be provided.

Shareholders Agreement

In connection with the completion of the Merger, AGSA and AMP entered into the Shareholders Agreement, pursuant to which, among other things, AGSA has the right to nominate nine directors to the AMP's board of directors, of whom (i) one will initially be the current Chief Executive Officer of AGSA, who will serve as chairperson of the board; and (ii) at least three shall satisfy the independence requirements of NYSE. Two independent directors will be appointed upon proposal for nomination by the GHV Sponsor as Class I directors pursuant to the terms of the Business Combination Agreement. In addition, for so long as AGSA holds at least 20% of the outstanding Shares, AGSA will also have the right to: (A) nominate a number of directors to the AMP's board of directors at least proportional to the number of outstanding Shares owned by AGSA; (B) designate the chairperson of the board of directors of AMP (who need not be a nominee of AGSA); and (C) appoint a number of representatives to each committee of the board of AMP that is at least proportional to the number of outstanding AMP common shares owned by AGSA. In addition, for so long as AGSA holds at least 40% of the outstanding AMP common shares, the following actions may not be taken (or agreed to be taken) by AMP without the prior written consent of AGSA: (a) the sale of greater than 40% of the assets or voting securities of AMP (with certain exceptions); (b) voluntary liquidation or dissolution of AMP; (c) any amendment of AMP's Articles that materially and adversely affects AGSA in its capacity as a shareholder; (d) relocation of AMP's corporate headquarters; (e) change to AMP's corporate name; or (f) any corporate action that would materially adversely affect any of the foregoing approval rights.

Registration Rights and Lock-Up Agreement

In connection with the closing of the Merger, AMP, AGSA, GHV Sponsor, Gores Pipe, LLC and GHV's independent directors (such directors, together with GHV Sponsor and Gores Pipe, LLC, the "Initial Stockholders") entered into the Registration Rights and Lock-Up Agreement, which provides customary demand and piggyback registration rights. Pursuant to the Registration Rights and Lock-Up Agreement, AMP agreed that, as soon as practicable, and in any event within 30 days after the closing of the Merger, which occurred on August 4, 2021, it will file with the SEC (at AMP's sole cost and expense) a registration statement registering the resale of any outstanding AMP common shares or any other equity security held by a party to the Registration Rights and Lock-Up Agreement and any other equity security of AMP issued or issuable with respect to any such AMP common share by way of a dividend or stock split in connection with a combination of shares, recapitalization, merger, consolidation or other reorganization or otherwise, and AMP will use its reasonable efforts to have the registration statement declared effective as soon as practicable after the filing thereof, but no later than the 60th day (or the 90th day if the registration statement is reviewed by, and received comments from, the SEC) following the filing deadline. Such registration statement was declared effective by the SEC on August 23, 2021.

Subject to certain exceptions, including in connection with certain exchanges involving AGSA shareholders, AGSA was not permitted to transfer any AMP common shares beneficially owned or owned of record by it and the Initial Stockholders were not permitted to transfer AMP common share or AMP warrants beneficially owned or owned of record by such Initial Stockholder during certain lock-up periods, which have expired.

Indemnification Letter Agreement

On May 21, 2021, AMP entered into a letter agreement with AGSA, pursuant to which AGSA agreed to indemnify, defend and hold harmless AMP and its subsidiaries and their respective successors from and against any and all losses incurred prior to December 31, 2021 resulting from the cyber security incident that was discovered by AGSA in May 2021. No claim submitted to AGSA after March 31, 2022 is eligible for indemnification pursuant to the letter agreement and in no event will AGSA's aggregate liability for indemnification claims pursuant to the letter agreement exceed $150 million. The letter agreement incorporates by reference, among other things, the limitations on indemnification and procedures for seeking indemnification contained in the Transfer Agreement.

Toggle Notes

In November 2019, the Parent Company issued (i) $1,130 million aggregate principal amount of 6.500% / 7.250% Senior Secured Toggle Notes due 2027 (the "Dollar Toggle Notes"), and (ii) €1,000 million aggregate principal amount of 5.000% / 5.750% Senior Secured Toggle Notes due 2027 (the "Euro Toggle Notes"), collectively, the "Toggle Notes". The Toggle Notes, which were used, inter alia, to redeem the 2023 Toggle Notes, are senior obligations of the Parent Company and are not obligations of ours or of our subsidiaries. However, we expect the Parent Company to direct our affairs so as to comply with the customary covenants and events of default of the Toggle Notes which include restrictions on the Parent Company's ability to incur debt, grant liens and make investments.

Interest on the Toggle Notes is payable entirely in cash, except as set forth below:

If the Cash Available for Debt Service (as defined below) for an interest period:

(i) is equal to or exceeds 75%, but is less than 100% of the aggregate amount of cash interest payable, then the Parent Company may, at its option, elect to pay interest on up to 25% of the then outstanding principal amount of the Toggle Notes by increasing the principal amount of the outstanding Toggle Notes or by issuing additional Toggle Notes in a principal amount equal to such interest ("Parent PIK Interest");

(ii) is equal to or exceeds 50%, but is less than 75%, of the aggregate amount of cash interest payable, then the Parent Company may, at its option, elect to pay interest on up to 50% of the then-outstanding principal amount of the Toggle Notes as Parent PIK Interest;

(iii) is equal to or exceeds 25%, but is less than 50%, of the aggregate amount of cash interest payable, then the Parent Company may, at its option, elect to pay interest on up to 75% of the then outstanding principal amount of the Toggle Notes as Parent PIK Interest; or

(iv) is less than 25% of the aggregate amount of cash interest payable, then the Parent Company may, at its option, elect to pay interest on up to 100% of the then-outstanding principal amount of the Toggle Notes as Parent PIK Interest.

"Cash Available for Debt Service" is defined as the amount equal to the sum (without duplication) of (i) all cash and cash equivalents held at the Parent Company, subject to certain exceptions and (ii) the maximum amount of all dividends and other distributions that would be lawfully permitted to be paid to the Parent Company, if any, for the purpose of paying cash interest by all of the Parent Company's restricted subsidiaries after giving effect to all corporate, shareholder or other comparable actions (including fiduciary and other directors' duties) required in order to make such payment, requirements under applicable law and all restrictions or limitations on the ability to make such dividends or distributions that are otherwise permitted by certain restrictive covenants and provisions in financing or other contractual arrangements of our subsidiaries.

To facilitate making certain transactions in compliance with covenants of the Toggle Notes, the Parent Company may from time to time deposit amounts into an escrow account. These amounts will be applied to fund offers to purchase and redemptions of the Toggle Notes. On January 19, 2022, the Parent Company applied all funds in the escrow account, amounting to $485,242,536.11 (equivalent) to repurchase $234,666,108 of the Dollar Toggle Notes and €204,115,973 of the Euro Toggle Notes at a purchase price equal to 104% of the principal amount of the Toggle Notes being repurchased, plus accrued and unpaid interest to the purchase date.

At any time on or after November 15, 2022, the Parent Company shall redeem the Dollar Toggle Notes and Euro Toggle Notes with the net cash proceeds from certain sales by the Parent Company or certain holding companies of the Parent Company of our common shares at a purchase price of 103.250% for the Dollar Toggle Notes and 102.500% for the Euro Toggle Notes, each with the premium declining annually after November 15, 2022 until par on November 15, 2024, plus accrued and unpaid interest, if any, to the redemption date (excluded).

In an event treated as a change of control, the Parent Company must make an offer to purchase all outstanding Toggle Notes at a redemption price of 101% of the principal amount thereof, plus accrued and unpaid interest, if any, to the date of purchase.

In addition, our Parent Company is required to beneficially own, directly or indirectly, at least 80% of the total voting power and 67% of the economic rights, in our common shares.

The Toggle Notes issued by the Parent Company are secured by pledge on all our issued qualified Class B common shares.

Other Related Party Transactions

For additional information, see "*Note 27 – Related Party transactions and information*" to the audited consolidated financial statements included elsewhere in this annual report. There have been no material related party transactions in the period since the date of approval of the financial statements included elsewhere in this annual report.

Notes to the Consolidated Financial Statements	F-11

Report of Independent Registered Public Accounting Firm

To the Board of Directors of Ardagh Group S.A.

Opinion on the Non-Statutory Consolidated Financial Statements

We have audited the accompanying consolidated statement of financial position of Ardagh Group S.A. and its subsidiaries (the "Company") as of 31 December 2022 and 2021, and the related consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the years then ended, including the related notes (collectively referred to as the "non-statutory consolidated financial statements"). In our opinion, the non-statutory consolidated financial statements present fairly, in all material respects, the financial position of the Company as of 31 December 2022 and 2021, and the results of its operations and its cash flows for the years then ended in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

These non-statutory consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's non-statutory consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the relevant ethical requirements relating to our audit, which include the Code of Ethics issued by Chartered Accountants Ireland ("CAI").

We conducted our audits of these non-statutory consolidated financial statements in accordance with the auditing standards of the PCAOB and in accordance with the ethical requirements of the Code of Ethics issued by CAI. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the non-statutory consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the non-statutory consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the non-statutory consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the non-statutory consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the non-statutory consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the non-statutory consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the non-statutory consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Goodwill Impairment Assessment for the Glass Packaging North America Cash Generating Unit

As described in Note 8 to the non-statutory consolidated financial statements, an impairment charge of $165 million before the impact of deferred tax, was recognized in the year ended December 31, 2022 in respect of the goodwill in Ardagh Glass Packaging North America. The Company performs its impairment test of goodwill annually following approval of the annual budget or whenever indicators suggest that impairment may have occurred. The Company uses the fair value less costs of disposal ("FVLCD") model for the purposes of its annual goodwill impairment test. Management has determined the recoverable amount of the Glass Packaging North America Cash Generating Unit ("CGU") by assessing the FVLCD of the underlying assets using a market approach, on the basis that this gave a higher recoverable amount than an assessment based on Value in Use. The key assumptions applied in the FVLCD calculation for the Ardagh Glass Packaging North America CGU are, by their nature, subjective and include, adjustments to forecasted full year 2023 Adjusted EBITDA for projected sales price increases and sales volume demand, as part of estimating the projected Adjusted EBITDA from a market participant's perspective and the valuation multiple which a market participant would apply to projected risk Adjusted EBITDA. A multiple of 6.5x was then applied to the market participant projected Adjusted EBITDA, based on comparable companies and market transactions, which was further adjusted for selling costs.

The principal considerations for our determination that performing procedures relating to goodwill impairment assessment for the Glass Packaging North America CGU is a critical audit matter are the significant judgment exercised by management when estimating the recoverable amount of the CGU including determination of significant assumptions of the FVLCD and in calculating the impairment charge. This in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating assumptions including projected sales price increases and sales volume demand and the EBITDA multiple. In addition, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing these procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the non-statutory consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's FVLCD impairment assessment. These procedures also included, among others, testing management's process for developing the recoverable amount; evaluating the appropriateness of the model; testing the completeness and accuracy of underlying data used in the model; and evaluating the significant assumptions used by management, including the projected sales price increases and sales volume demand as part of estimating the projected adjusted EBITDA from a market

participant's perspective, and the EBITDA multiple applied. Evaluating management's significant assumptions involved (i) performing a retrospective comparison of forecasted results to actual past performance, (ii) comparing significant assumptions to external market and industry data where appropriate and possible, and (iii) assessing whether these assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in the evaluation of the EBITDA multiple.

The valuation of customer relationship intangible assets arising from the Consol acquisition

As described in Notes 2 and 25 to the non-statutory consolidated financial statements, on April 29, 2022, the Company acquired Consol, for an equity value of $663 million. The Transaction was accounted for as a business combination and the Company allocated $402 million of the purchase price to the fair value of the acquired customer relationship intangible asset. The Company applied the acquisition accounting principles in IFRS 3 to determine the fair value of the assets and liabilities acquired in Consol acquisition. The determination of the fair value of the customer relationship intangible asset acquired required the use of estimates. Management's key assumptions in determining the fair value of the acquired customer relationship intangible asset included revenue growth rates, EBITDA margins, customer attrition rate and discount rate.

The principal considerations for our determination that performing procedures relating to the valuation of customer relationship intangible assets arising from the Consol acquisition is a critical audit matter are the significant judgment exercised by management when estimating the fair value of the customer relationship intangible assets acquired including in the determination of the key assumptions. This in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating assumptions including, revenue growth rates, EBITDA margins, customer attrition rate and discount rate. In addition, the audit effort involved the use of professionals with specialized skill and knowledge to assist in performing these procedures and evaluating the audit evidence obtained.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the non-statutory consolidated financial statements. These procedures included, among others, testing management's process for developing the fair value estimates of the customer relationship intangible assets; testing the completeness and accuracy of underlying data used in the estimate; and evaluating the significant assumptions used by management, including the revenue growth rates, EBITDA margins, customer attrition rate, discount rate for the acquired customer relationship intangible asset. Evaluating management's significant assumptions involved (i) performing a retrospective comparison of forecasted results to actual past performance, (ii) comparing significant assumptions to external market and industry data where appropriate and possible, and (iii) assessing whether these assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in the evaluation of the fair value of the customer relationship intangible assets.

Use of this report

This report, including the opinion, has been prepared for and only for the company’s directors as a body in accordance with our engagement letter dated January 27, 2023 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come, including without limitation under any contractual obligations of the company, save where expressly agreed by our prior consent in writing.

ARDAGH GROUP S.A.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information

Ardagh Group S.A. (the "Company") was incorporated in Luxembourg on May 6, 2011. The Company's registered office is 56, rue Charles Martel, L-2134 Luxembourg, Luxembourg.

Ardagh Group S.A. and its subsidiaries (together the "Group" or "Ardagh") are a leading supplier of sustainable innovative, value-added rigid packaging solutions. The Group's products include metal beverage cans and glass containers, primarily for beverage and food markets. End-use categories include beer, wine, spirits, carbonated soft drinks, energy drinks, juices and water, as well as food and pharmaceuticals. The Group operates 65 packaging facilities globally, located in the Americas, Europe and Africa.

On February 22, 2021, the Company announced its entry into a business combination agreement (the "Business Combination Agreement"), by and among others, the Company, Ardagh Metal Packaging S.A. ("AMP"), Ardagh MP MergeCo Inc., a wholly-owned subsidiary of AMP ("MergeCo") and Gores Holdings V Inc. ("Gores Holdings V"), pursuant to which the parties thereto agreed to effect the merger of MergeCo with and into Gores Holdings V, with Gores Holdings V being the surviving corporation as a wholly-owned subsidiary of AMP (the "Merger", and, together with the other transactions contemplated in the Business Combination Agreement, the "Business Combination") to create an independent, pure-play beverage can Company, whose ordinary shares are listed on the New York Stock Exchange (the "NYSE") under the ticker symbol "AMBP."

On September 7, 2021, the Company launched an exchange offer, pursuant to which it offered 2.5 shares of AMP in exchange for each Class A common share of the Company that was validly tendered and not withdrawn at the closing of the exchange offer on October 5, 2021. On October 6, 2021, the Company filed a Form 25 with the U.S. Securities and Exchange Commission (the "SEC") to voluntarily delist its Class A common shares from the NYSE and the Class A common shares were suspended from trading on the NYSE on October 6, 2021. Following delisting of the Class A common shares, on October 18, 2021, the Company filed a Form 15 with the SEC to terminate the registration of its Class A common shares under Section 12(g) of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act"), resulting in the automatic suspension of the Company's reporting obligations under Sections 13(a) and 15(d) of the Exchange Act.

As at December 31, 2022, the Company indirectly holds 76.04% of the ordinary share capital (Class A common shares) in AMPSA, its metal packaging business and 100% of the preferred shares in AMP, its metal packaging business, through its wholly-owned subsidiary, Ardagh Investments Holdings Sarl. AMP is a leading supplier of beverage cans globally, with a particular focus on the Americas and Europe. This business supplies sustainable and infinitely recyclable metal packaging to a diversified customer base of leading global, regional and national beverage producers. The Group's metal packaging business operates 24 production facilities in Europe and the Americas, employs approximately 6,300 people and recorded revenues of $4.7 billion in 2022.

The Company also holds approximately 42% in Trivium Packaging B.V. ("Trivium"), a leading supplier of metal packaging in the form of cans and aerosol containers, serving a broad range of end-use categories, principally including food, seafood, pet food and nutrition, as well as beauty and personal care. Trivium recorded revenues of $3.3 billion in 2022.

On April 29, 2022, the Group acquired Consol Holdings Proprietary Limited, the leading producer of glass packaging on the African continent, for an equity value of ZAR10.1 billion ($663 million). Please refer to Note 25 – Business Combinations for further details regarding the acquisition.

The Group does not have any operations within Russia or Ukraine and continues to monitor and comply with the various sanctions administered by the U.S. Department of the Treasury's Office of Foreign Assets Control, the European Union, the United Kingdom and the United Nations Security Committee that have been imposed on the Russian government and certain Russian entities and individuals.

The Group has assessed the impact of the current macroeconomic environment in the preparation of the consolidated financial statements.

These consolidated financial statements reflect the consolidation of the legal entities forming the Group for the periods presented. The principal operating subsidiaries forming the Group are listed in Note 27 – Related party transactions and information.

The principal accounting policies that have been applied to the consolidated financial statements are described in Note 2 – Summary of significant accounting policies.

2. Summary of significant accounting policies

Basis of preparation

The consolidated financial statements of the Group have been prepared in accordance with, and are in compliance with, International Financial Reporting Standards ("IFRS") and related interpretations as adopted by the International Accounting Standards Board ("IASB"). IFRS is comprised of standards and interpretations approved by the IASB and IFRS and interpretations approved by the predecessor International Accounting Standards Committee that have been subsequently approved by the IASB and remain in effect. References to IFRS hereafter should be construed as references to IFRS as adopted by the IASB.

The consolidated financial statements, are presented in U.S. dollar, rounded to the nearest million and have been prepared under the historical cost convention except for the following:

- Private and public warrants are stated at fair value (see Note 21 – Provisions and other liabilities);
- derivative financial instruments are stated at fair value; and
- employee benefit obligations are measured at the present value of the future estimated cash flows related to benefits earned and pension assets valued at fair value.

The preparation of consolidated financial information in conformity with IFRS requires the use of critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and income and expenses. It also requires management to exercise judgment in the process of applying Group accounting policies. These estimates, assumptions and judgments are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances and are subject to continual re-evaluation. However, actual outcomes may differ from these estimates. Areas involving a higher degree of judgment or complexity, or where assumptions and estimates are significant to the consolidated financial statements are discussed in the critical accounting estimates, assumptions and judgments.

The consolidated financial statements for the Group were authorized for issue by the board of directors of Ardagh Group S.A. (the "Board") on February 22, 2023.

Going concern

At the date that the audited consolidated financial statements were approved for issue by the Board, the Board has formed the judgment that there is a reasonable expectation that the Group will have adequate resources to continue in operational existence for the foreseeable future. Accordingly, these audited consolidated financial statements have been prepared on a going concern basis. In assessing whether the going concern assumption is appropriate, the Board has taken into account all available information about a period, extending to at least, December 31, 2023. In arriving at its conclusion, the Board has taken account of the Group's current and anticipated trading performance, together with current and anticipated levels of cash and net debt and the availability of committed borrowing facilities and, as a result, it is the Board's judgment that it is appropriate to prepare the audited consolidated financial statements on a going concern basis.

Recently adopted accounting standards and changes in accounting policies

The impact of new standards, amendments to existing standards and interpretations issued and effective for annual periods beginning on or after January 1, 2022 have been assessed by the Board and as a result, no new standards or amendments to existing standards effective January 1, 2022 have had a material impact for the Group.

Recent accounting pronouncements

The Board's assessment of the impact of new standards, which are not yet effective and which have not been early adopted by the Group, on the consolidated financial statements and disclosures is on-going but is not expected to have a material impact for the Group.

Basis of consolidation

(i) Subsidiaries

Subsidiaries are fully consolidated from the date on which control is transferred to the Group and are de-consolidated from the date on which control ceases. Subsidiaries are all entities over which the Group has control. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity.

The acquisition method of accounting is used to account for the acquisition of subsidiaries by the Group. The cost of an acquisition is the consideration given in exchange for control of the identifiable assets, liabilities and contingent liabilities of the acquired legal entities. Acquisition-related costs are expensed and included as exceptional items within sales, general and administration expenses. The acquired net assets are initially measured at fair value. The excess of the cost of acquisition over the fair value of the identifiable net assets acquired is recorded as goodwill. Any goodwill and fair value adjustments are recorded as assets and liabilities of the acquired legal entity in its functional currency. If the cost of acquisition is less than the fair value of the Group's share of the net assets of the legal entity acquired, the difference is recognized directly in the consolidated income statement. The Group considers obligations of the acquiree in a business combination that arise as a result of the change in control, to be cash flows arising from obtaining control of the controlled entity, and classifies these obligations as investing activities in the consolidated statement of cash flows.

(ii) Non-controlling interests

Non-controlling interests represent the portion of the equity of a subsidiary which is not attributable to the Group. Non-controlling interests are presented separately in the consolidated financial statements. Changes in ownership of a subsidiary which do not result in a change in control are treated as equity transactions. For further details please refer to Note 24 – Non-controlling interests.

(iii) Transactions eliminated on consolidation

Transactions, balances and unrealized gains or losses on transactions between Group companies are eliminated. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

Foreign currency

(i) Functional and presentation currency

The functional currency of the Company is euro. The consolidated financial statements are presented in U.S. dollar which is the Group's presentation currency.

(ii) Foreign currency transactions

Items included in the financial statements of each of the Group's entities are measured using the functional currency of that entity.

Transactions in foreign currencies are translated into the functional currency at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognized in the consolidated income statement, except: (i) differences on foreign currency borrowings that provide an effective hedge against a net investment in a foreign entity ("net investment hedges"), which are taken to other comprehensive income until the disposal of the net investment, at which time they are recognized in the consolidated income statement; and (ii) differences on certain derivative financial instruments discussed under "Derivative financial instruments" below.

(iii) Financial statements of foreign operations

The assets and liabilities of foreign operations are translated into euro at foreign exchange rates ruling at the reporting date. The revenues and expenses of foreign operations are translated to euro at average exchange rates for the year, except for entities in hyperinflationary economies that are translated at the foreign exchange rate ruling at the reporting date. Gains or losses accumulated in other comprehensive income are recycled to the consolidated income statement when the foreign operation is disposed of.

Non-monetary items measured at fair value in foreign currency are translated using the exchange rates as at the date when the fair value is determined.

(iv) Hyperinflationary Economies

When the economy of a country in which the Group operates is deemed hyperinflationary and the functional currency of a Group entity is the currency of that hyperinflationary economy, the financial statements of such Group entities are adjusted so that they are stated in terms of the measuring unit currency at the end of the reporting period. This is the case for the Group's subsidiary in Ethiopia. Revenue and expenses are restated to reflect changes in the general price index from the start of the reporting period, and non-monetary items are restated in the balance sheet to reflect current purchasing power as at the period end using a general price index from the date when they were first recognized. The gain or loss on the net monetary position for the year is presented in net finance income/expense. Comparative amounts are not adjusted. The restated income, expenses and balance sheets are translated to U.S. dollar at the closing rate at the end of the reporting period. Differences arising on translation to U.S. dollar are recognized in other comprehensive income.

Business combinations and goodwill

All business combinations are accounted for by applying the acquisition method of accounting. This involves measuring the cost of the business combination and allocating, at the acquisition date, the cost of the business combination to the assets acquired and liabilities assumed. Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in sales, general and administration expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Any contingent consideration is recognized at fair value at the acquisition date.

Goodwill represents the excess of the cost of an acquisition over the fair value of the net identifiable assets acquired at the date of acquisition.

Goodwill is stated at cost less any accumulated impairment losses. Goodwill is allocated to those groups of cash-generating units ("CGUs") that are expected to benefit from the business combination in which the goodwill arose

for the purpose of assessing impairment. Goodwill is tested annually for impairment or whenever indicators suggest that impairment may have occurred.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

Joint arrangements

(i) Joint ventures

The Group participates in a number of joint ventures where control is shared with one or more other parties. The Group's investment and share of results of joint ventures are shown within single line items in the consolidated statement of financial position and consolidated income statement respectively. The Group uses the equity method of accounting to account for its joint ventures. See Note 11 "Investment in equity accounted joint venture" of the consolidated financial statements.

Intangible assets

Intangible assets are initially recognized at cost.

Intangible assets acquired as part of a business combination are capitalized separately from goodwill if the intangible asset is separable or arises from contractual or other legal rights. They are initially recognized at cost which, for intangible assets arising in a business combination, is their fair value at the date of acquisition.

Subsequent to initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. The carrying values of intangible assets with finite useful lives are reviewed for indicators of impairment at each reporting date and are subject to impairment testing when events or changes in circumstances indicate that the carrying values may not be recoverable.

The amortization of intangible assets is calculated to write off the book value of finite lived intangible assets over their useful lives on a straight-line basis on the assumption of zero residual value. Management estimates the useful lives within the following ranges:

Computer software	2 - 7 years
Customer relationships	5 - 15 years
Technology	5 - 15 years

(ii) Computer software

Computer software development costs are recognized as assets. Costs associated with maintaining computer software programs are recognized as an expense as incurred.

(iii) Customer relationships

Customer relationships acquired in a business combination are recognized at fair value at the acquisition date. Customer relationships have a finite useful economic life and are carried at cost less accumulated amortization.

(iv) Technology

Technology based intangibles acquired in a business combination are recognized at fair value at the acquisition date and reflect the Group's ability to add value through accumulated technological expertise surrounding product and process development.

(v) Research and development costs

Research costs are expensed as incurred. Development costs relating to new products are capitalized if the new product is technically and commercially feasible. All other development costs are expensed as incurred.

Property, plant and equipment

(i) Owned assets

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses, except for land which is shown at cost less impairment. Spare parts which form an integral part of plant and machinery and which have an estimated useful economic life greater than one year are capitalized. Spare parts which do not form an integral part of plant and machinery and which have an estimated useful economic life less than one year are included as consumables within inventory and expensed when utilized.

Where components of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

(ii) Leased assets

At the lease commencement date or the effective date of a lease modification, the Group recognizes a lease liability as the present value of expected future lease payments, discounted at the Group's incremental borrowing rate unless the rate implicit in the lease is readily determinable, excluding any amounts which are variable based on the usage of the underlying asset and a right-of-use asset generally at the same amount plus any directly attributable costs. The incremental borrowing rate is the discount rate the Group would have to pay to borrow, over a similar term and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The Group combines lease and non-lease components and accounts for them as a single lease component with the exception of the dunnage asset class. Extension options or periods after termination options are considered by management if it is reasonably certain that the lease will be extended or not terminated.

(iii) Subsequent costs

The Group recognizes in the carrying amount of an item of property, plant and equipment, the cost of replacing the component of such an item when that cost is incurred, if it is probable that the future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. When a component is replaced the old component is de-recognized in the period. All other costs are recognized in the consolidated income statement as an expense as incurred. When a major overhaul is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria above are met.

(iv) Depreciation

Depreciation of owned assets is charged to the consolidated income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Land is not depreciated. The estimated useful lives are as follows:

Buildings	30 - 40 years
Plant and machinery including molds	2 - 40 years
Office equipment, vehicles and other including dunnage	3 - 25 years

Right-of-use assets are depreciated on a straight-line base over the shorter of its useful life and the lease term. Where the lease contains a transfer of ownership or a purchase option which is reasonably certain to be exercised, the right-of-use asset is depreciated over the useful life of the underlying asset.

Assets' useful lives and residual values are adjusted if appropriate, at each balance sheet date.

Impairment of non-financial assets

Assets that have an indefinite useful economic life are not subject to amortization and are tested annually for impairment or whenever indicators suggest that impairment may have occurred. Assets that are subject to depreciation and amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount.

For the purposes of assessing impairment, assets excluding goodwill and long-lived intangible assets, are grouped at the lowest levels at which cash flows are separately identifiable. Goodwill and long-lived intangible assets are allocated to groups of CGUs. The groupings represent the lowest level at which the related assets are monitored for internal management purposes.

Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

The recoverable amount of assets is the greater of their fair value less costs to dispose and value in use. In assessing fair value less costs to dispose, management uses a market approach, applying a multiple to Adjusted EBITDA for the year ended December 31, 2022. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the CGU to which the asset belongs.

Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the first-in, first-out basis and includes expenditure incurred in acquiring the inventories and bringing them to their current location and condition. In the case of finished goods and work-in-progress, cost includes direct materials, direct labor and attributable overheads based on normal operating capacity.

Net realizable value is the estimated proceeds of sale less all further costs to completion, and less all costs to be incurred in marketing, selling and distribution.

Spare parts which are deemed to be of a consumable nature, are included within inventories and expensed when utilized.

Non-derivative financial instruments

Non-derivative financial instruments comprise trade and other receivables, cash and cash equivalents and restricted cash, borrowings, trade and other payables and private and public warrants (see Note 21 – Provisions and other liabilities). Non-derivative financial instruments are recognized initially at fair value plus any directly attributable transaction costs, except as described below. Subsequent to initial recognition, non-derivative financial instruments are measured as described below.

(i) Trade and other receivables

Trade and other receivables are recognized initially at the transaction price and are, thereafter measured at amortized cost using the effective interest rate method less any provision for impairment, in accordance with the Group's held to collect business model. The Group uses estimates based on expected credit losses and current information in determining the level of debts for which a specific allowance for impairment is required. For all other trade receivables, the Group uses an allowance matrix to measure the expected credit loss, based on historical actual credit loss experience, adjusted for forward-looking information.

(ii) Securitized assets

The Group has entered into securitization transactions involving certain of its trade receivables. The securitized assets are recognized on the consolidated statement of financial position, until all of the rights to the cash flows from those assets have expired or have been fully transferred outside the Group, or until substantially all of the related risks, rewards and control of the related assets have been transferred to a third party.

The Group has also entered into a Global Asset Based Loan Facility ("ABL") involving certain of its trade receivables and inventory. The lenders under the ABL have security over those receivables, inventory and the bank accounts where the associated cash flows are received. The risks, rewards and control of these assets are still retained by the Group and are, therefore, recognized on the statement of financial position.

(iii) Contract assets

Contract assets represent revenue required to be accelerated or recognized over time based on production completed in accordance with the Group's revenue recognition policy (as set out below). A provision for impairment of a contract asset will be recognized using an allowance matrix to measure the expected credit loss, based on historical actual credit loss experiences, adjusted for forward-looking information.

(iv) Cash and cash equivalents and restricted cash

Cash and cash equivalents and restricted cash include cash on hand and call deposits held with banks and restricted cash. Cash and cash equivalents and restricted cash are carried at amortized cost.

Short term bank deposits of greater than three months' maturity which do not meet the definition of cash and cash equivalents and restricted cash are classified as financial assets within current assets and stated at amortized cost.

Restricted cash comprises cash held by the Group which is ring-fenced or used as security for specific financing arrangements, and to which the Group does not have unfettered access. Restricted cash is measured at amortized cost.

(v) Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the Group's consolidated income statement over the period of the borrowings using the effective interest rate method.

Borrowings are classified as current liabilities unless the Group, has an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

(vi) Trade and other payables

Trade and other payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method.

Derivative financial instruments

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value at each reporting date. The method of recognizing the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

The fair values of various derivative instruments used for hedging purposes are disclosed in Note 19 – Financial assets and liabilities. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged item is more than 12 months and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives are classified as a current asset or liability.

(i) Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognized in other comprehensive income, allocated between cash flow hedge gains or losses and cost of hedging gains or losses. For cash flow hedges which subsequently result in the recognition of a non-financial asset, the amounts accumulated in the cash flow hedge reserve are reclassified to the asset in order to adjust its carrying value. Amounts accumulated in the cash flow hedge reserve and cost of hedging reserve, or as adjustments to carrying value of non-financial assets, are recycled to the consolidated income statement in the periods when the hedged item will affect profit or loss.

The gain or loss relating to the ineffective portion is recognized immediately in the consolidated income statement. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing at that time remains in equity and is recognized in the consolidated income statement when the forecast cash flow arises. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the consolidated income statement.

(ii) Net investment hedges

Derivative financial instruments are classified as net investment hedges when they hedge changes in the Group's net investments in its subsidiaries due to exposure to foreign currency. Net investment hedges are accounted for in a similar manner to cash flow hedges. The gain or loss relating to the ineffective portion of a net investment hedge is recognized immediately in the consolidated income statement within finance income or expense.

(iii) Fair value hedges

Derivative financial instruments are classified as fair value hedges when they hedge the Group's exposure to changes in the fair value of a recognized asset or liability. Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the Group's consolidated income statement, together with any changes in the fair value of the hedged item that is attributable to the hedged risk. Changes in the fair value of derivatives relating to the cost of hedging are recognized in other comprehensive income.

The gain or loss relating to the effective portion of derivatives with fair value hedge accounting is recognized in the consolidated income statement within "net finance expense". The gain or loss relating to the ineffective portion is also recognized in the consolidated income statement within "net finance expense". If a hedge no longer meets the criteria for

hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest rate method is used is amortized to profit or loss over the period to maturity.

When a hedging instrument expires or is sold, or when a fair value hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing at that time remains in equity and is recognized in the consolidated income statement when the forecast cash flow arises. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the consolidated income statement.

Fair value measurement

The Group measures financial instruments such as derivatives and pension assets at fair value at each balance sheet date. Fair value related disclosures for financial instruments and pension assets that are measured at fair value or where fair values are disclosed, are summarized in the following notes:

- Disclosures of valuation methods, significant estimates and assumptions (Notes 19 – Financial assets and liabilities and 20 – Employee benefit obligations)
- Quantitative disclosures of fair value measurement hierarchy (Note 19 – Financial assets and liabilities)
- Financial instruments (including those carried at amortized cost) (Note 19 – Financial assets and liabilities)
- Private and public warrants (Note 21 – Provisions and other liabilities)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability; or
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

Employee benefits

(i) Defined benefit pension plans

Typically, defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognized in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the reporting date less the fair value of plan assets. The

defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Past service costs and past service credits are recognized immediately in the consolidated income statement.

(ii) Other long term employee benefits

The Group's obligations in respect of other long term employee benefit plans represents the amount of future benefit that employees have earned in return for service in the current and prior periods for post-retirement medical schemes, partial retirement contracts and long service awards. These are included in the category of employee benefit obligations on the consolidated statement of financial position. The obligation is computed on the basis of the projected unit credit method and is discounted to present value using a discount rate equating to the market yield at the reporting date on high quality corporate bonds of a currency and term consistent with the currency and estimated term of the obligations. Actuarial gains and losses are recognized in full in the Group's consolidated statement of comprehensive income in the period in which they arise.

(iii) Defined contribution plans

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The contributions are recognized as employee benefit expense when they are due.

Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and the amount can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

Revenue recognition

Our products include metal and glass containers primarily for beverage and food markets, where demand is consumer-driven. In addition to metal beverage cans, within the Ardagh Metal Packaging Europe and Ardagh Metal Packaging Americas reportable segments, the Group manufactures and supplies a wide range of can ends. Containers and ends are distinct items and can be sold separately from each other. A significant portion of our sales volumes is supplied under contracts which include input cost pass-through provisions.

The Group usually enters into framework agreements with its customers, which establish the terms under which individual orders to purchase goods or services may be placed. As the framework agreements do not identify each party's rights regarding the goods or services to be transferred, they do not create enforceable rights and obligations on a stand-alone basis. Therefore, the Group has concluded that only individual purchase orders create enforceable rights and obligations and meet the definition of a contract. The individual purchase orders have, in general, a duration of one year or less and, as such, the Group does not disclose any information about remaining performance obligations under these contracts. The Group's payment terms are in line with customary business practice, which can vary by customer and region. The Group has availed of the practical expedient from considering the existence of a significant financing component as, based on past experience, we expect that, at contract inception, the period between when a promised good is transferred to the customer and when the customer pays for that good will be one year or less.

Revenue is recognized when control of a good or service has transferred to the customer. For certain contracts in the Ardagh Metal Packaging Europe and Ardagh Metal Packaging Americas reportable segments, the Group manufactures products for customers that have no alternative use and for which the Group has an enforceable right to payment for production completed to date. The Group has concluded that it has such enforceable right to payment plus a reasonable margin once it receives an individual purchase order. Therefore, for such products that have no alternative use and where an enforceable right to payment exists, the Group will recognize revenue over time based on the units produced output method such that a portion of revenue, net of any related estimated rebates and cash discounts, excluding sales or value added tax, will be recognized prior to the dispatch of goods as the Group satisfies the contractual performance obligations for those contracts. For all other contracts, the Group will continue to recognize revenue primarily on dispatch of the goods, net of any related customer rebates and cash discounts, excluding sales and value added taxes.

The Group often sells products with rebates and cash discounts based on cumulative sales over a period. Such rebate and cash discount consideration is only recognized when it is highly probable that it will not be subsequently reversed and is recognized using the most likely amount depending on the individual contractual terms.

Exceptional items

The Group's consolidated income statement, cash flow and segmental analysis separately identify results before specific items. Specific items are those that, in management's judgment, need to be disclosed by virtue of their size, nature or incidence to provide additional information. Such items include, where significant, restructuring, redundancy and other costs relating to permanent capacity realignment or footprint reorganization, directly attributable acquisition costs and acquisition integration costs, and other transaction-related costs, profit or loss on disposal or termination of operations, start-up costs incurred in relation to and associated with plant builds, significant new line investments or furnaces, major litigation costs and settlements and impairments of non-current assets. In this regard the determination of "significant" as included in our definition uses qualitative and quantitative factors. Judgment is used by the Group in assessing the particular items, which by virtue of their scale and nature, are disclosed in the Group's consolidated income statement, and related notes as exceptional items. Management considers columnar presentation to be appropriate in the consolidated income statement as it provides useful additional information and is consistent with the way that financial performance is measured by management and presented to the Board. Exceptional restructuring costs are classified as restructuring provisions and all other exceptional costs, when outstanding at the balance sheet date, are classified as exceptional items payable.

Finance income and expense

Finance income comprises interest income on funds invested, gains on disposal of financial assets, ineffective portions of derivative instruments designated as hedging instruments and gains on derivative instruments that are not designated as hedging instruments and are recognized in profit or loss.

Finance expense comprises interest expense on borrowings (including amortization of deferred debt issuance costs), interest cost on leases, certain net foreign currency translation related to financing, net interest cost on net pension plan liabilities, losses on extinguishment of borrowings, ineffective portions of derivative instruments designated as hedging instruments, losses on derivative instruments that are not designated as hedging instruments and are recognized in profit or loss, and other finance expense.

The Group capitalizes borrowing costs directly attributable to the acquisition, construction or production of manufacturing plants that require a substantial period of time to build that would have been avoided if the expenditure on the qualifying asset had not been made.

Costs related to the issuance of new debt are deferred and amortized within finance expense over the expected terms of the related debt agreements using the effective interest rate method.

Income tax

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognized in the consolidated income statement, except to the extent that it relates to items recognized in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are generally not recognized if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Segment reporting

The Board has been identified as the Chief Operating Decision Maker (“CODM”) for the Group.

Operating segments are identified on the basis of the internal reporting regularly provided to the Board in order to allocate resources to the segment and assess its performance.

Critical accounting estimates, assumptions and judgments

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Estimated impairment of goodwill and other long lived assets for Ardagh Glass Packaging North America

In accordance with IAS 36 “Impairment of assets” (“IAS 36”), the Group tests whether goodwill and other long lived assets for Ardagh Glass Packaging North America have suffered any impairment in accordance with the accounting policies stated. The determination of the recoverable amounts of goodwill requires the use of estimates as outlined in Note 8. The Group’s judgments relating to the impairment of goodwill and other long lived assets are included in Notes 8 and 9.

(ii) Income taxes

The Group is subject to income taxes in numerous jurisdictions and judgment is therefore required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where uncertain tax treatments exist, the Group assesses

whether it is probable that a tax authority will accept the uncertain tax treatment applied or proposed to be applied in its income tax filings. The Group assesses for each uncertain tax treatment whether it should be considered independently or whether some tax treatments should be considered together based on what the Group believes provides a better prediction of the resolution of the uncertainty. The Group considers whether it is probable that the relevant authority will accept each uncertain tax treatment, or group of uncertain tax treatments, assuming that the taxation authority with the right to examine any amounts reported to it will examine those amounts and will have full knowledge of all relevant information when doing so.

The Group measures tax uncertainties using its best estimate of likely outcomes. This estimate relies on estimates and assumptions and may involve judgments about future events.

Corporate activity including acquisitions, disposals and reorganizations such as those described in Note 1 – General Information often create tax uncertainties. The Group has determined, with the benefit of opinions from external tax advisors and legal counsel, where appropriate, that it has provided for all taxation liabilities that are probable to arise from such activities.

New information may become available that causes the Group to change its judgment regarding the adequacy of existing tax liabilities. Such changes could result in incremental tax liabilities which could have a material effect on cash flows, financial condition and results of operations.

Where the final tax outcome of these matters is different from the amounts that were originally estimated such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(iii) Measurement of employee benefit obligations

The Group follows guidance of IAS 19(R) to determine the present value of its obligations to current and past employees in respect of defined benefit pension obligations, other long term employee benefits, and other end of service employee benefits which are subject to similar fluctuations in value in the long term. The Group values its liabilities, with the assistance of professional actuaries, to ensure consistency in the quality of the key assumptions underlying the valuations. The critical assumptions and estimates applied are discussed in detail in Note 20 – Employee benefit obligations.

(iv) Exceptional items

The consolidated income statement and segment analysis separately identify results before exceptional items. Exceptional items are those that in our judgment need to be disclosed by virtue of their size, nature or incidence.

The Group believes that this presentation provides additional analysis as it highlights exceptional items. The determination of "significant" as included in our definition uses qualitative and quantitative factors which remain consistent from period to period. Management uses judgment in assessing the particular items, which by virtue of their scale and nature, are disclosed in the consolidated income statement and related notes as exceptional items. Management considers the consolidated income statement presentation of exceptional items to be appropriate as it provides useful additional information and is consistent with the way that financial information is measured by management and presented to the Board. In that regard, management believes it to be consistent with paragraph 85 of IAS 1 "Presentation of financial statements", which permits the inclusion of line items and subtotals that improve the understanding of performance.

(v) Business combinations, goodwill, non-controlling interest and similar transactions

For each transaction the Group will assess the accounting acquirer and acquiree and whether those parties meet the definition of a business under IFRS 3 "Business Combinations" ("IFRS 3"), which could involve significant judgments depending on the structure of the transaction.

Goodwill only arises in business combinations, where both parties meet the definition of a business. The amount of goodwill initially recognized is dependent on the allocation of the purchase price to the fair value of the identifiable assets acquired and the liabilities assumed. The determination of the fair value of the assets and liabilities is based, to a considerable extent, on management's judgment, with the assistance of third-party experts. Allocation of the purchase

price affects the results of the Group as finite lived intangible assets are amortized, whereas indefinite lived intangible assets, including goodwill, are not amortized and could result in differing amortization charges based on the allocation to indefinite lived and finite lived intangible assets.

The determination of the fair value of the customer relationship intangible asset acquired requires the use of estimates as outlined in Note 25- Business Combinations.

A transaction where the accounting acquiree does not meet the definition of a business is not a business combination under IFRS 3, but could be an asset acquisition or a share-based payment transaction under IFRS 2 "Share-based payment" ("IFRS 2"). In the latter case, the difference in the fair value of consideration given by the acquirer over the fair value of identifiable net assets of the acquiree represents a service and is accounted for as a share-based payment expense. In order to estimate such fair values management might need to apply a significant amount of judgment in respect of key assumptions underlying such calculations, as outlined in more detail in Note 21 – Provisions and other liabilities, with regard to private warrants.

Transactions that result in the creation of a non-controlling interest but do not result in a change in control are treated as equity transactions. The Group will apply judgment in electing whether such non-controlling interest should be measured at fair value or at the proportionate share of identifiable net assets. For further details please refer to Note 24 – Non-controlling interests.

Ardagh Group S.A. indirectly holds a stake of 76.04% in AMP, through its wholly owned subsidiary, Ardagh Investments Sarl, with the remaining 23.96% held by external shareholders recognized as non-controlling interest separately within equity.

The Group elected to measure the non-controlling interest at its proportionate share of AMP's net assets at the acquisition date. The non-controlling interest is not remeasured at fair value in subsequent periods, but will be allocated its share of profit or loss and its share of other comprehensive income, including recognizing its portion of the IFRS 2 charge.

The Group's consolidated financial statements separately disclose the non-controlling interest from the parent's interest.

3. Segment analysis

Following the Group's acquisition of Consol (see Note 25 – Business combinations), the composition of the Group's operating and reporting segments changed. This reflects the basis on which the Group performance is reviewed by management and presented to the Board, which has been identified as the CODM for the Group. The following are the Group's four reportable segments:

- Ardagh Metal Packaging Europe
- Ardagh Metal Packaging Americas
- Ardagh Glass Packaging Europe & Africa *
- Ardagh Glass Packaging North America.

* The Group has aggregated the Ardagh Glass Packaging Europe and the new Ardagh Glass Packaging Africa operating segments into the Ardagh Glass Packaging Europe & Africa reportable segment. The nature of the products and services, production processes as well as the type and class of customers and the method of distribution are essentially identical, with similar long-term financial and economic characteristics.

Performance of the business is assessed based on Adjusted EBITDA. Adjusted EBITDA is the loss for the period before income tax charge or credit, net finance expense, depreciation and amortization, exceptional operating items and share of profit or loss in equity accounted joint venture. Other items are not allocated to segments, as these are reviewed

by the CODM on a group-wide basis. Segmental revenues are derived from sales to external customers. Inter-segment revenue and revenue with joint ventures are not material.

Reconciliation of loss for the year to Adjusted EBITDA

	Year ended December 31,	
	2022 **$'m**	**2021** **$'m**
Loss for the year	(290)	(766)
Income tax charge/credit (Note 6)	46	(18)
Net finance expense (Note 5)	328	377
Depreciation and amortization (Notes 8 and 9)	809	746
Exceptional operating items (Note 4)	378	851
Share of post-tax (profit)/loss in equity accounted joint venture (Note 11)	(7)	55
Adjusted EBITDA	**1,264**	**1,245**

Segment results for the year ended December 31, 2022 are:

	Ardagh Metal Packaging Europe $'m	**Ardagh Metal Packaging Americas $'m**	**Ardagh Glass Packaging Europe & Africa $'m**	**Ardagh Glass Packaging North America $'m**	**Group $'m**
Revenue	1,963	2,726	2,534	1,807	**9,030**
Adjusted EBITDA	200	425	476	163	**1,264**
Capital expenditure	213	382	335	176	**1,106**
Segment assets (excluding Investment in equity accounted joint venture)	2,754	3,111	3,999	1,665	**11,529**

Segment results for the year ended December 31, 2021 are:

	Ardagh Metal Packaging Europe $'m	**Ardagh Metal Packaging Americas $'m**	**Ardagh Glass Packaging Europe $'m**	**Ardagh Glass Packaging North America $'m**	**Group $'m**
Revenue	1,838	2,217	1,784	1,738	**7,577**
Adjusted EBITDA	281	381	393	190	**1,245**
Capital expenditure	190	496	205	175	**1,066**
Segment assets (excluding Investment in equity accounted joint venture)	2,785	2,540	4,238	2,048	**11,611**

One customer accounted for greater than 10% of total revenue of the Group in 2022 (2021: one).

Capital expenditure is the sum of purchases of property, plant and equipment and intangible assets, net of proceeds from disposal of property, plant and equipment, as per the consolidated statement of cash flows.

Segment assets consist of intangible assets, property, plant and equipment, derivative financial instrument assets, deferred tax assets, employee benefit assets, other non-current assets, inventories, trade and other receivables, contract assets and cash, cash equivalents and restricted cash. The accounting policies of the segments are the same as those in the consolidated financial statements of the Group as set out in Note 2 – Summary of significant accounting policies. Please refer to Note 16 – Cash and cash equivalents and restricted cash for more details.

Total revenue from the Group in countries which account for more than 10% of total revenue, in the current or prior years presented, are as follows:

	Year ended December 31,	
	2022	2021
Revenue	$'m	$'m
United States	3,913	3,394
United Kingdom	997	883

The revenue above is attributed to countries on a destination basis.

Non-current assets, excluding derivative financial instruments, taxes, pensions, investment in material joint venture and goodwill arising on acquisitions in countries which account for more than 10% of non-current assets are the U.S.A. 40% (2021: 44%), Germany 11% (2021: 13%) and the United Kingdom 9% (2021: 12%).

The Company is domiciled in Luxembourg. During the year the Group had revenues of $2 million (2021: $2 million) with customers in Luxembourg. Non-current assets located in Luxembourg were $3 million (2021: $3 million).

Within each reportable segment our respective packaging containers have similar production processes and classes of customers. Further, they have similar economic characteristics, as evidenced by similar profit margins, similar degrees of risk and similar opportunities for growth. Based on the foregoing, we do not consider that they constitute separate product lines and, therefore, additional disclosures relating to product lines are not necessary.

The following illustrates the disaggregation of revenue by destination for the year ended December 31, 2022:

	Europe $'m	North America $'m	Rest of the world $'m	Total $'m
Ardagh Metal Packaging Europe	1,937	10	16	1,963
Ardagh Metal Packaging Americas	–	2,178	548	2,726
Ardagh Glass Packaging Europe & Africa	1,964	28	542	2,534
Ardagh Glass Packaging North America	–	1,805	2	1,807
Group	**3,901**	**4,021**	**1,108**	**9,030**

The following illustrates the disaggregation of revenue by destination for the year ended December 31, 2021:

	Europe $'m	North America $'m	Rest of the world $'m	Total $'m
Ardagh Metal Packaging Europe	1,824	5	9	1,838
Ardagh Metal Packaging Americas	1	1,772	444	2,217
Ardagh Glass Packaging Europe	1,719	12	53	1,784
Ardagh Glass Packaging North America	–	1,737	1	1,738
Group	**3,544**	**3,526**	**507**	**7,577**

The following illustrates the disaggregation of revenue based on the timing of transfer of goods and services:

Exceptional items are those that in management's judgment need to be disclosed by virtue of their size, nature or incidence.

2022

Exceptional items of $358 million have been recognized for the year ended December 31, 2022, primarily comprising:

- $75 million start-up related and other costs primarily in Ardagh Metal Packaging Americas ($40 million) and Ardagh Metal Packaging Europe ($27 million), primarily relating to the Group's investment programs. A further $5 million relating to purchase price accounting in Ardagh Glass Packaging Europe & Africa and $3 million other costs in Ardagh Glass Packaging North America, as a result of extreme weather related disruption.
- $67 million transaction-related and other costs primarily relating to professional advisory and other costs in connection with transformation initiatives in Ardagh Metal Packaging ($14 million), $9 million of foreign currency translation losses relating to the exceptional cost of hedging activities in Ardagh Metal Packaging Americas and transactions in Ardagh Glass Packaging Europe & Africa ($40 million). A further $4 million of costs related to acquisition and transaction costs, including professional advisory fees and other costs across Ardagh Glass Packaging.
- $34 million credit arising in Ardagh Glass Packaging North America from the resolution of a US patent infringement matter, which offsets losses and costs previously incurred in connection with these proceedings.
- $14 million restructuring and other costs in Ardagh Glass Packaging North America and Ardagh Glass Packaging Europe & Africa.
- $12 million relating to IT transformation costs following the 2021 cyber security incident, including professional support fees.
- $244 million impairment of goodwill and customer relationships in Ardagh Glass Packaging North America, as further detailed in Note 8 – Intangible assets.

- $64 million finance income primarily relating to a $42 million gain realized on forward foreign exchange contracts entered into in connection with the acquisition of Consol on April 29, 2022 (as outlined in Note 1- General information), and a $22 million credit related to fair value and foreign currency gains on public and private warrants.
- $27 million from the Group's share of exceptional items arising in Trivium.
- $17 million from tax charges relating to the above exceptional items.

2021

Exceptional items of $844 million have been recognized for the year ending December 31, 2021, primarily comprising:

- $30 million start-up related costs arising in Ardagh Metal Packaging Americas ($21 million) and Ardagh Metal Packaging Europe ($9 million), relating to the Group's investment programs.
- $5 million net costs resulting from the cyber security incident, comprising $34 million of professional support fees and direct incremental costs, partly offset by $29 million of insurance recoverable recorded at December 31, 2021.
- $415 million transaction-related and other costs, comprised of an expense of $205 million relating to the service for the listing of the shares in AMP upon the completion of the Business Combination on August 4, 2021, with the remaining costs relating to business combination, acquisition and other transaction costs, including transaction-related remuneration costs, professional advisory fees, and other costs related to transformation initiatives.
- $3 million restructuring and other costs in Ardagh Glass Packaging North America and Ardagh Glass Packaging Europe.
- $395 million impairment of goodwill in Ardagh Glass Packaging North America, as further detailed in Note 8 – Intangible assets.
- $23 million debt refinancing, and settlement costs related to the redemption of the Group's 6.000% Senior Notes in August 2021 as described in Note 19 – Financial assets and liabilities, including premium payable on the early redemption of the notes and accelerated amortization of deferred finance costs and bond premium.
- $5 million, primarily related to interest payable on AMP Notes Issuance in March 2021 related to the period prior to completion of the AMP transfer on April 1, 2021 and $12 million related to interest charges on the Group's 6.000% Senior Notes from the AMP transfer date, related to the combination of Ardagh Metal Packaging with Gores Holdings V as outlined in Note 1 - General information, to the date of redemption.
- $8 million credit primarily related to entering forward foreign exchange contracts in preparation of the proposed Consol acquisition as outlined in Note 1 - General information.
- $25 million from the share of exceptional items in the Trivium joint venture.
- $64 million from tax credits relating to the above exceptional items.

5. Net finance expense

	Year ended December 31,	
	2022	**2021**
	$'m	**$'m**
Bond and Senior Facilities interest expense*	378	334
Other interest expense	49	42
Related Party interest income	(1)	—
Net interest expense	**426**	**376**
Net pension interest cost	9	11
Foreign currency translation gains	(14)	(10)
Gains on derivative financial instruments	(1)	(28)
Net monetary gain - hyperinflation	(11)	—
Other finance income	(17)	(4)

Net exceptional finance (income)/expense (Note 4)	(64)	32
Net finance expense	**328**	**377**

*Includes interest related to Senior Secured, Senior Secured Green, Senior, Senior Green Notes, Senior Term Facilities A&B and Senior Facility C.

During the year ended December 31, 2022, the Group recognized $28 million (2021: $20 million) related to lease liabilities within other interest expense and interest paid in cash used in operating activities.

6. Income tax

	Year ended December 31,	
	2022	**2021**
	$'m	**$'m**
Current tax:		
Current tax for the year	63	65
Adjustments in respect of prior years	(4)	(8)
Total current tax	**59**	**57**
Deferred tax:		
Deferred tax for the year	(16)	(78)
Adjustments in respect of prior years	3	3
Total deferred tax	**(13)**	**(75)**
Income tax charge/(credit)	**46**	**(18)**

Reconciliation of income tax charge/(credit) and the loss before tax multiplied by the Group's domestic tax rate for 2022 and 2021 is as follows:

	Year ended December 31,	
	2022	**2021**
	$'m	**$'m**
Loss before tax	**(244)**	**(784)**
Loss before tax multiplied by the standard rate of Luxembourg corporation tax: 24.94% (2021: 24.94%)	(61)	(196)
Tax losses for which no deferred income tax asset was recognized	74	23
Re-measurement of deferred taxes	—	12
Adjustment in respect of prior years	(1)	(5)
Income subject to state and other local income taxes	12	11
Income taxed at rates other than standard tax rates	(23)	(20)
Non-deductible and other items	45	157
Income tax charge/(credit)	**46**	**(18)**

The total income tax charge/(credit) outlined above for each year includes a tax charge of $17 million in 2022 (2021: $64 million credit) in respect of exceptional items, being the tax effect of the items set out in Note 4 - Exceptional Items.

Tax losses for which no deferred income tax asset was recognized relates to net operating losses and the carry-forward of interest expense in certain jurisdictions in the year ended December 31, 2022, and to partially tax deductible Business Combination expenses in Luxembourg in the year ended December 31, 2021. Re-measurement of deferred taxes relates to the impact of the substantially enacted change in rate of corporation tax in the United Kingdom in the year ended December 31, 2021. Income taxed at non standard rates takes account of foreign tax rate differences (versus the Luxembourg standard 24.94% rate on earnings).

Non-deductible items in 2022 principally relates to interest expense in Ireland and Luxembourg in the year ended December 31, 2022. In the year ended December 31, 2021, non-deductible items principally relates to transaction costs attributable to the completion of the Business Combination, including the service for listing of the shares in Ardagh Metal Packaging in accordance with IFRS 2, in addition to interest expense in Ireland.

The Group is monitoring the progress of the recent OECD announcements in relation to a two-pillar solution to reform the global corporate international tax system, commonly referred to as the Base Erosion and Profit Shifting 2.0 project ("BEPS 2.0"). While further clarity is required on how the OECD model rules are to be interpreted and implemented, the proposals are not expected to have a material impact on the effective tax rate of the Group.

7. Employee costs

	Year ended December 31,	
	2022	**2021**
	$'m	**$'m**
Wages and salaries	1,432	1,340

Amortization expense of $229 million (2021: $237 million) has been charged to the consolidated income statement of the Group.

Impairment

An impairment charge of $244 million (2021: $395 million) before the impact of deferred tax, was recognized in the year ended December 31, 2022 in respect of the goodwill and customer-relationship intangible in Ardagh Glass Packaging North America. Please refer to the section *Impairment test for Ardagh Glass Packaging North America.*

Aside from that noted above, the Group has considered the carrying value of the Group's intangible assets and assessed for indicators of impairment as at December 31, 2022 in accordance with IAS 36. No such indicators of impairment were identified. The Group has concluded that the potential impact of climate change does not have a significant impact on the carrying value or remaining useful lives of the intangible assets of the Group as of December 31, 2022.

Goodwill

Allocation of goodwill

Goodwill has been allocated to groups of CGUs for the purpose of impairment testing. The groupings represent the lowest level at which the related goodwill is monitored for internal management purposes. Goodwill acquired through business combination activity is allocated to CGUs that are expected to benefit from synergies arising from that combination.

The lowest level within the Group at which the goodwill is monitored for internal management purposes, and consequently the groups of CGUs to which goodwill is allocated, is set out below. The Ardagh Glass Packaging Africa operating segment is included as a CGU as at 31 December 2022. On this basis, the Group's CGUs are identified as follows:

	At December 31,	
	2022	2021
	$'m	$'m
Ardagh Metal Packaging Europe	537	570
Ardagh Metal Packaging Americas	439	440
Ardagh Glass Packaging Europe	58	62
Ardagh Glass Packaging Africa	333	—
Ardagh Glass Packaging North America	—	165
Total Goodwill	**1,367**	**1,237**

Impairment tests for goodwill

The Group performs its impairment test of goodwill annually following approval of the annual budget or whenever indicators suggest that impairment may have occurred.

Recoverable amount and carrying amount

The Group uses the fair value less costs of disposal ("FVLCD") model for the purposes of its annual goodwill impairment test.

In assessing FVLCD, for all CGU's other than Ardagh Glass Packaging North America, management uses a market approach, which includes, as a key assumption, a multiple to Adjusted EBITDA for the year ended December 31, 2022. The multiple used is based on comparable companies and market valuations and was further adjusted for selling costs. The valuation is considered to be level 2 in the fair value hierarchy.

A sensitivity analysis was performed reflecting reasonably possible potential variations in the applied Adjusted EBITDA multiple. If the multiple which was applied to the Adjusted EBITDA for the year ended December 31, 2022, was reduced by 1x, the recoverable amounts calculated for all CGUs other than Ardagh Glass Packaging North America are still significantly in excess of their carrying values. As a result of the significant excess of recoverable amount, management consider that completing the calculation of the recoverable amount for all CGUs other than Ardagh Glass Packaging North America using a value in use ("VIU") model or providing additional disclosures under IAS36 are not required.

In the year ended December 31, 2021, the Group used the VIU model for the purposes of goodwill impairment testing, as this reflected the Group's intention to hold and operate the assets. However, if an impairment indicator existed for a CGU, the Group also used the FVLCD model in order to establish the recoverable amount being the higher of the VIU model and FVLCD model when compared to the carrying value of the CGU.

Impairment test for Ardagh Glass Packaging North America

In 2021, arising out of operational challenges, an impairment of $395 million was recognized in respect of the carrying value of goodwill in the Ardagh Glass Packaging North America CGU. In 2022, management initiated a detailed review of the business in order to address the underperformance of recent years and to determine a route to sustained profitability and cash generation, which led to a review of the carrying amount and remaining useful life of the customer relationship intangible assets in Ardagh Glass Packaging North America and resulted in recognition of an impairment of the entire carrying amount of $79 million. Further, in its assessment of goodwill impairment, as at December 31, 2022, management considered the operational challenges that continued in 2022, in addition to macro economic impacts and management actions around inventory control in the fourth quarter that resulted in reported Adjusted EBITDA for the year December 31, 2022 of $163 million. Management has determined the recoverable amount by assessing the FVLCD of the underlying assets using a market approach, on the basis that this gave a higher recoverable amount than an assessment based on VIU. The valuation is considered to be level 2 in the fair value hierarchy, due to unobservable inputs used in the valuation.

The key assumptions applied in the FVLCD calculation for the Ardagh Glass Packaging North America CGU are, by their nature, subjective and include, adjustments to forecasted full year 2023 Adjusted EBITDA for projected sales price increases and sales volume demand, as part of estimating the projected Adjusted EBITDA from a market participant's perspective and the valuation multiple which a market participant would apply to projected risk-Adjusted EBITDA. A multiple of 6.5x (2021: 6.5x) was applied to the market participant projected risk-Adjusted EBITDA, based on comparable companies and market transactions, which was further adjusted for selling costs. The recoverable amount of $1,069 million was then compared to the carrying value of the Ardagh Glass Packaging North America CGU, resulting in the recognition of an impairment charge of $165 million (before the impact of deferred tax) on goodwill allocated to Ardagh Glass Packaging North America in the year ended December 31, 2022 representing the full write down of goodwill in the Ardagh Glass Packaging North America CGU.

A sensitivity analysis was performed on the FVLCD calculation by increasing and decreasing the projected risk-Adjusted EBITDA from a market participant's perspective by 5%, and increasing and decreasing the multiple which was applied to the projected risk-Adjusted EBITDA from a market participant's perspective by 25 basis points. If the projected risk-Adjusted EBITDA from a market participant's perspective were to decrease by 5%, the impairment charge (before the impact of deferred tax) would increase by an estimated $53 million. If the projected risk-Adjusted EBITDA from a market participant's perspective were to increase by 5%, the impairment charge (before the impact of deferred tax) would decrease by an estimated $53 million. If the multiple which was applied to the projected risk-Adjusted EBITDA from a market participant's perspective were to decrease by 25 basis points, the impairment charge (before the impact of deferred tax) would increase by an estimated $41 million. If the multiple which was applied to the projected risk-Adjusted EBITDA from a market participant's perspective were to increase by 25 basis points, the impairment charge (before the impact of deferred tax) would decrease by an estimated $41 million.

9. Property, plant and equipment

	Land and buildings $'m	Plant and machinery $'m	Office equipment, vehicles and other $'m	Total $'m

At January 1, 2022	(453)	(1,685)	(83)	**(2,221)**
Charge for the year	(118)	(407)	(55)	**(580)**
Disposals	29	231	18	**278**
Exchange	23	79	5	**107**
At December 31, 2022	**(519)**	**(1,782)**	**(115)**	**(2,416)**
Net book value				
At December 31, 2022	**1,144**	**3,514**	**167**	**4,825**

Depreciation expense of $552 million (2021: $490 million) has been charged in cost of sales and $28 million (2021: $19 million) in sales, general and administration expenses.

Construction in progress at December 31, 2022 was $888 million (2021: $797 million) included within plant and machinery.

Included in property, plant and equipment is an amount for land of $214 million (2021: $194 million) and an amount for assets held for sale $1 million (2021: nil).

Substantially all of the Group's property, plant and equipment is pledged as security under the terms and conditions of the Group's financing arrangements. Interest capitalized in the year was $1 million (2021: $1 million).

Impairment

The Group has considered the carrying value of the Group's property, plant and equipment and assessed the indicators of impairment as at December 31, 2022 and 2021, in accordance with IAS 36. No such indicators of impairment were identified. The Group has concluded that the potential impact of climate change does not have a significant impact on the carrying value or remaining useful lives of the property, plant and equipment of the Group as of December 31, 2022.

Right of Use assets – Net Book Value, depreciation and variable lease expense

The following right-of-use assets were included in property, plant and equipment:

Net book value	Land and buildings $'m	Plant and machinery $'m	Office equipment, vehicles and other $'m	Total $'m
At December 31, 2022	306	287	63	**656**
At December 31, 2021	184	146	71	**401**

The increase in the net book value amount of the right-of use assets at December 31, 2022 is primarily the result of total additions to the right-of-use assets of $362 million and an acquisition of $52 million during the year ended December 31, 2022, offset by a depreciation charge of $134 million (Land and buildings: $79 million, Plant and machinery: $39 million, Office equipment, vehicles and other: $16 million), disposals of $8 million and an exchange effect.

The increase in the net carrying amount of the right-of use assets at December 31, 2021 is primarily the result of total additions to the right-of-use assets during the year ended December 31, 2021 of $205 million and an acquisition of $1 million, offset by a depreciation charge of $111 million (Land and buildings: $66 million, Plant and machinery: $30 million, Office equipment, vehicles and other: $15 million), disposals of $2 million and an exchange effect.

During 2022, the Group incurred variable lease expense of $91 million (2021: $72 million), primarily related to warehouse leases.

Capital commitments

The following capital commitments in relation to property, plant and equipment were authorized by management, but have not been provided for in the consolidated financial statements:

	At December 31, 2022 $'m	At December 31, 2021 $'m
Contracted for	440	478
Not contracted for	185	281
	625	**759**

10. Other non-current assets

At December 31, 2022, other non-current assets were $31 million (2021: $28 million), which includes $7 million (2021: $8 million) primarily relating to certain of the Group's investment in its joint ventures.

11. Investment in equity accounted joint venture

Investment in equity accounted joint venture is comprised of the Group's approximate 42% investment in Trivium, which is incorporated in the Netherlands, with corporate offices in Amsterdam. The remaining approximate 58% is held by Ontario Teachers' Pension Plan Board. As the Group jointly controls both the financial and operating policy decisions of Trivium, the investment is accounted for under the equity method. The shareholders of Trivium have entered into a Shareholders Agreement, dated October 31, 2019, which governs their relationship as owners of Trivium, including

in respect of the governance of Trivium and its subsidiaries, their ability to transfer their shares in Trivium and other customary matters.

The following table provides aggregated financial information for Trivium as it relates to the amounts recognized by Ardagh in the consolidated income statement, consolidated statement of comprehensive income and consolidated statement of financial position.

	Year ended December 31,	
	2022	2021
	$'m	$'m

Share of profit/(loss) for the period	7	(55)
Other comprehensive expense	–	(5)
Total comprehensive gain/(loss)	**7**	**(60)**

The reconciliation of summarized financial information presented to the carrying amount of the Group's interest in Trivium is set out below.

	2022	2021
	$'m	$'m
Group's interest in net assets of equity accounted joint venture at January 1	303	390
Share of total comprehensive income/(expense)	7	(60)
Foreign exchange	(18)	(27)
Carrying amount of interest in equity accounted joint venture - December 31	**292**	**303**

In respect of the Group's equity accounted investment in Trivium, management has considered the carrying amount of the investment and concluded that it is fully recoverable as at December 31, 2022.

The Group was party to a Mutual Services Agreement ("MSA") with Trivium, pursuant to which the Group and Trivium provide services to each other. The MSA ended as of November 2022.

The Group recognized net income of $3 million in respect of the MSA in the year ended December 31, 2022 (December 31, 2021: $11 million).

At December 31, 2022, and December 31, 2021, the Group had no significant related party balances outstanding with Trivium.

12. Deferred tax

The movement in deferred tax assets and liabilities during the year was as follows:

	Assets $'m	Liabilities $'m	Total $'m
At January 1, 2021	**420**	**(544)**	**(124)**
Credited to the income statement (Note 6)	68	7	75
Charged to other comprehensive income	(34)	(12)	(46)
Exchange	(11)	16	5
At December 31, 2021	**443**	**(533)**	**(90)**
(Charged)/credited to the income statement (Note 6)	(14)	27	13
(Charged)/credited to other comprehensive income	(56)	27	(29)
Disposals/Acquisitions	32	(162)	(130)
Exchange	(18)	32	14
At December 31, 2022	**387**	**(609)**	**(222)**

The components of deferred income tax assets and liabilities are as follows:

	At December 31, 2022 $'m	2021 $'m
Tax losses	77	113
Employee benefit obligations	62	127
Depreciation timing differences	78	82
Provisions	94	74
Other	76	47
	387	**443**
Available for offset	(234)	(226)
Deferred tax assets	**153**	**217**
Intangible assets	(198)	(171)
Accelerated depreciation and other fair value adjustments	(373)	(300)
Other	(38)	(62)
	(609)	**(533)**
Available for offset	234	226
Deferred tax liabilities	**(375)**	**(307)**

The tax credit recognized in the consolidated income statement is analyzed as follows:

	Year ended December 31, 2022 $'m	2021 $'m
Tax losses	(35)	69
Employee benefit obligations	2	(4)
Depreciation timing differences	(8)	2
Provisions	1	3
Other deferred tax assets	26	(2)
Intangible assets	76	85
Accelerated depreciation and other fair value adjustments	(47)	(67)
Other deferred tax liabilities	(2)	(11)
	13	**75**

Deferred tax assets are only recognized on tax loss carry forwards to the extent that the realization of the related tax benefit through future taxable profits is probable based on management's forecasts. The Group did not recognize deferred tax assets of $98 million (2021: $55 million) in respect of tax losses amounting to $494 million (2021: $221 million) that can be carried forward against future taxable income due to uncertainty regarding their utilization.

No provision has been made for temporary differences applicable to investments in subsidiaries as the Group is in a position to control the timing of reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Given that exemptions and tax credits would be available in the context of the Group's investments in subsidiaries in the majority of jurisdictions in which it operates, the aggregate amount of temporary differences in respect of which deferred tax liabilities have not been recognized would not be material.

13. Inventories

	Year ended December 31,	
	2022 $'m	2021 $'m
Raw materials and consumables	569	430
Mold parts	62	52
Work-in-progress	19	16
Finished goods	750	605
	1,400	**1,103**

Certain inventories held by the Group have been pledged as security under the Group's Global Asset Based Loan Facilities (Note 19 – Financial assets and liabilities). The amount recognized as a write down in inventories or as a reversal of a write down in the year ended December 31, 2022 is $3 million (2021: $2 million).

At December 31, 2022, the hedging gain included in the carrying value of inventories, which will be recognized in the income statement when the related finished goods have been sold is $4 million (2021: $14 million).

14. Trade and other receivables

	Year ended December 31,	
	2022 $'m	2021 $'m
Trade receivables	1,045	826
Other receivables and prepayments	297	363
	1,342	**1,189**

The fair values of trade and other receivables approximate the amounts shown above.

Movements on the provision for impairment of trade receivables are as follows:

	2022 $'m	2021 $'m
At January 1,	**9**	**11**
Provision for receivables impairment	5	—
Receivables written off during the year as uncollectible	—	(2)
Net remeasurement of loss allowance	(7)	—
Exchange	1	—
At December 31,	**8**	**9**

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable set out above.

Provisions against specific balances

Significant balances are assessed for evidence of increased credit risk. Examples of factors considered are high probability of bankruptcy, breaches of contract or major concession being sought by the customer. Instances of significant single customer related bad debts are rare.

Providing against the remaining population of customers

The Group monitors actual historical credit losses and adjusts for forward-looking information to measure the level of expected losses. Adverse changes in the payment status of customers of the Group, or national or local economic conditions that correlate with defaults on receivables owing to the Group, may also provide a basis for an increase in the level of provision above historic loss experience.

As of December 31, 2022, trade receivables of $62 million (2021: $36 million) were past due but not impaired. These relate to a number of independent customers for whom there is no recent history of default. The aging analysis of these trade receivables is as follows:

	Year ended December 31,	
	2022 $'m	2021 $'m
Up to three months past due	49	33
Three to six months past due	4	1
Over six months past due	9	2
	62	**36**

Receivables Factoring and Related Programs

The Group participates in several uncommitted accounts receivable factoring and related programs with various financial institutions for certain receivables. Such programs are accounted for as true sales of receivables, as they are either without recourse to the Group or transfer substantially all the risk and rewards to the financial institutions. Receivables of $661 million were sold under these programs at December 31, 2022 (December 31, 2021: $554 million).

15. Contract assets

The following table provides information about significant changes in contract assets:

	2022 $'m	2021 $'m
At January 1,	**182**	**139**
Transfers from contract assets recognized at beginning of year to receivables	(176)	(137)
Increases as a result of new contract assets recognized during the year	229	185
Other (including exchange)	4	(5)
At December 31,	**239**	**182**

16. Cash and cash equivalents and restricted cash

	Year ended December 31,	
	2022 $'m	2021 $'m
Cash at bank and in hand	676	591
Short term bank deposits	447	2,312
Restricted cash	8	6
	1,131	**2,909**

17. Equity share capital

Issued and fully paid shares:

	Class A common shares (par value €0.01) (million)	Class B common shares (par value €0.10) (million)	Total shares (million)	Total $'m
At December 31, 2021	2.9	217.7	220.6	23
At December 31, 2022	**2.9**	**217.7**	**220.6**	**23**

The authorized share capital of the Company is set at fifty-five million Euro and zero Cents. (EUR 55,000,000), divided into one billion (1,000,000,000) Class A common shares, with a par value of EUR 0.01 each, and four hundred and fifty million (450,000,000) of Class B common shares, with a par value of EUR 0.10 per share.

There were no material share transactions in the year ended December 31, 2022.

18. Financial risk factors

The Group's activities expose it to a variety of financial risks: capital risk, interest rate risk, currency exchange risk, commodity price risk, credit risk, and liquidity risk.

Capital structure and risk

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern and provide returns to its shareholders. The Group funds its operations primarily from the following sources of capital: borrowings, cash flow and shareholders' capital. The Group aims to achieve a capital structure that results in an appropriate cost of capital to accommodate material investments or acquisitions, while providing flexibility in short and medium term funding. The Group also aims to maintain a strong balance sheet and to provide continuity of financing by having a range of maturities and borrowing from a variety of sources.

The Group's overall treasury objectives are to ensure sufficient funds are available for the Group to carry out its strategy and to manage certain financial risks to which the Group is exposed, details of which are provided below. The Group's finance committee reviews and monitors the capital structure, financial policies and treasury function, in addition to advising the board of directors in relation to financing agreements or arrangements.

Financial risks are managed on the advice of Group Treasury and senior management in conjunction with the finance committee. The Group does not permit the use of treasury instruments for speculative purposes, under any circumstances. Group Treasury regularly reviews the level of cash and debt facilities required to fund the Group's activities, plans for repayment and refinancing of debt, and identifies an appropriate amount of headroom to provide a reserve against unexpected funding requirements.

The Group's long-term liquidity needs primarily relate to the servicing of our debt obligations. We expect to satisfy our future long-term liquidity needs through a combination of cash flow generated from operations and, where appropriate, to refinance our debt obligations in advance of their respective maturity dates as we have successfully done in the past. The Group generates substantial cash flow from our operations on an annual basis. The Group had $1,131 million in cash, cash equivalents and restricted cash as of December 31, 2022, as well as available but undrawn liquidity of $930 million under its credit facilities.

Additionally, financial instruments, including derivative financial instruments, are used to hedge exposure to interest rate, currency exchange risk and commodity price risk.

One of the Group's key metrics has been the ratio of consolidated external net debt as a multiple of Adjusted EBITDA. Adjusted EBITDA is the loss for the period before income tax charge or credit, net finance expense, depreciation and amortization, exceptional operating items and share of profit or loss in equity accounted joint venture. As at December 31, 2022 the ratio was 6.8x (2021: 4.7x).

Interest rate risk

The Board's policy, in the management of interest rate risk, is to strike the right balance between the Group's fixed and floating rate financial instruments, which occasionally includes the use of cross currency and interest rate swaps. The balance struck by the Board is dependent on prevailing interest rate markets at any point in time.

At December 31, 2022, the Group's external borrowings were 97% (2021: 100%) fixed, with a weighted average interest rate of 4.3% (2021: 3.9%). The weighted average interest rate for the Group for the year ended December 31, 2022 was 4.3% (2021: 3.8%).

Holding all other variables constant, including levels of the Group's external indebtedness, at December 31, 2022 a one percentage point increase in variable interest rates would increase interest payable by approximately $3 million (2021: $nil).

Currency exchange risk

The Group presents its consolidated financial information in U.S. dollar. The functional currency of the Company is the euro.

The Group operates in 16 countries, across four continents and its main currency exposure in the year to December 31, 2022, from the euro functional currency, was in relation to the U.S. dollar, British pound, Swedish krona, Polish zloty, Danish krone, Brazilian real, South African rand and Ethiopian birr. Currency exchange risk arises from future commercial transactions, recognized assets and liabilities, and net investments in foreign operations.

As a result of the consolidated financial statements being presented in U.S dollar, the Group's results are also impacted by fluctuations in the U.S. dollar exchange rate versus the euro.

The Group has a limited level of transactional currency exposure arising from sales or purchases by operating units in currencies other than their functional currencies.

The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk. Currency exposure arising from the net assets of the Group's foreign operations is managed where possible primarily through borrowings and swaps denominated in the Group's principal foreign currencies.

Fluctuations in the value of these currencies with respect to the euro functional currency may have a significant impact on the Group's financial condition and results of operations. The Group believes that a strengthening of the euro exchange rate (the functional currency) by 1% against all other foreign currencies from the December 31, 2022 rate would decrease shareholders' equity by approximately $3 million (2021: $6 million decrease).

Commodity price risk

The Group is exposed to changes in prices of our main raw materials, primarily aluminum and energy. Production costs in Ardagh Metal Packaging are exposed to changes in prices of our main raw materials, primarily aluminum. Aluminum ingot is traded daily as a commodity on the London Metal Exchange, which has historically been subject to significant price volatility. Because aluminum is priced in U.S. dollars, fluctuations in the U.S. dollar/ euro rate also affect the euro cost of aluminum ingot. The price and foreign currency risk on the aluminum purchases in Ardagh Metal Packaging Europe and Ardagh Metal Packaging Americas are hedged where required by entering into swaps under which we pay fixed euro and U.S. dollar prices, respectively. Furthermore, the relative price of oil and its by-products may impact our business, affecting our transport, lacquer and ink costs.

Where we do not have pass through contracts in relation to the underlying metal raw material cost the Group uses derivative agreements to manage this risk. The Group depends on an active liquid market and available credit lines with counterparty banks to cover this risk. The use of derivative contracts to manage our risk is supported by robust hedging procedures. Increasing raw material costs over time has the potential, if customers are unable to pass on price increases, to reduce sales volume and could therefore have a significant impact on our business. The Group is also exposed to possible interruptions of supply of aluminum and steel or other raw materials and any inability to purchase raw materials could negatively impact our operations.

Production costs in Ardagh Glass Packaging are sensitive to the price of energy. Our main energy exposure is to the cost of natural gas and electricity. These energy costs have experienced significant volatility in recent years with a corresponding effect on our production costs. In terms of natural gas, which represents a large portion of our energy costs, there is a continuous decoupling between the cost of natural gas and oil, whereby now only significant changes in the price of oil have an impact on the price of natural gas. The volatility in natural gas pricing is driven by shale gas development (United States only), the availability of liquefied natural gas in Europe, as both Europe and Asia compete for shipments and storage, wind and solar intensity levels, as well as geopolitical events. Volatility in the price of electricity is caused by developments in renewable energy policies, including in Germany, the phasing out of nuclear generating capacity, fluctuations in the price of natural gas and coal, the influence of carbon dioxide costs on electricity prices, as well as geopolitical events. The impact of Europe's dependence on Russia for natural gas supply has been evident by the extreme rise in price, as a result of reduced natural gas flows in the second half of 2021 arising from political tensions between

Russia and Ukraine and the outbreak of war between countries in the first quarter of 2022. Energy supplies to Europe from Russia decreased further during 2022 as the conflict escalated, resulting in prices reaching a peak in the third quarter of 2022.

The Group implemented energy surcharges during 2022 and included additional pass through clauses in our sales contracts where possible. Where pass through contracts do not exist, the Group has developed an active risk management strategy by entering into forward price fixing arrangements with suppliers for the bulk of our anticipated requirements for the year ahead or in some instances hedging with banks. Such arrangements are used exclusively to obtain certainty of our anticipated energy supplies. The Group avails of the own use exemption and, therefore, these contracts are treated as executory contracts.

The Group typically builds up these contractual positions in tranches. Any natural gas and electricity which is not purchased under forward price fixing arrangements is purchased under index tracking contracts or at spot prices. In particular the Group has sought to diversify its energy sources, accelerating investments in renewable energy and adapting parts of its production foot-print to use fuel oil.

Credit risk

Credit risk arises from derivative contracts, cash and deposits held with banks and financial institutions, as well as credit exposures to the Group's customers, including outstanding receivables. Group policy is to invest its excess liquidity only with recognized and reputable financial institutions. For banks and financial institutions, only independently rated parties with a minimum rating of "BBB+" from at least two credit rating agencies are accepted, where possible. The credit ratings of banks and financial institutions are monitored to ensure compliance with Group policy. Risk of default is controlled within a policy framework of dealing with high quality institutions and by limiting the amount of credit exposure to any one bank or institution.

Group policy is to extend credit to customers of good credit standing. Credit risk is managed on an on going basis, by experienced personnel within the Group. The Group's policy for the management of credit risk in relation to trade receivables involves periodically assessing the financial reliability of customers, taking into account their financial position, past experience and other factors. Provisions are made, where deemed necessary, and the utilization of credit limits is regularly monitored. Management does not expect any significant counterparty to fail to meet its obligations. The maximum exposure to credit risk is represented by the carrying amount of each asset. For the year ended December 31, 2022, the Group's ten largest customers accounted for approximately 44% of total revenues (2021: 44%). There is no recent history of default with these customers.

Surplus cash held by the operating entities over and above their short term requirements are transferred to Group Treasury, where possible. Group Treasury invests surplus cash in interest-bearing current accounts, money market funds and bank time deposits with appropriate maturities to provide sufficient headroom as determined by the below-mentioned forecasts.

Liquidity risk

The Group is exposed to liquidity risk which arises primarily from the maturing of short term and long term debt obligations and from the normal liquidity cycle of the business throughout the course of a year. The Group's policy is to ensure that sufficient resources are available either from cash balances, cash flows or undrawn committed bank facilities, to ensure all obligations can be met as they fall due.

To effectively manage liquidity risk, the Group:

- has committed borrowing facilities that it can access to meet liquidity needs;
- maintains cash balances and liquid investments with highly-rated counterparties;
- limits the maturity of cash balances;
- borrows the bulk of its debt needs under long term fixed rate debt securities; and
- has internal control processes to manage liquidity risk.

Cash flow forecasting is performed in the Group's operating entities, and is aggregated by Group Treasury. Group Treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational

needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans.

19. Financial assets and liabilities

The Group's net debt was as follows:

	Year ended December 31,	
	2022 $'m	2021 $'m
Restricted loan notes	5,453	5,527
Unrestricted loan notes	3,231	2,726
Senior facilities	324	—
Lease obligations and other borrowings	727	456
Net borrowings	**9,735**	**8,709**
Cash and cash equivalents and restricted cash	(1,131)	(2,909)
Derivative financial instruments used to hedge foreign currency and interest rate risk	8	(2)
Net debt	**8,612**	**5,798**

The Group's net borrowings of $9,735 million (2021: $8,709 million) are classified as non-current liabilities of $9,586 million (2021: $8,595 million) and current liabilities of $149 million (2021: $114 million) in the consolidated statement of financial position at December 31, 2022.

At December 31, 2022, the Group's net debt and available liquidity was as follows:

Facility	Currency	Maximum amount drawable	Final maturity date	Facility type	Amount drawn			Undrawn amount
		Local currency m			Restricted Group $'m	Unrestricted Group * $'m	Total Group $'m	$'m
5.250% Senior Secured Notes	USD	700	30-Apr-25	Bullet	700	–	700	–

*Unrestricted Group refers to Ardagh Metal Packaging S.A. and its subsidiaries as referred to in Note 1 - General information.

Net debt includes the fair value of associated derivative financial instruments that are used to hedge foreign exchange and interest rate risks relating to Group borrowings.

A number of the Group's borrowing agreements contain certain covenants that restrict the Group's flexibility in certain areas such as incurrence of additional indebtedness (primarily maximum borrowings to Adjusted EBITDA and a minimum Adjusted EBITDA to interest expense), payment of dividends and incurrence of liens.

Borrowing facilities in Africa also contain customary maintenance covenants, primarily net debt to EBITDA and interest coverage tests, all of which were in compliance at year end.Borrowing facilities in Africa also contain customary maintenance covenants, primarily net debt to EBITDA and interest coverage tests, all of which were in compliance at year end.

The Global Asset Based Loan Facilities are subject to a fixed charge coverage ratio covenant if 90% or more of the facility is drawn. The facilities also include cash dominion, representations, warranties, events of default and other covenants that are generally of a customary nature for such facilities. These facilities were undrawn at December 31, 2022 and December 31, 2021.

At December 31, 2021, the Group's net debt and available liquidity was as follows:

Facility	Currency	Maximum amount drawable	Final maturity date	Facility type	Amount drawn			Undrawn amount
		Local currency m			Restricted Group $'m	Unrestricted Group $'m	Total Group $'m	$'m
5.250% Senior Secured Notes	USD	700	30-Apr-25	Bullet	700	–	700	–

Global Asset Based Loan Facility	USD	325	06-Aug-26	Revolving	–	–	–	325
Total borrowings / undrawn facilities					**5,905**	**2,927**	**8,832**	**793**
Deferred debt issue costs and bond discounts/bond premium					(83)	(40)	(123)	–
Net borrowings / undrawn facilities					**5,822**	**2,887**	**8,709**	**793**
Cash, cash equivalents and restricted cash					(2,446)	(463)	(2,909)	2,909
Derivative financial instruments used to hedge foreign currency and interest rate risk					(2)	–	(2)	–
Net debt / available liquidity					**3,374**	**2,424**	**5,798**	**3,702**

The following table summarizes movement in the Group's net debt:

	2022 $'m	2021 $'m
Net decrease/(increase) in cash and cash equivalents and restricted cash	1,778	(1,642)
Increase in net borrowings and derivative financial instruments	1,036	1,741
Increase in net debt	2,814	99
Net debt at January 1,	5,798	5,699
Net debt at December 31,	**8,612**	**5,798**

The increase in net debt primarily includes a decrease in cash, cash equivalents and restricted cash of $1.8 billion (2021: increase of $1.6 billion), proceeds from borrowings of $0.7 billion (2021: $2.8 billion), increase in leases of $0.2 billion (2021: $nil), foreign exchange loss on borrowings of $0.2 billion (2021: gain of $0.2 billion), which is partly offset by repayments of borrowings of $0.1 billion (2021: $0.8 billion).

Maturity Profile

The maturity profile of the Group's total borrowings is as follows:

	At December 31,	
	2022 $'m	2021 $'m
Within one year or on demand	81	58
Between one and three years	1,125	71
Between three and five years	4,870	3,361
Greater than five years	124	2,415
Restricted Group total borrowings	**6,200**	**5,905**
Within one year or on demand	68	56
Between one and three years	100	55
Between three and five years	704	59
Greater than five years	2,758	2,757
Unrestricted Group total borrowings	**3,630**	**2,927**
Total borrowings	**9,830**	**8,832**
Deferred debt issue costs and bond discounts/bond premium	(95)	(123)
Net Borrowings	**9,735**	**8,709**

The maturity profile of the contractual undiscounted cash flows related to the Group's lease liabilities is as follows:

	2022 $'m	2021 $'m
Not later than one year	162	117
Later than one year and not later than five years	439	279
Later than five years	275	142
	876	**538**

The table below analyzes the Group's financial liabilities (including interest payable) into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table are the contracted undiscounted cash flows.

At December 31, 2022	Borrowings $'m	Derivative financial instruments $'m	Trade and other payables $'m
Within one year or on demand	577	55	2,197
Between one and three years	1,978	24	—
Between three and five years	6,077	34	—
Greater than five years	3,059	1	—

At December 31, 2021	Borrowings $'m	Derivative financial instruments $'m	Trade and other payables $'m
Within one year or on demand	455	14	2,074
Between one and three years	804	4	—
Between three and five years	3,994	—	—
Greater than five years	5,490	—	—

The carrying amount and fair value of the Group's borrowings, excluding lease obligations, are as follows:

At December 31, 2022	Carrying value Amount drawn $'m	Deferred debt issue costs and premium $'m	Total $'m	Fair value $'m
Loan notes	8,770	(86)	8,684	7,183
Senior Facilities	324	—	324	324
Other borrowings	55	(9)	46	55
	9,149	**(95)**	**9,054**	**7,562**

At December 31, 2021	Carrying value Amount drawn $'m	Deferred debt issue costs and premium $'m	Total $'m	Fair value $'m
Loan notes	8,372	(119)	8,253	8,355
Other borrowings	20	(4)	16	20
	8,392	**(123)**	**8,269**	**8,375**

Financing activity

2022

On June 8, 2022, AMP issued $600 million 6.000% Senior Secured Green Notes due 2027. Net proceeds from the issuance of the notes will be used for general corporate purposes.

Lease obligations at December 31, 2022 of $681 million (December 31, 2021: $440 million), primarily reflects $332 million of new lease liabilities and foreign currency movements and $43 million of lease liabilities acquired as part of the acquisition of Consol (see Note 25 - Business Combinations), partly offset by $134 million of principal repayments, in the year ended December 31, 2022.

At December 31, 2022 the Group had $848 million available under the Global Asset Based Loan Facilities (2021: $792 million).

2021

On March 12, 2021, the Group issued €450 million 2.000% Senior Secured Notes due 2028, $600 million 3.250% Senior Secured Notes due 2028, €500 million 3.000% Senior Notes due 2029 and $1,050 million 4.000% Senior Notes due 2029.

On August 15, 2021, the Group redeemed in full the remaining outstanding $800 million 6.000% Senior Notes due 2025 and paid applicable redemption premiums and accrued interest.

Effective interest rates

The effective interest rates of borrowings at the reporting date are as follows:

	2022				2021		
	USD	EUR	GBP	ZAR	USD	EUR	GBP
Restricted Group							
5.250% Senior Secured Notes due 2025	5.86 %	—	—	—	5.86 %	—	—
4.125% Senior Secured Notes due 2026	4.31 %	—	—	—	4.31 %	—	—
2.125% Senior Secured Notes due 2026 (€439 million)	—	2.33 %	—	—	—	2.33 %	—
2.125% Senior Secured Notes due 2026 (€790 million)	—	3.28 %	—	—	—	3.28 %	—

3.000% Senior Green Notes due 2029		3.25 %	—	—	—	3.28 %	—
4.000% Senior Green Notes due 2029	4.26 %	—	—	—	4.31 %	—	—
			Various Currencies				
Lease obligations		5.38 %				4.79 %	

The carrying amounts of the Group's net borrowings are denominated in the following currencies:

	At December 31,	
	2022 $'m	2021 $'m
Euro	2,393	2,528
U.S. dollar	6,384	5,550
British pound	537	593
South African rand	371	—
Other	50	38
	9,735	**8,709**

The Group has the following undrawn borrowing facilities:

	Year end December 31,	
	2022 $'m	2021 $'m
Expiring within one year	82	468
Expiring beyond one year	848	325
	930	**793**

Fair value methodology

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments:

Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair values are calculated as follows:

(i) Senior Secured Green Notes, Senior Secured Notes, Senior Notes and Senior Green Notes - The fair value of debt securities in issue is based on valuation techniques in which all significant inputs are based on observable market data and represent Level 2 inputs.

(ii) Global Asset Based Loan facilities and other borrowings - The fair values of the borrowings in issue is based on valuation techniques in which all significant inputs are based on observable market data and represent Level 2 inputs.

(iii) Cross currency interest rate swaps ("CCIRS") - The fair values of the CCIRS are based on quoted market prices and represent Level 2 inputs.

(iv) Commodity and foreign exchange derivatives - The fair value of these derivatives are based on quoted market prices and represent Level 2 inputs.

(v) Private and public warrants - the fair value of the private warrants is based on a valuation technique using an unobservable volatility assumption which represents a Level 3 input, whereas the fair value of the public warrants is based on an observable market price and represents Level 1 input.

Derivative financial instruments

	Assets	Liabilities	Total
	Fair values $'m	Fair values $'m	Contractual or notional amounts $'m
Fair value derivatives			
Commodity forward contracts	44	66	719
Cross currency interest rate swaps	7	15	702
Forward foreign exchange contracts	18	33	1,563
At December 31, 2022	**69**	**114**	**2,984**

	Assets	Liabilities	Total
	Fair values $'m	Fair values $'m	Contractual or notional amounts $'m
Fair value derivatives			
Commodity forward contracts	102	2	296
Cross currency interest rate swaps	5	3	715
Forward foreign exchange contracts	14	13	2,917
At December 31, 2021	**121**	**18**	**3,928**

Derivative instruments with a fair value of $15 million (2021: $12 million) are classified as non-current assets and $54 million (2021: $109 million) as current assets in the consolidated statement of financial position at December 31, 2022. Derivative instruments with a fair value of $59 million (2021: $4 million) are classified as non-current liabilities and $55 million (2021: $14 million) as current liabilities in the consolidated statement of financial position at December 31, 2022.

With the exception of interest on the CCIRS, all cash payments in relation to derivative instruments are paid or received when they mature. Bi-annual interest cash payments and receipts are made and received in relation to the CCIRS.

The Group mitigates the counterparty risk for derivatives by contracting with major financial institutions which have high credit ratings.

Cross currency interest rate swaps

2022

The Group hedges certain of its external borrowings and interest payable thereon using CCIRS, with a net liability position at December 31, 2022 of $8 million (December 31, 2021: $2 million net asset).

During the year ended December 31, 2022, the Group re-struck $500 million of its U.S. dollar to euro CCIRS portfolio via termination and re-entering of new on market trades. The cash received from these transactions was $53 million, including interest of $2 million.

2021

The Group hedges certain of its external borrowings and interest payable thereon using CCIRS, with a net asset position at December 31, 2021 of $2 million.

On February 15, 2021, a tranche of the Group's $700 million U.S. dollar to euro CCIRS matured. The fair value of the swap at maturity was $6 million and the cash settlement was $5 million.

On August 4, 2021, the remaining $650 million tranche of the Group's $700 million U.S. dollar to euro CCIRS matured. The fair value of the swaps at maturity were $61 million and the cash settlement was $63 million.

On August 4, 2021, a tranche of the Group's $100 million U.S. dollar to euro CCIRS matured. The fair value of the swaps at maturity were $4 million and the cash settlement was $4 million.

Net investment hedge in foreign operations

The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk. Currency exposure arising from the net assets of the Group's foreign operations is managed primarily through borrowings denominated in the relevant foreign currencies.

Hedges of net investments in foreign operations are accounted for whereby any gain or loss on the hedging instruments relating to the effective portion of the hedge is recognized in other comprehensive income. The gain or loss relating to an ineffective portion is recognized immediately in the consolidated income statement within finance income or expense respectively. Gains and losses accumulated in other comprehensive income are recycled to the consolidated income statement when the foreign operation is disposed of. A loss of $54 million (2021: $51 million) was recognized in relation to net investments in the consolidated statement of comprehensive income. The amount that has been recognized in the consolidated income statement due to ineffectiveness is $1 million (2021: $1 million).

Commodity forward contracts

The Group hedges a portion of its anticipated metal and energy purchases. Excluding conversion and freight costs, the physical metal and energy deliveries are priced based on the applicable indices agreed with the suppliers for the relevant month. Certain forward contracts are designated as cash flow hedges and the Group has determined the existence of an economic relationship between the hedged item and the hedging instrument based on common indices used. Ineffectiveness may arise if there are changes in the forecasted transaction in terms pricing, timing or quantities, or if there are changes in the credit risk of the Group or the counterparty. The Group applies a hedge ratio of 1:1.

Fair values have been based on quoted market prices and are valued using Level 2 valuation inputs. The fair value of these contracts when initiated is $nil; no premium is paid or received.

Forward foreign exchange contracts

The Group operates in a number of currencies and, accordingly, hedges a portion of its currency transaction risk. Certain forward contracts are designated as cash flow hedges and are set so to closely match the critical terms of the underlying cash flows. In hedges of forecasted foreign currency sales and purchases ineffectiveness may arise for similar reasons as outlined for metal forward contracts.

The fair values are based on Level 2 valuation techniques and observable inputs including the contract prices. The fair value of these contracts when initiated is $nil; no premium is paid or received.

During 2021, Ardagh entered into forward foreign exchange contracts in connection with the proposed acquisition of Consol. The acquisition was completed on April 29, 2022, resulting in a gain of $42 million. See Note 5 - Exceptional items for more details.

Foreign currency derivative financial instruments

The Group operates in a number of currencies and, accordingly, hedges a portion of its currency transaction risk. A cash gain on hedging of $10 million was recognized in the year ended December 31, 2022 (2021: gain of $14 million) and has been reflected within operating activities in the audited consolidated statement of cash flows.

20. Employee benefit obligations

The Group operates defined benefit or defined contribution pension schemes in most of its countries of operation and the assets are held in separately administered funds. The principal funded defined benefit schemes, which are funded by contributions to separately administered funds, are in the United States and the United Kingdom.

Other defined benefit schemes are unfunded, and the provision is recognized in the consolidated statement of financial position. The principal unfunded schemes are in Germany.

The contribution rates to the funded plans are agreed with the Trustee boards, plan actuaries and the local pension regulators periodically. The contributions paid in 2022 were those recommended by the actuaries.

During the year ended December 31, 2022, the assets and liabilities attributable to the employees and former employees (and their respective beneficiaries) of Ardagh Metal Beverage USA Inc. were spun out of the Ardagh North America Retirement Income Plan which was previously co-sponsored with Ardagh Glass Packaging North America into a new scheme, the Ardagh Metal Pension Plan. This crystalized a cash outflow of $27 million, which included $12 million paid to AGSA (which eliminated on consolidation) in respect of the assets transferred.

In addition, the Group has other employee benefit obligations in certain territories.

Total employee benefit obligations, net of employee benefit assets included within non-current assets, recognized in the consolidated statement of financial position of $334 million (2021: $559 million) includes other employee benefit obligations of $79 million (2021: $100 million).

The amounts recognized in the consolidated income statement are:

	Year ended December 31,	
	2022	**2021**
	$'m	**$'m**
Current service cost and administration costs:		
Cost of sales - current service cost (Note 7)	(26)	(28)
Cost of sales - past service credit (Note 7)	—	19
SGA - current service cost (Note 7)	(3)	(3)
	(29)	**(12)**
Finance expense (Note 5)	(9)	(11)
	(38)	**(23)**

The amounts recognized in the consolidated statement of comprehensive income are:

	Year ended December 31,	
	2022 $'m	2021 $'m
Re-measurement of defined benefit obligation:		
Actuarial gain arising from changes in demographic assumptions	—	11
Actuarial gain arising from changes in financial assumptions	644	67
Actuarial (loss)/gain arising from changes in experience	(44)	11
	600	**89**
Re-measurement of plan assets:		
Actual return less expected return on plan assets	(439)	108
Actuarial gain for the year on defined benefit pension schemes	**161**	**197**
Actuarial gain on other long term and end of service employee benefits	25	14
	186	**211**

The actual return on plan assets was a loss of $400 million in 2022 (2021: $140 million gain).

The employee obligations and assets of the defined benefit schemes included in the consolidated statement of financial position are analyzed below:

	U.S.		Germany		U.K.*		Other		Total	
	2022 $'m	2021 $'m	2022 $'m	2021 $'m	2022 $'m	2021 $'m	2022 $'m	2021 $'m	2022 $'m	2021 $'m
Obligations	(989)	(1,330)	(122)	(182)	(446)	(782)	(23)	(28)	**(1,580)**	**(2,322)**
Assets	951	1,179	—	—	360	672	14	12	**1,325**	**1,863**
Net obligations	**(38)**	**(151)**	**(122)**	**(182)**	**(86)**	**(110)**	**(9)**	**(16)**	**(255)**	**(459)**

*The net employee benefit asset in the U.K. metal packaging scheme as at December 31, 2022 is included within non-current assets on the statement of financial position (2021: included in non-current asset on the statement of financial position).

Movement in the defined benefit obligations and assets:

	At December 31,			
	Obligations		Assets	
	2022 $'m	2021 $'m	2022 $'m	2021 $'m
At January 1,	(2,322)	(2,518)	1,863	1,824
Interest income	—	—	38	32
Current service cost	(24)	(26)	—	—
Past service credit - net	—	19	—	—
Interest cost	(45)	(41)	—	—
Administration expenses paid from plan assets	—	—	(1)	(1)
Re-measurements	600	89	(439)	108
Obligations/(assets) extinguished on reclassification	—	1	—	(1)
Employer contributions	—	—	48	34
Employee contributions	(1)	(1)	1	1
Benefits paid	113	125	(113)	(125)
Exchange	99	30	(72)	(9)
At December 31,	**(1,580)**	**(2,322)**	**1,325**	**1,863**

The defined benefit obligations above include $125 million (2021: $189 million) of unfunded obligations. Interest income and interest cost above does not include net interest cost of $3 million (2021: $2 million) relating to other employee benefit obligations. Current service costs above do not include current service costs of $6 million (2021: $5 million) relating to other employee benefit obligations.

During the year ended December 31, 2021, the Group and the Trustees of the U.K. metal packaging and glass packaging schemes collaborated to implement a Bridging Pension Option for members on retirement around the starting level of pensions until the State Pension Age. This resulted in the recognition of a gain of $14 million within the income statement for the year ended December 31, 2021.

During the year ended December 31, 2021, the Group recognized a $3 million past service credit in respect of the re-design of the pension plans in Ardagh Glass Packaging Germany, moving from a current defined benefit scheme into a contribution orientated scheme.

During the year ended December 31, 2021, the Group recognized a $2 million past service credit related to a plan amendment in Ardagh Glass Packaging North America.

Plan assets comprise:

	At December 31,			
	2022 $'m	**2022 %**	**2021 $'m**	**2021 %**
Equities / multi strategy	810	61	1,140	61
Target return funds	132	10	255	14
Bonds	166	13	225	13
Cash/other	217	16	243	12
	1,325	**100**	**1,863**	**100**

The pension assets do not include any of the Company's ordinary shares, securities or other Group assets.

Investment strategy

The choice of investments takes account of the expected maturity of the future benefit payments. The plans invest in diversified portfolios consisting of an array of asset classes that attempt to maximize returns while minimizing volatility. The asset classes include national and international equities, fixed income government and non-government securities and real estate, as well as cash.

Characteristics and associated risks

The Ardagh Glass Packaging North America plan covers both hourly and salaried employees. The plan benefits are determined using a formula which reflects an employee's years of service and either their final average salary or a dollar per month benefit level. The plan is governed by a Fiduciary Benefits Committee ("the Committee") which is appointed by the Company and contains only employees of Ardagh Group. The Committee is responsible for the investment of the plan's assets, which are held in a trust for the benefit of employees, retirees and their beneficiaries, and which can only be used to pay plan benefits and expenses.

The defined benefit pension plan is subject to IRS funding requirements with actuaries calculating the minimum and maximum allowable contributions each year. The defined benefit pension plan currently has no cash contribution requirement due to the existence of a credit balance following a contribution of approximately $200 million made in 2014 in connection with the acquisition of Verallia North America. The Pension Benefit Guaranty Corporation ("PBGC") protects the pension benefits of employees and retirees when a plan sponsor becomes insolvent and can no longer meet its obligation. All plan sponsors pay annual PBGC premiums that have two components: a fixed rate based on participant count and a variable rate which is determined based on the amount by which the plan is underfunded.

Effective as of the end of the day on December 31, 2021, assets and liabilities for employees and former employees of Ardagh Metal Packaging Americas were transferred to a new plan, the Ardagh Metal Defined Benefit Plan. The Ardagh Metal Packaging Americas Plan sponsors a defined benefit pension plan as a single employer scheme which is subject to Federal law ("ERISA"), reflecting regulations issued by the Internal Revenue Service ("IRS") and the U.S. Department of Labor. The Ardagh Metal Packaging Americas Plan covers hourly employees only. Plan benefits are determined using a formula which reflects the employees' years of service and is based on a final average pay formula.

The Group operates a number of defined benefit pension schemes in Germany. The pension plans in Germany operate under the framework of German Company Pension Law (BetrAVG) and general regulations based on German labor law. The entitlements of the plan members depend on years of service and final salary. Furthermore, the plans provide lifelong pensions. No separate assets are held in trust, i.e. the plans are unfunded defined benefit plans. During the years ended December 31, 2021 and 2019, the Group elected to re-design its pension schemes in Germany, moving to a contribution orientated scheme.

The U.K. pension plans are trust-based U.K. funded final salary defined benefit schemes providing pensions and lump sum benefits to members and dependents. There is one U.K. pension plan in place relating to Ardagh Metal Packaging Europe. It is closed to new entrants and was closed to future accrual effective December 31, 2018. For this plan, pensions are calculated based on service to retirement, with members' benefits based on final career earnings. There are two U.K. pension plans in place in Ardagh Glass Packaging Europe. The U.K. pension plans relating to Ardagh Glass Packaging Europe have been closed to future accrual from March 31, 2013 and September 30, 2015 respectively. The U.K. pension plans are each governed by a board of trustees, which includes members who are independent of the Company. The trustees are responsible for managing the operation, funding and investment strategy. The U.K. pension plans are subject to the U.K. regulatory framework, the requirements of The Pensions Regulator and are subject to a statutory funding objective.

Assumptions and sensitivities

The principal pension assumptions used in the preparation of the financial statements take account of the different economic circumstances in the countries of operations and the different characteristics of the respective plans, including the duration of the obligations. The ranges of the principal assumptions applied in estimating defined benefit obligations were:

	U.S.		Germany		U.K.	
	2022 %	2021 %	2022 %	2021 %	2022 %	2021 %
Rates of inflation	2.50	2.20	2.00	1.70	3.01	3.20
Rates of increase in salaries	3.00	3.00	3.40	2.50	2.58	2.75
Discount rates	5.52-5.58	2.90 - 3.04	3.66-3.89	0.91 - 1.18	5.00	1.90

Assumptions regarding future mortality experience are based on actuarial advice in accordance with published statistics and experience.

These assumptions translate into the following average life expectancy in years for a pensioner retiring at age 65. The mortality assumptions for the countries with the most significant defined benefit plans are set out below:

	U.S.		Germany		U.K.	
	2022 Years	2021 Years	2022 Years	2021 Years	2022 Years	2021 Years
Life expectancy, current pensioners	22	22	22	22	22	22
Life expectancy, future pensioners	23	23	25	25	23	23

If the discount rate were to decrease by 50 basis points from management estimates, the carrying amount of the pension obligations would increase by an estimated $89 million (2021: $176 million). If the discount rate were to increase by 50 basis points, the carrying amount of the pension obligations would decrease by an estimated $84 million (2021: $157 million).

If the inflation rate were to decrease by 50 basis points from management estimates, the carrying amount of the pension obligations would decrease by an estimated $26 million (2021: $46 million). If the inflation rate were to increase by 50 basis points, the carrying amount of the pension obligations would increase by an estimated $26 million (2021: $50 million).

If the salary increase rate were to decrease by 50 basis points from management estimates, the carrying amount of the pension obligations would decrease by an estimated $28 million (2021: $51 million). If the salary increase rate were

to increase by 50 basis points, the carrying amount of the pension obligations would increase by an estimated $26 million (2021: $56 million).

The impact of increasing the life expectancy by one year would result in an increase in the Group's liability of $40 million at December 31, 2022 (2021: $74 million), holding all other assumptions constant.

The Group's best estimate of contributions expected to be paid to defined benefit plans in 2023 is $31 million (2022: $27 million).

The principal defined benefit schemes are described briefly below as of December 31:

	Ardagh Metal Packaging			Ardagh Glass Packaging		
	Europe U.K.*	Europe Germany	North America	Europe U.K.*	Europe Germany	North America
Nature of the schemes	**Funded**	**Unfunded**	**Funded**	**Funded**	**Unfunded**	**Funded**
2022						
Active members	—	766	763	—	808	1,302
Deferred members	589	225	91	1,092	673	2,274
Pensioners including dependents	531	173	104	885	756	6,750
Weighted average duration (years)	14	15	16	15	10	9
2021						
Active members	—	816	808	—	863	1,457
Deferred members	589	202	75	1,056	674	2,409
Pensioners including dependents	531	154	83	885	780	6,724
Weighted average duration (years)	18	19	20	20	14	12

* Census data is updated every 3 years as part of the full valuation for purpose of the U.K. pension regulator.

The expected total benefit payments over the next five years are:

	2023 $'m	2024 $'m	2025 $'m	2026 $'m	2027 $'m	Subsequent five years $'m
Benefits	118	115	116	117	119	597

The Group also has defined contribution plans; the contribution expense associated with these plans for 2022 was $52 million (2021: $51 million). The Group's best estimate of the contributions expected to be paid to these plans in 2023 is $55 million (2022: $52 million).

Other employee benefits

	At December 31,	
	2022 $'m	2021 $'m
End of service employee benefits	2	2
Post-employment benefits	77	98
	79	**100**

End of service employee benefits principally comprise amounts due to be paid to employees leaving the Group's service in Poland and Italy.

Post-employment benefit obligations comprise amounts due to be paid under post-retirement medical schemes in Ardagh Glass Packaging North America, Ardagh Glass Packaging Africa and Ardagh Metal Packaging Americas, partial retirement contracts in Germany and other obligations to pay benefits primarily related to long service awards.

At December 31, 2022	**1**	**172**	**173**

The restructuring provision relates to redundancy and other restructuring costs. Other provisions relate to probable environmental claims, customer quality claims, tax deferrals arising from the CARES Act., and specifically in Ardagh Glass Packaging North America, workers' compensation provisions. In addition to the aforementioned, provisions also include non-current amounts in respect of annual, long-term (three-year), cash bonus incentive programs for senior management of the Group, of approximately $23 million.

The provisions classified as current are expected to be paid in the next twelve months. The remaining balance represents longer term provisions for which the timing of the related payments is subject to uncertainty.

Other Liabilities

On August 4, 2021, all warrants previously exercisable for the purchase of shares in Gores Holdings V were converted into AMP warrants exercisable for the purchase of ordinary shares in AMP at an exercise price of $11.50 over a five-year period after the closing of the Merger on August 4, 2021. In accordance with IAS 32, those warrants have been recognized as a financial liability measured at fair value in the consolidated financial statements. For the warrants issued to the former sponsors of Gores Holdings V ("Private Warrants") a valuation was performed for the purpose of determining the financial liability. The valuation applied a Black Scholes model, using a key data input for the risk-free rate (4%), with estimates for volatility (50%) (December 31, 2021: volatility 34%) and dividend yield. All other outstanding warrants ("Public Warrants") were valued using the traded closing prices of the AMP warrants. The estimated valuations of the liability at December 31, 2022, and December 31, 2021, were $7 million and $33 million, respectively. Changes in the valuation of the Public and Private Warrants of $26 million have been reflected as exceptional finance income within net finance income for the year ended December 31, 2022 (December 31, 2021: $8 million). Any increase or decrease in volatility of 5% would result in an increase or decrease in the fair value of the Private Warrants at December 31, 2022, of approximately $1 million (December 31, 2021: $1 million).

22. Trade and other payables

	At December 31,	
	2022	2021
	$'m	$'m
Trade payables	1,826	1,607
Other payables and accruals	322	362
Other tax and social security payable	111	114
Payables and accruals for exceptional items	49	105
	2,308	**2,188**

The fair values of trade and other payables approximate the amounts shown above.

Other payables and accruals mainly comprise accruals for operating expenses, deferred income and value added tax payable.

Trade Payables Processing

Our suppliers have access to independent third party payable processors. The processors allow suppliers, if they choose, to sell their receivables to financial institutions at the sole discretion of both the supplier and the financial institution. We have no involvement in the sale of these receivables and the suppliers are at liberty to use these arrangements if they wish to receive early payment. As the original liability to our suppliers, including amounts due and scheduled payment dates, remains as agreed in our supply agreements and is neither legally extinguished nor substantially modified, the Group continues to present such obligations within trade payables.

23. Cash generated from operating activities

	Year ended December 31,	
	2022	2021
	$'m	$'m
Loss from operations	**(290)**	**(766)**

Depreciation and amortization	809	746
Exceptional operating items	378	851
Share of post-tax (gain)/loss in equity accounted joint venture	(7)	55
Movement in working capital	(298)	(86)
Transaction-related, start-up and other exceptional costs paid	(126)	(200)
Cash generated from operations	**840**	**959**

24. Non- controlling interests

As a result of the completion of the Business Combination and the completion of the exchange offer in 2021, non-controlling interests represent 23.96% of the total equity in the Group's subsidiary AMP as at December 31, 2022 (December 31, 2021: 24.7%). The total equity attributable to non-controlling interests at December 31, 2022 is $30 million (December 31, 2021: $44 million). Dividends of $58 million have been paid to non-controlling interests during the year ended December 31, 2022.

Summarized financial information, as of the date these consolidated financial statements were authorized for issue, for AMP for the year ended and as at December 31, 2022 is set out below:

	Year ended December 31,	
	2022	2021
	$'m	$'m
Revenue	4,689	4,055
Expenses	(4,513)	(4,008)
Operating profit	**176**	**47**
Net finance expense	80	(235)
Profit/(Loss) before tax	**256**	**(188)**
Income tax expense	(19)	(22)
Profit/(Loss) after tax	**237**	**(210)**

(i) The income statement for the year ended December 31, 2022 includes exceptional income of $145 million, in accordance with Ardagh accounting policy, of which $218 million is in respect of exceptional finance income relating to a gain on movements in the fair market values on the earnout shares, public warrants and private warrants. Also included is $138 million of non-exceptional interest expense and $359 million of depreciation and amortization.

(ii) The income statement for the year ended December 31, 2021 includes exceptional items of $312 million, in accordance with Ardagh accounting policy, of which $57 million is in respect of exceptional interest expense. Also included is $178 million of non-exceptional interest expense and $343 million of depreciation and amortization.

	At December 31,	
	2022	2021
	$'m	$'m
Non-current assets	3,957	3,664
Current assets (iii)	1,908	1,661
Total assets	**5,865**	**5,325**
Total equity	**455**	**286**
Non-current liabilities (iv)	3,946	3,639
Current liabilities (v)	1,464	1,400
Total liabilities	**5,410**	**5,039**
Total equity and liabilities	**5,865**	**5,325**

(iii) Includes cash and cash equivalents of $0.6 billion (2021: $0.5 billion).

(iv) Includes non-current financial liabilities (excluding other payables and provisions) of $3.9 billion (2021: $3.3 billion).

(v) Includes current financial liabilities (excluding trade and other payables and provisions) of $0.2 billion (2021: $0.1 billion).

As at December 31, 2022, AMP had net debt of $3 billion (2021: $2.4 billion).

In 2022, AMP repurchased a total of 5,768,638 shares (December 31, 2021: nil shares) returning $35 million to its shareholders. The repurchased shares have been cancelled as of December 31, 2022.

On July 8, 2022, AMP issued 56,306,306 non-convertible, non-voting 9% preferred shares of nominal value of €4.44 per share to a wholly-owned subsidiary of AGSA resulting in $3 million transaction costs as of December 31, 2022.

The effect on the equity attributable to the owners of AMP in 2021 as a result of the Business Combination is summarized as follows:

	At December 31, 2021 $'m
Carrying amount of non-controlling interests disposed	(57)
Consideration received from non-controlling interests *	922
Excess of consideration received recognized in the transactions with the non-controlling interests reserve within retained earnings	**865**

*Total consideration was comprised of $954 million cash received, offset by $32 million of directly attributable transaction costs related to the issuance of the non-controlling interest, of which $29 million had been paid as of December 31, 2021. Further consideration comprised $392 million of AMP shares exchanged in relation to the exchange offer.

The effect on the equity of the cancellation of tendered shares as a result of the exchange offer is summarized as follows:

	At December 31, 2021 $'m
Carrying amount of non-controlling interests disposed	(18)
Consideration received from non-controlling interests *	392
Excess of consideration received recognized in the transactions with the non-controlling interests reserve within retained earnings	**374**

* Total consideration was calculated by reference to the 39,388,152 AMP shares exchanged and valued at the closing price as of October 5, 2021 of $9.94. The Group initially presented the consideration paid for such treasury shares as a deduction of equity within other reserves in addition to $5 million of directly related expense, of which $4 million had been paid as of December 31, 2021. Subsequently those treasury shares have been cancelled and a total amount of $397 million was reclassified from other reserves to retained earnings. No gain or loss was recognized on the exchange offer or the subsequent cancellation.

Upon the completion of the Business Combination and the exchange offer, a historical cumulative loss of $5 million in the foreign currency translation reserve was re-attributed to the new non-controlling interest.

Management exercised significant judgment when accounting for the Merger under IFRS 2. The difference in the fair value of equity instruments issued by AMP, over the fair value of identifiable net assets of Gores Holdings V (including the fair value of assumed Gores Public and Private Warrants of $41 million) represented a service for listing of the shares in AMP and was accounted for as a share-based payment expense in accordance with IFRS 2.

In accordance with IFRS 2, the increase in equity for equity-settled share-based payments are measured directly at the fair value of the goods or services received. Management have used the market value of the Gores Holdings V equity and warrants as the basis for estimating the market value of the instruments to be issued by AMP as the Gores Holdings V instruments (equity and warrants) were publicly traded at the time of the Merger.

The cost of such service, which is a fully vested non-cash and non-recurring expense, was calculated as shown in the table below, using Gores Holdings V market prices as of August 4, 2021 (the "Closing Date") for the Gores Holdings V Class A common stock to be exchanged for shares in AMP.

	Shares	$'m
Class A stockholders	30,175,827	
Class F stockholders	9,843,750	
Total shares to be issued to Gores Holdings V stockholders	**40,019,577**	
Market value per share at the Closing Date	$10.59	
Fair value of shares to be issued to Gores Holdings V in consideration for combination		**424**
Net assets of Gores Holdings V at Closing Date (including fair value of assumed Public and Private Warrants)		219
Difference – being IFRS 2 charge for listing services		**205**

The cost for the listing service of $205 million was presented as an exceptional item, with an offset in other reserves of $164 million and in provisions and other liabilities of $41 million, respectively.

25. Business combinations

On April 29, 2022, the Group acquired Consol, for an equity value of ZAR10.1 billion ($663 million). Consol, headquartered in Johannesburg and founded in 1946, is the leading producer of glass packaging on the African continent.

The Transaction is accounted for as a business combination and the Company allocated $402 million of the purchase price to the fair value of the acquired customer relationship intangible asset. The Company applied the acquisition accounting principles in IFRS 3 to determine the fair value of the assets and liabilities acquired in Consol acquisition. Management's key assumptions in determining the fair value of the acquired customer relationship intangible asset included revenue growth rates, EBITDA margins, customer attrition rate and discount rate.

The following table summarizes the provisional consideration paid and the provisional fair value of assets acquired and liabilities assumed:

	$'m
Cash and cash equivalents	40
Property, plant and equipment	420
Intangible assets	402
Net working capital*	60
Income tax payable	(26)
Net deferred tax liability	(130)
Borrowings**	(434)
Share-based payment reserve	(4)
Employee benefit obligations	(5)
Total identifiable net assets	**323**
Goodwill	340
Total consideration	**663**

*Net working capital includes trade receivables of $102 million.

**Borrowings includes lease obligations of $43 million.

A purchase price allocation exercise is on-going and the allocations above are based on management's preliminary estimate of the fair values. Total consideration consists of cash consideration paid of $663 million.

The net cash outflow relating to the acquisition is summarized below:

	$'m
Cash consideration paid	663
Cash and cash equivalents acquired	(40)
Related derivative settlement gain	(51)
Purchase of businesses, net of cash acquired, and related derivative settlement gain	**572**

Goodwill arising from the acquisition reflects the anticipated commercial and financial benefits, including synergies, which include the integration of Consol's well-invested glass production facilities in addition to the skills and technical talent of the combined workforce.

The fair value of acquired trade receivables is materially equal to the gross contractual amounts receivable.

For the eight months ended December 31, 2022, Consol contributed revenue and Adjusted EBITDA of $496 million and $161 million respectively. If the acquisition of the business had occurred on January 1, 2022, Group revenue and Adjusted EBITDA would have been $9,229 million and $1,314 million.

26. Dividends

	Year ended December 31,	
	2022	**2021**
	$'m	**$'m**
Cash dividends on common shares declared 2021, paid 2022		
Special cash dividend: $3.52 per share	(777)	—
Cash dividends on ordinary shares declared and paid by AMP:		
Interim dividend to NCI: $0.10 per share	(15)	—
Interim dividend to NCI: $0.10 per share	(15)	—
Interim dividend to NCI: $0.10 per share	(14)	—
Interim dividend to NCI: $0.10 per share	(14)	—
Cash dividends on common shares declared and paid:		
Interim dividend: $0.15 per share	—	(35)
Interim dividend: $0.15 per share	—	(36)
Interim dividend: $0.15 per share	—	(35)
Special cash dividend: $1.25 per share	—	(296)
	(835)	**(402)**

On December 15, 2021, the Board declared a special cash dividend of $3.52 per common share, paid on January 7, 2022 to shareholders of record on December 27, 2021. This dividend of $777 million is disclosed in the 2021 consolidated statement of changes in equity.

For the year ended December 31, 2021, the Company approved and paid three quarterly dividends of $0.15 per common share and a special dividend of $1.25 per common share respectively. Total dividends paid amounted to $402 million.

On April 26, 2022, the board of directors of AMP (the "AMP Board") approved an interim dividend of $0.10 per ordinary share. The interim dividend of $60 million was paid on June 28, 2022 to shareholders of record on June 14, 2022.

On May 27, 2022, the AMP Board approved an interim dividend of $0.10 per ordinary share. The interim dividend of $61 million was paid on June 28, 2022 to shareholders of record on June 14, 2022.

On September 29, 2022, the AMP Board approved an interim dividend of $0.10 per ordinary share. The interim dividend of $59 million was paid on October 27, 2022 to shareholders of record on October 13, 2022.

On October 25, 2022, the AMP Board approved an interim dividend of $0.10 per ordinary share. The interim dividend of $60 million was paid on November 28, 2022 to shareholders of record on November 14, 2022.

The 2022 dividends approved and paid by AMP resulted in a cash outflow of $58 million from the Group to non-controlling interests for the year ended December 31, 2022.

27. Related party transactions and information

(i) Interests of Paul Coulson

At the date of this report, ARD Holdings S.A., the ultimate parent company of the Company is controlled by Paul Coulson, our Chairman, who controls ARD Holdings S.A. as a result of his 18.83% stake in ARD Holdings S.A. and his 52.42% stake in Yeoman Capital S.A., which in turn owns 33.88% of the equity interests in ARD Holdings S.A.

(ii) Common directorships

With the exception of Abigail Blunt, Oliver Graham, The Rt. Hon. the Lord Hammond of Runnymede, Damien O'Brien and Edward White, all of the directors of Ardagh Group S.A. are members of the board of directors of ARD Holdings S.A. Four of the ARD Holdings S.A. directors (Paul Coulson, Brendan Dowling, Gerald Moloney and Hermanus Troskie) also serve as directors in the Yeoman group of companies.

(iii) Yeoman Capital S.A.

At December 31, 2022, Yeoman Capital S.A. owned 33.88% of the ordinary shares of ARD Holdings S.A..

(iv) Joint ventures

The Group's interests held in joint ventures are related parties and these are set out in further detail in Notes 10 – Other non-current assets and 11 – Investment in equity accounted joint venture. Transactions with joint ventures were not material for any of the years presented.

For the year ended December 31, 2022, a subsidiary of AMPSA completed the purchase of land from a subsidiary of Trivium for a total consideration of approximately $3 million and completed other non-material transactions, including but not limited to, the sale of spare parts to and receipt of cutting and printing services from Trivium subsidiaries.

(v) Key management compensation

Key management are those persons who have the authority and responsibility for planning, directing and controlling the activities of the Group. Key management is comprised of the members who served on the Board and the Group's executive leadership team during the reporting period. The amount outstanding at year end was $nil (2021: $8 million).

	Year ended December 31,	
	2022 $'m	2021 $'m
Salaries and other short-term employee benefits	11	20
Post-employment benefits	1	1
	12	**21**
Transaction related and other compensation	3	101
	15	**122**

(vi) Pension schemes

The Group's pension schemes are related parties. For details of all transactions during the year, please see Note 20 – Employee benefit obligations.

(vii) Related party balances

At December 31, 2022, the Group had a related party loan receivable balance of $72 million, inclusive of $1 million of interest receivable with ARD Finance S.A. (2021: $23 million). With the exception of this, and the balances outlined in (i) to (vi) above, there were no material balances outstanding with related parties at December 31, 2022.

(viii) Other related party transactions

During the year ended December 31, 2022, the Company and its subsidiaries entered into transactions relating to non-material, non-employee director and office rental fees with certain members of the Maitland International Holdings and Stonehage Fleming groups of companies. Hermanus Troskie is a director of the Company and during the year ended December 31, 2022, he was employed for one month by the Maitland International Holdings group of companies and for the remainder of the reporting period by the Stonehage Fleming group of companies.

(ix) Toggle Notes

In November 2019, ARD Finance S.A. issued (i) $1,130 million aggregate principal amount of 6.500% / 7.250% Senior Secured Toggle Notes due 2027 (the "Dollar Toggle Notes"), and (ii) €1,000 million aggregate principal amount of 5.000% / 5.750% Senior Secured Toggle Notes due 2027 (the "Euro Toggle Notes", and together with the Dollar Toggle Notes, the "Toggle Notes"). Certain directors of the Company have acquired and hold certain of the Toggle Notes.

(ix) Subsidiaries

28. Principal Accountant Audit Fees and Services

PricewaterhouseCoopers have acted as our principal accountants for the years ended December 31, 2021 and December 31, 2022.

The following table summarizes the total amounts for professional fees rendered in those periods:

	Year ended December 31,	
	2022	2021
	(in $ millions)	
Audit services fees	9	8
Audit-related services fees	1	6
Tax services fees	—	1
Total	**10**	**15**

29. Contingencies

Environmental issues

The Group is regulated under various national and local environmental, occupational health and safety and other governmental laws and regulations relating to:

- the operation of installations for manufacturing of metal packaging and surface treatment using solvents;
- the operation of installations for manufacturing of container glass;
- the generation, storage, handling, use and transportation of hazardous materials;
- the emission of substances and physical agents into the environment;
- the discharge of waste water and disposal of waste;
- the remediation of contamination;
- the design, characteristics, collection and recycling of its packaging products; and
- the manufacturing, sale and servicing of machinery and equipment for the container glass and metal packaging industry.

The Group believes, based on current information, that it is in substantial compliance with applicable environmental laws and regulations and permit requirements. It does not believe it will be required, under existing or anticipated future environmental laws and regulations, to expend amounts, over and above the amounts accrued, which will have a material effect on its business, financial condition or results of operations or cash flows. In addition, no material proceedings against the Group arising under environmental laws are pending. Finally, the Group believes that the potential impact of climate change on the Group has not resulted in a contingent obligation as of December 31, 2022.

Legal matters

The Group is involved in certain legal proceedings arising in the normal course of its business. The Group believes that none of these proceedings, either individually or in aggregate, will have a material adverse effect on its business, financial condition, results of operations or cash flows.

30. Events after the reporting period

In February 2023, AMP completed the acquisition of a majority share in NOMOQ AG (“NOMOQ”), a start-up digital can printer based in Switzerland, for an initial consideration of €15 million, with a further €10 million payable in 2024, subject to NOMOQ achieving certain milestones.

On February 21, 2023, the Board approved an interim dividend of $0.10 per ordinary share. The interim dividend will be paid on March 28, 2023 to shareholders of record on March 14, 2023.

The refinancing of the South African debt facilities was completed on February 20, 2023, with some customary conditions precedent to be completed post-closing. This extended the maturity of the current debt facilities from 2023 to 2028 and increased the maximum amount drawable under the facilities by ZAR2.9 billion ($160 million), from ZAR6.3 billion to ZAR9.2 billion.
